We Want to Do More Than Survive Bettina L. Love 2019-02-19 Winner of the 2020 Society of Professors of Education Outstanding Book Award

Drawing on personal stories, research, and historical events, an esteemed educator offers a vision of educational justice inspired by the rebellious spirit and methods of abolitionists. Drawing on her life's work of teaching and researching in urban schools, Bettina Love persuasively argues that educators must teach students about racial violence, oppression, and how to make sustainable change in their communities through radical civic initiatives and movements. She argues that the US educational system is maintained by and profits from the suffering of children of color. Instead of trying to repair a flawed system, educational reformers offer survival tactics in the forms of test-taking skills, acronyms, grit labs, and character education, which Love calls the educational survival complex. To dismantle the educational survival complex and to achieve educational freedom—not merely reform—teachers, parents, and community leaders must approach education with the imagination, determination, boldness, and urgency of an abolitionist. Following in the tradition of activists like Ella Baker, Bayard Rustin, and Fannie Lou Hamer, *We Want to Do More Than Survive* introduces an alternative to traditional modes of educational reform and expands our ideas of civic engagement and intersectional justice.

Educating English Learners Joyce W. Nutta 2020-07-29 In Educating English Learners, Joyce W. Nutta and her colleagues offer practical tools for helping schools and teachers successfully integrate English learners into mainstream classrooms. Drawing on the One Plus model presented in their award-winning book, Preparing Every Teacher to Reach English Learners, the authors now turn their attention to the needs of K–12 teachers who typically have two or three English learners in their classrooms. English learners are not a homogenous group, and the challenges they face vary tremendously. Nutta and her colleagues present protocols and case studies to help pre-service and in-service teachers understand the needs of English learners in their classrooms and differentiate instruction and assessment accordingly. Woven throughout the book are the stories of Gero, Edith, Tasir, and Edgar, four case study students of different ages, backgrounds, and levels of English proficiency. The authors show how the protocols they provide can be applied to adapt sample lessons for students like these, across a range of grade levels, subject areas, and pedagogical approaches. Finally, the authors show how the system can be applied school-wide for a collaborative approach to meeting English learners' needs.

Reading Reasons Kelly Gallagher 2003 "Why should I read?" Can your students answer that question? Do they have trouble seeing the importance that reading may have in their lives? Are they lacking motivation, both in academic and recreational reading? Do you think you can effectively teach reading strategies if students don't understand the benefits of literacy? In Reading Reasons, Kelly Gallagher offers a series of mini-lessons specifically tailored to motivate middle and high school students to read, and in doing so, to help them understand the importance and relevance reading will take in their lives. This book introduces and explains in detail nine specific "real-world" reasons why students should be readers. The book contains forty practical, classroom-tested and reproducible mini-lessons that get to the heart of reading motivation and that can be used immediately in English (as well as other content-area) classrooms. These easy-to-use motivational lessons serve as weekly reading "boostershots" that help maintain reading enthusiasm in your classroom from September through June. The mini-lessons, ranging from five to twenty minutes in length, hit home with adolescents, and in turn, enable them to internalize the importance reading will play in their lives. Rather than telling students reading is good for them, the lessons in this book show them the benefits of reading.

Literacy S. N. Colamery 2000 Literacy is defined as the ability to read and write. One would expect that as the world enters the 21st century of the Third Millennium, we wouldn't even need to discuss such a topic. But alas, that is not the case. Even in the United States, the only so-called superpower left standing at the moment, the rate of illiteracy is astonishing. Some cynics say that there is no cause for alarm since the rich elite class needs millions of workers for low-paid jobs and the less educated the better. Others say that the lack of literacy is the fault of the schools and that if we double the pay of the teachers, they will somehow suddenly be interested in teaching. Still others say that with television and VCRs everywhere, who needs to read and write anyway. In this book we have collected citations, sorted and indexed them in a way which we hope will be useful for those seeking further information on this topic. At the beginning, we offer excerpts from some of the fundamental reports summarising the dismal situation.

