Prompting in/ex/Tensions of the Manuscript. Literary and Editorial Approaches to Selected Early Play Scripts of the Abbey Theatre GRZEGORZ KONECZNIAK 2016 This book, whose slashed part of the title refers to Allen Tate's idea of poetic tension, "derived from lopping the prefixes off the logical terms extension and intension" (Tate 1938: 283; italics in the original; see also Markowski 2006: 140–141), addresses various dimensions of prompting and its techniques preserved in the old play scripts of the Abbey Theatre. They were both encoded inside the plots of the dramatic works and inscribed on the pages of the unique typographical, textual and graphic composite constructs. The research presented stems from an exploration of the duality of intention and tension within literary and editorial studies. The two concepts relate to the thematic dimensions (the motif of tension in literature) as well as theoretical literary and textual problems (the question of intent and intention in literary interpretation and editorial research). "Tension" and "intention" in literature have been considered in various manners depending on a given theoretical approach. Their treatment should require a specific approach and methodology if literary works – plays, to be more specific – subject to a critical and interpretative examination are encapsulated within the unique forms of manuscripts whose original function was to guide the stage managers, prompters, or actors through the complex process of rehearsing and producing dramas at the theatre.

Research and Advanced Technology for Digital Libraries Jose Borbinha 2003-06-26 ECDL2000, the Fourth European Conference on Research and Advanced Technology for Digital Libraries, is being held this year in Lisbon, Portugal, following previous events in Pisa (1997), Heraklion (1998), and Paris (1999). One major goal of the ECDL conference series has been to draw information professionals, stakeholders, and user communities from both the research world and from industry into a discussion of the alternative technologies, policies, and scenarios for global digital libraries. The success of previous conferences makes them a hard act to follow. The field of digital libraries draws on a truly diverse set of scientific and technical disciplines. In the past three years, moreover, global cooperation on research and development has emerged as an urgent priority, particularly in the new European Framework Programme and in the Digital Library Initiative in the United States. Because of this

diversity, the elder is perhaps still struggling for an identity. But this struggle for identity is itself a source of energy and creativity. Participants in this elder feel themselves to be part of a special community, with special people. Each of us may claim expertise on a narrow issue, with specific projects, but the choices we make and the methods we use in local solutions can have unforeseen impacts within a growing universe of interconnected resources.

Integrative Document & Content Management Len Asprey 2003-01-01 Portals present unique strategic challenges in the academic environment. Their conceptualization and design requires the input of campus constituents who seldom interact and whose interests are often opposite. The implementation of a portal requires a coordination of applications and databases controlled by different campus units at a level that may never before have been attempted at the institution. Building a portal is as much about constructing intra-campus bridges as it is about user interfaces and content. *Designing Portals: Opportunities and Challenges* discusses the current status of portals in higher education by providing insight into the role portals play in an institution's business and educational strategy, by taking the reader through the processes of conceptualization, design, and implementation of the portals (in different stages of development)

at major universities and by offering insight from three producers of portal software systems in use at institutions of higher learning and elsewhere.

The Routledge Companion to Dramaturgy Magda Romanska
2014-08-07 Dramaturgy, in its many forms, is a fundamental and indispensable element of contemporary theatre. In its earliest definition, the word itself means a comprehensive theory of "play making." Although it initially grew out of theatre, contemporary dramaturgy has made enormous advances in recent years, and it now permeates all kinds of narrative forms and structures: from opera to performance art; from dance and multimedia to filmmaking and robotics. In our global, mediated context of multinational group collaborations that dissolve traditional divisions of roles as well as unbend previously intransigent rules of time and space, the dramaturg is also the ultimate globalist: intercultural mediator, information and research manager, media content analyst, interdisciplinary negotiator, social media strategist. This collection focuses on contemporary dramaturgical practice, bringing together contributions not only from academics but also from prominent working dramaturgs. The inclusion of both means a strong level of engagement with current issues in dramaturgy, from the impact of social media to the ongoing centrality of interdisciplinary and intermedial processes. The contributions survey the field through eight main lenses: world dramaturgy and global perspective dramaturgy as function, verb and skill dramaturgical leadership and season planning production dramaturgy in translation adaptation and new play development interdisciplinary dramaturgy play analysis in postdramatic and new media dramaturgy social media and audience outreach. Magda Romanska is Visiting Associate Professor of Slavic Languages and Literatures at Harvard University, Associate Professor of Theatre and Dramaturgy at Emerson College, and Dramaturg for Boston Lyric Opera. Her books include *The Post-Traumatic Theatre of Grotowski and Kantor* (2012), *Boguslaw Schaeffer: An Anthology* (2012), and

Comedy: An Anthology of Theory and Criticism (2014).

Theatre and Archival Memory Barry Houlihan 2021-07-28 This book presents new insights into the production and reception of Irish drama, its internationalisation and political influences, within

a pivotal period of Irish cultural and social change. From the 1950s onwards, Irish theatre engaged audiences within new theatrical forms at venues from the Pike Theatre, the Project Arts Centre, and the Gate Theatre, as well as at Ireland's national theatre, the Abbey. Drawing on newly released and digitised archival records, this book argues for an inclusive historiography reflective of the formative impacts upon modern Irish theatre as recorded within marginalised performance histories. This study examines these works' experimental dramaturgical impacts in terms of production, reception, and archival legacies. The book, framed by the device of 'archival memory', serves as a means for scholars and theatre-makers to inter-contextualise existing historiography and to challenge canon formation. It also presents a new social history of Irish theatre told from the fringes of history and reanimated through archival memory.

The Stage Management Handbook Daniel Ionazzi 1992-04-15 The stage manager is the renaissance man of the theater. He or she must have a working knowledge of how the various technical aspects of the theater work (scenery, props, costumes, lights and sound), be part director, part playwright, part designer and part producer, and be prepared to act as confidant, counselor and

confessor to everyone else in the company. This book addresses all of these considerations in detail and offers the reader—professional or amateur, veteran or beginner—helpful guidance and practical advice, supported by many forms and examples to illustrate the points covered in the text. The three phases of mounting and performing a show are covered. Part I takes the reader through the pre-production phase—research, the script, planning and organization, and auditions. Part II covers the rehearsal process—rehearsal rules, blocking, cues, prompting, information distribution, technical and dress rehearsals. Part III discusses the performance phase—calling the show, maintaining the director's work, working with understudies and replacements, and more. Part IV provides insights into the organizational structure of some theaters and aspects of human behavior in those organizations. Many stage managers of long-running commercial productions believe that—once the show is up and running—only ten percent of their work is related to everything covered in Parts I, II and III. The other ninety percent is associated with issues in Part IV; i.e. "managing" human behavior and maintaining working relationships.

Managing Electronic Media Joan Van Tassel 2012-09-10 This college-level media management textbook reflects the changes in the media industries that have occurred in the past decade. Today's managers must address new issues that their predecessors never faced, from the threats of professional piracy and casual copying of digital media products, to global networks, on-demand consumption, and changing business models. The book explains the new new vocabulary of media moguls, such as bandwidth, digital rights management, customer relations management, distributed work groups, centralized broadcast operations, automated playlists, server-based playout, repurposing, mobisodes, TV-to-DVD, and content management. The chapters logically unfold the ways that managers are evolving their practices to make content, market it, and deliver it to consumers in a competitive, global digital marketplace. In addition to media companies, this book covers management processes that extend to all content-producing organizations, because today's students are as likely to produce high-quality video and Web video for ABC Computer Sales as they are for the ABC Entertainment Television Network.
