Scholars' Guide to Washington, D.C., for Peace and International Security Studies Robert W. Janes 1995 A survey of Washington, D.C., area collections, organizations, and agencies, this Scholars' Guide describes scholarly resources for peace studies and international security studies. Among other topics, coverage includes disarmament, environmental issues, international law, military history, and peace theory and research. Four hundred twenty-one institutions are covered, out of more than 750 surveyed in the course of the project. Collections include libraries, archives, art and museum collections, map, recording, photo, and film collections, and data banks. Organizations include research centers, information offices, university programs, government agencies, and associations. For each, directory information is given, along with a description of relevant resources and activities in terms of size, content, and organization of collections; programs; and products (published and unpublished, classified and unclassified). Scholars' Guide to Washington, D.C., for Peace and International Security Studies is the fifteenth in the series of Scholars' Guides edited by Zdenek V. David, librarian at the Woodrow Wilson International Center for Scholars in Washington, D.C. It was prepared in collaboration with the United States Institute of Peace.
Essential Circuits Reference Guide John Markus 1988 A guide to research, this volume includes 925 studies of Chaucer written between 1900 and 1984. Each entry is listed once, alphabetically, under an appropriate topic heading or under the title of the work it treats most directly. The annotations provide bibliographic information, identify the primary focus of the item annotated, and summarize its content. See entry PR1868. These classic circuits were chosen from Markus' Sourcebook of electronic circuits

(1968), Electonics circuits manual (1971), and Guidebook of electronics circuits (1974). With circuit integration onto chips, many older circuits have become obsolete. This guide is a distillation of those circuits still in use today for which parts are still available. Annotation copyrighted by Book News, Inc., Portland, OR

Kubernetes Operators Jason Dobies 2020-02-21 Operators are a way of packaging, deploying, and managing Kubernetes applications. A Kubernetes application doesn't just run on Kubernetes; it's composed and managed in Kubernetes terms. Operators add application-specific operational knowledge to a Kubernetes cluster, making it easier to automate complex, stateful applications and to augment the platform. Operators can coordinate application upgrades seamlessly, react to failures automatically, and streamline repetitive maintenance like backups. Think of Operators as site reliability engineers in software. They work by extending the Kubernetes control plane and API, helping systems integrators, cluster administrators, and application developers reliably deploy and manage key services and components. Using real-world examples, authors Jason Dobies and Joshua Wood demonstrate how to use Operators today and how to create Operators for your applications with the Operator Framework and SDK. Learn how to establish a Kubernetes cluster and deploy an Operator Examine a range of Operators from usage to implementation Explore the three pillars of the Operator Framework: the Operator SDK, the Operator Lifecycle Manager, and Operator Metering Build Operators from the ground up using the Operator SDK Build, package, and run an Operator in development, testing, and production phases Learn how to distribute your Operator for installation on Kubernetes clusters

The Fourth Industrial Revolution Klaus Schwab 2017-01-03 The founder and executive chairman of the World Economic Forum on how the impending technological revolution will change our lives We are on the brink of the Fourth Industrial Revolution. And this one will be unlike any other in human history. Characterized by new technologies fusing the physical, digital and biological worlds, the Fourth Industrial Revolution will impact all disciplines, economies and industries - and it will do so at an unprecedented rate. World Economic Forum data predicts that by 2025 we will see: commercial use of nanomaterials 200 times stronger than steel and a million times thinner than human hair; the first transplant of a 3D-printed liver; 10% of all cars on US roads being driverless; and much more besides. In The Fourth Industrial Revolution, Schwab outlines the key technologies driving this revolution, discusses the major impacts on governments, businesses, civil society and individuals, and offers bold ideas for what can be done to shape a better future for all.

Understanding China's Political System Susan Lawrence 2012-05-10 This report is designed to provide Congress with a perspective on the contemporary political system of China, the only Communist Party-led authoritarian state in the G-20 grouping of major economies. China's Communist Party dominates state and society in China, is committed to maintaining a permanent monopoly on power, and is intolerant of those who question its right to rule. Nonetheless, analysts consider China's political system to be neither monolithic nor rigidly hierarchical. Jockeying among leaders and institutions representing different sets of interests is common at every level of the system.