Giggle Poetry Reading Lessons Amy Buswell 2014-08-05 Amy Buswell and Bruce Lansky's *Giggle Poetry Reading Lessons* turns struggling readers into happy readers — For Grades 2–5. Many struggling readers are embarrassed to read aloud. They are often intimidated or bored by texts that conventional programs require them to practice. So, instead of catching up, they fall further behind. Currently 67% of American fourth graders can't read grade-level text. Reading specialist Amy Buswell has spent eight years looking for remediation methods that work. "What is needed," Buswell explains, "is a program that improves the motivation of struggling readers, because that accounts for 90% of the problem." Four years ago, Buswell came up with a brainstorm. She knew her best readers enjoyed reading Bruce Lansky's poetry books for pleasure. The more poems they read, the better the reading got. Why not use Lansky's kid-tested poems as texts struggling readers could practice on to improve their reading—using six research-based strategies: choral reading, echo reading, paired reading, repeated reading, sustained silent reading and "say it like the character" reading. — This book is the result of that brainstorm and the resulting collaboration between Buswell and Lansky. It gives teachers and parents everything they need to help children improve their reading: -35 kid-tested poems by Bruce Lansky -35 customized reading lessons by Amy Buswell -35 off-the-wall illustrations by Stephen Carpenter -35 sets of zany performance tips by Bruce Lansky ...all of which is designed to make the process of reading improvement more like fun than work. — What Amy Buswell and Bruce Lansky have created is the most entertaining fluency intervention ever. That's why it is so successful at overcoming negative attitudes to improve reading skills and scores. Ninety-five percent of participating students made significant improvement in their fluency (reading rate). And average reading scores on the Florida Comprehensive Assessment Test (FCAT) for Buswell's school raised her school's rating to an A for the first time. In 2011, Buswell's school achieved one of the highest-percentage reading gains in the county. — There's no reason parents can't get in on the fun, too. Parents will enjoy Lansky's funny poems and Stephen Carpenter's delightful illustrations as much as their children. By reading the poems with their children and encouraging their children to try some of Lansky's entertaining performance tips (by adding gestures, sound effects, props and finding additional readers: be they friends, family or neighbors), they can dramatically speed up their child's reading progress (and have lots of fun in the process.)

The Chicago Guide to Writing about Multivariate Analysis, Second Edition Jane E. Miller 2013-09-26 Many different people, from social scientists to government agencies to business professionals, depend on the results of multivariate models to inform their decisions. Researchers use these advanced statistical techniques to analyze relationships among multiple variables, such as how exercise and weight relate to the risk of heart disease, or how unemployment and interest rates affect economic growth. Yet, despite the widespread need to plainly and effectively explain the results of multivariate analyses to varied audiences, few are properly taught this critical skill. *The Chicago Guide to Writing about Multivariate Analysis* is the book researchers turn to when looking for guidance on how to clearly present statistical results and break through the jargon that often clouds writing about applications of statistical analysis. This new edition features even more topics and real-world examples, making it the must-have resource for anyone who needs to communicate complex research results. For this second edition, Jane E. Miller includes four new chapters that cover writing about interactions, writing about event history analysis, writing about multilevel models, and the "Goldilocks principle" for choosing the right size contrast for interpreting results for different variables. In addition, she has updated or added numerous examples, while retaining her clear voice and focus on writers thinking critically about their intended audience and objective. Online podcasts, templates,

and an updated study guide will help readers apply skills from the book to their own projects and courses. This continues to be the only book that brings together all of the steps involved in communicating findings based on multivariate analysis—finding data, creating variables, estimating statistical models, calculating overall effects, organizing ideas, designing tables and charts, and writing prose—in a single volume. When aligned with Miller's twelve fundamental principles for quantitative writing, this approach will empower readers—whether students or experienced researchers—to communicate their findings clearly and effectively.

The State of State English Standards, 2005 Sandra Stotsky 2005 The importance of state academic standards soared in January 2002 with passage of the No Child Left Behind Act (NCLB). Not only does that milestone law require all states to have demanding academic standards in place and to demonstrate steady student progress toward academic proficiency as set forth in those standards, it also links states' accountability for increasing students' achievement to the quality of their teachers. The Higher Education Act also asks states to report annually on pass rates on licensure tests taken by prospective teachers and on how their K-12 standards relate to their teacher-preparation program standards. For the first time in U.S. history, these key elements of our public-education system are joined--and they are all joined to state academic standards that set forth what K-12 students are expected to learn in core subjects. The quality of those standards thus matters more than ever before. In this review, that quality is appraised in 2005 in reading and English language arts, arguably the most basic and consequential subject of all. Do states' current standards expect what they should? Are they demanding enough? Clear enough? Faithful to what is known about how students learn? And are states using them to guide not only the curriculum and assessment system for students but also their teacher-training programs, the tests that they require of prospective teachers, and their professional development activities for current teachers? This report answers those and many more questions about reading and English standards in 49 states and the District of Columbia. (Iowa has no state standards.) In addition to official standards documents, a wide variety of supplemental materials were reviewed against 34 criteria organized into six major categories. Criteria were scored on a 4-point scale and grade point averages were converted to letter grades. Appended are: (1) The 2005 Review Form and Methodology; (2) Criteria, Rationales, and State Results; (3) Unteachable Literature Standards; (4) Strong Literature Standards; and (5) Tables. [Report also produced by the Thomas B. Fordham Institute. Foreword by Chester E. Finn, Jr.].
