Visible Learning in Early Childhood Kateri Thunder 2021-09-28 Make learning visible in the early years Early childhood is a uniquely sensitive time, when young learners are rapidly developing across multiple domains, including language and literacy, mathematics, and motor skills. Knowing which teaching strategies work best and when can have a significant impact on a child's development and future success. Visible Learning in Early Childhood investigates the critical years between ages 3 and 6 and, backed by evidence from the Visible Learning® research, explores seven core strategies for learning success: working together as evaluators, setting high expectations, measuring learning with explicit success criteria, establishing developmentally appropriate levels of learning, viewing mistakes as opportunities, continually seeking feedback, and balancing surface, deep, and transfer learning. The authors unpack the symbiotic relationship between these seven tenets through Authentic examples of diverse learners and settings Voices of master teachers from the US, UK, and Australia Multiple assessment and differentiation strategies Multidisciplinary approaches depicting mathematics, literacy, art and music, social-emotional learning, and more Using the Visible Learning research, teachers partner with children to encourage high expectations, developmentally appropriate practices, the right level of challenge, and a focus on explicit success criteria. Get started today and watch your young learners thrive!

Stepping Up Lesson Study Aki Murata 2020-11-26 "This is a much needed book for educators who want to learn more than just the surface features of lesson study, to deepen the process and learning. Bringing together current knowledge and resources from lesson study practitioners and researchers all over the world, this book provides models and examples of how teachers can learn more deeply and how to support them to learn more in lesson study. The chapters connect current research/educational theories to classroom practices, filled with examples to illustrate how deeper learning looks like with lesson study; for example, highlighting research process, paying attention to educative talk, using of case pupils (students) as teachers' focus, doing kyozaï kenkyū well, facilitating mock-up lessons, etc. This is not a basic "how-to" handbook of lesson study, and readers can choose chapters with topics of interest to learn and use the new ideas promptly in their work. Coming from the global network of lesson study educators, the book not only provides new learning guides but also provides stories of how lesson study has been adopted in different cultures and educational contexts"--

Serious Fun Marie L. Masterson 2019-02-12 A practical book for teachers consisting of 10 YC and TYC articles on the importance of integrating rich content-based, teacher-guided instruction with meaningful child-centered play to nurture children's emerging capabilities and skills. The emphasis is on teachers' active, intentional role in children's play to guide learning. Two sections: four general articles that discuss the topic, followed by six content-area articles on math, literacy, drama, art, STEM, and outdoor learning. Marie wrote the introduction as well as other material. Note: This book will not be part of the Spotlight series; articles will appear as chapters in a book (along the lines of Big Questions, with chapters from different authors but having a cohesive look).

The SAGE Encyclopedia of Contemporary Early Childhood Education Donna Couchenour 2016-03-15 The general public often views early childhood education as either simply "babysitting" or as preparation for later learning. Of course, both viewpoints are simplistic. Deep understanding of child development, best educational practices based on development, emergent curriculum, cultural competence and applications of family systems are necessary for high-quality early education. Highly effective early childhood education is rare in that it requires collaboration and transitions among a variety of systems for children from birth through eight years of age. The SAGE Encyclopedia of Contemporary Early Childhood Education presents in three comprehensive volumes advanced research, accurate practical applications of research, historical foundations and key facts from the field of contemporary early childhood education. Through approximately 425 entries, this work includes all areas of child development – physical, cognitive, language, social, emotional, aesthetic – as well as comprehensive review of best educational practices with young children, effective preparation for early childhood professionals and policy making practices, and addresses such questions as: · How is the field of early childhood education defined? · What are the roots of this field of study? · How is the history of early childhood education similar to yet different from the study of public education? · What are the major influences on understandings of best practices in early childhood education?

Developmentally Appropriate Practice in Early Childhood Programs Serving Children from Birth Through Age 8, Fourth Edition (Fully Revised and Updated) Naeyc 2021-08 The long-awaited new edition of NAEYC's book Developmentally Appropriate Practice in Early Childhood Programs is here, fully revised and updated! Since the first edition in 1987, it has been an essential resource for the early childhood education field. Early childhood educators have a professional responsibility to plan and implement intentional, developmentally appropriate learning experiences that promote the social and emotional development, physical development and health, cognitive development, and general learning competencies of each child served. But what is developmentally appropriate practice (DAP)? DAP is a framework designed to promote young children's optimal learning and development through a strengths-based approach to joyful, engaged learning. As educators make decisions to support each child's learning and development, they consider what they know about (1) commonality in children's development and learning, (2) each child as an individual (within the context of their family and community), and (3) everything discernible about the social and cultural contexts for each child, each

educator, and the program as a whole. This latest edition of the book is fully revised to underscore the critical role social and cultural contexts play in child development and learning, including new research about implicit bias and teachers' own context and consideration of advances in neuroscience. Educators implement developmentally appropriate practice by recognizing the many assets all young children bring to the early learning program as individuals and as members of families and communities. They also develop an awareness of their own context. Building on each child's strengths, educators design and implement learning settings to help each child achieve their full potential across all domains of development and across all content areas.

Transforming the Workforce for Children Birth Through Age 8 National Research Council 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Learning Stories and Teacher Inquiry Groups: Re-Imagining Teaching and Assessment in Early Childhood Education Isaura Escamilla 2021-07-13 Learning Stories and Teaching Inquiry Groups is a practical text focused on how ECE practitioners can establish teacher inquiry and reflection groups and integrate the use of learning stories to strengthen their assessment, teaching practices, and knowledge of child development. Drawing on relevant research and the authors' direct work with teachers, the book focuses on describing ways the authors have adapted the framework of the learning stories approach from New Zealand to specific US educational contexts via examples from several urban and rural ECE contexts. The book provides practical examples of novice through veteran early childhood teachers engaging and collaborating in onsite and cross-site inquiry and reflection with a focus on learning stories. This text will be useful for infant, toddler, and preschool teachers taking courses at the AA, BA, and MA levels, as well as teachers engaged in onsite professional development. This text will help early childhood educators learn to write learning stories as an observational and assessment approach to document young children's learning experiences and to deepen teachers' understanding of the role of narrative in linking child development knowledge with effective environmental design, high-quality curricular approaches, and socially and culturally inclusive relationship practices. The text will support early childhood educators' professional development through easily understood instructions and case study samples of inquiry work with learning stories through community of practice. Educators will learn how linking learning stories with regular, systematic forms of teacher inquiry, documentation, and reflection promotes a new image of children as holistic learners.
