At the Bottom of Indian Society Stephen Fuchs 1981 Description: In recent years the harijan problem has become very acute in india's social and political life. The problem of caste and untouchability has been discussed from various viewpoints,

not always with due impartiality and a thorough knowledge of the facts. It gives a new explanation for the origin of caste and untouchability, dating it back to the pre-indian past of the arjans and dravidians. It contributes greatly to a better knowledge of the harijans by a short description and characterisation of all the individual harijan castes throughout india. Such a study had never been undertaken before. This study of the harijans has enabled the author to arrive at new conclusion hitherto rarely mentioned in the literature on caste and untouchability: 1. The problem of untouchability originated among the high castes. Therefore, for the abolition of untouchability, the high-castes must be tackled first. They must be convinced that untouchability is to their own economic and social disadvantage. So far reformers have attacked the problem at the wrong end: by trying to uplift the harijans. No wonder they failed. 2. The indian high-castes are not consistent in linking untouchability with certain impure occupations. The stigma of untouchability is attached to certain trades in one region, while in other regions workers in the same trade are not excluded from the hindu fold. 3. Various trades, ritually pure and impure, are closely connected in indian economy. This explains why certain trades, though apparently ritually pure, yet can be carried out only by untouchables. The conclusions presented in the present book may have important practical implications for the abolition of untouchability and thus for the solution of a national problem which causes so much political unrest and untold suffering to vast masses of the indian population, at the same time blackening the fair image of the indian nation in the world. New Theory of Discriminant Analysis After R. Fisher Shuichi Shinmura 2016-12-27

This is the first book to compare eight LDFs by different types of datasets, such as Fisher's iris data, medical data with collinearities, Swiss banknote data that is a linearly separable data (LSD), student pass/fail determination using student attributes, 18 pass/fail determinations using exam scores, Japanese automobile data, and six microarray datasets (the datasets) that are LSD. We developed the 100-fold cross-validation for the small sample method (Method 1) instead of the LOO method. We proposed a simple model selection procedure to choose the best model having minimum  $M_2$  and Revised IP-OLDF based on MNM criterion was found to be better than other  $M_2$ s in the above datasets. We compared two statistical LDFs and six MP-based LDFs. Those were Fisher's LDF, logistic regression, three SVMs, Revised IP-OLDF, and another two OLDFs. Only a hard-margin SVM (H-SVM) and Revised IP-OLDF could discriminate LSD theoretically (Problem 2). We solved the defect of the generalized inverse matrices (Problem 3). For more than 10 years, many researchers have struggled to analyze the microarray dataset that is LSD (Problem 5). If we call the linearly separable model "Matroska," the dataset consists of numerous smaller Matroskas in it. We develop the Matroska feature selection method (Method 2). It finds the surprising structure of the dataset that is the disjoint union of several small Matroskas. Our theory and methods reveal new facts of gene analysis.

Human Rights Andrew Clapham 2016-02-01 Today it is usually not long before a problem gets expressed as a human rights issue. Indeed, human rights law continues to gain increasing attention internationally, and must move quickly in order to keep up with a social world that changes so rapidly. This Very Short Introduction, in its second edition, brings the issue of human rights up to date, considering the current controversies surrounding the movement. Discussing torture and arbitrary detention in the context of counter terrorism, Andrew Clapham also considers new challenges to human rights in the context of privacy, equality and the right to health. Looking at the philosophical justification for rights, the historical origins of human rights and how they are formed in law, Clapham explains what our human rights actually are, what they might be, and where the human rights movement is heading. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get

Embryology of Angiosperms B. M. Johri 2012-12-06 Thirty-four years have elapsed since the publication of the late Professor P. Maheshwari's text, An Introduction to the Embryology of Angiosperms, a work which for many years served as an invaluable guide for students and a rich source book for research workers. Various texts dealing with sections of the broad spectrum of topics encompassed by Maheshwari in his book have appeared in the interim, but a compendious modern work dealing with the whole field has been lacking. This present volume splendidly meets the need, and it is altogether fitting that Professor B. M. Johri, long an associate and close colleague of Professor Maheshwari and himself a prolific contributor to the subject, should have undertaken the task of editing it. When Maheshwari wrote, it was still feasible for one author to handle the subject, but today even someone with his fine breadth of vision and depth of understanding could not, alone, do it justice. So the effort has to be a collaborative one; and Professor Johri's achievement has been to bring together a team of authoritative collaborators, assign them their responsibilities, and put them to work to produce a text as integrated in its treatment as the diversity of the subject would allow. The product vividly illustrates the advances that have been made in the study of angiosperm reproductive systems in the last 30 years, and the book is surely destined to become the new standard for student and researcher alike.
