Teaching REPORTER Facing History and Ourselves 2010-12-01 Facing History and Ourselves has developed Teaching Reporter to help classrooms explore essential questions about being a global citizen in the information age. The documentary Reporter follows New York Times columnist Nicholas Kristof on a reporting trip to central Africa. Watching Kristof identify stories that he thinks will galvanize readers to take action to prevent further humanitarian disasters in places such as Congo and Darfur, gives us an opportunity to think about not only the role of the journalist, but also our own roles as members of a global society. To whom do we show compassion? Under what circumstances? How can information be used to encourage action on behalf of others? Teaching Reporter includes materials that help students make connections between the dramatic events presented in the film and the choices they make in their own lives as creators and consumers of media. By addressing issues ranging from journalistic objectivity to psychic numbing, the resources in this study guide help develop students' civic and media literacy skills.

SCM Studyguide Church History Stephen Spencer 2013-08-30 An introduction to the study of the ways the church has evolved in its corporate life since its birth in the first century. Special attention is given to studying its changing relationship and interaction with the surrounding societies in which it has existed. The intended readership will be those training for ministry in English speaking churches, so the studyguide will concentrate on those aspects of this subject of most relevance to this group. This means there will be greater attention to developments in the West than in the East, especially in later centuries, and to topics such as the nature of ministry, the sacraments, places of worship, authority in the church and mission. These will be examined at each period of church history, in each chapter, to provide reference points of comparison throughout the book. Each chapter will also contain a specific case study, presenting extracts of some key documents with notes, commentary and questions for discussion, to allow readers to develop skills in historical research. General discussion questions and reading lists will be provided at the end of each chapter. The final chapter will provide guidance for the study of the history

of the student's own church and community.

Study Guide for the Psychiatry Board Examination Philip R. Muskin, M.D. 2016-04-13 Psychiatrists and residents are faced with the important -- but what may feel overwhelming -- task of refreshing their knowledge of the whole of psychiatric practice, typically while remaining engaged in full-time clinical activity. Psychiatrists will find the logical structure, substantive questions, and thorough explanations provided by the Study Guide for the Psychiatry Board Examination to be as reassuring as they are educational. Although readers are advised to consult a range of resources in preparation for the examination, this guide is indispensable. It is the first and only guide to reflect the revisions contained in DSM-5®, and it will ably assume a primary role in the study and review process. The guide is designed for maximum usefulness, with specific features and attributes to support knowledge recall and successful examination performance. * The authors are from a cross-section of accomplished students, fellows, and junior and senior faculty, all of whom have faced or will face the board examination and who understand its importance to the profession.* Topics were determined by the American Board of Psychiatry and Neurology Certification Examination in Psychiatry 2015 Content Blueprint.* The approximately 400

questions were formulated from information extracted from widely available American Psychiatric Publishing textbooks and accurately reflect the accepted psychiatric knowledge base.* Each multiple choice question is followed by an explanation of why the correct answer is correct and the others are incorrect, and every question and explanation is referenced, directing the reader to the primary material for more in-depth learning and study.* The volume was designed as a study guide for both the initial psychiatry board examination and the recertification examination. The process of working through the study guide will allow the reader to identify areas of strength and weakness, initiate further study, and test and retest knowledge, ultimately preparing for the examination's rigors. Only the Study Guide for the Psychiatry Board Examination offers support for the new, DSM-5® -- compatible examination, and that alone renders it essential.

Confronting Injustice without Compromising Truth Study Guide Thaddeus J. Williams 2022-06-28 God does not suggest, he commands that we do justice. Social justice is not optional for the Christian. All injustice affects others, so talking about justice that isn't social is like talking about water that isn't wet or a square with no right angles. But the Bible's call to seek justice is not a call to superficial, kneejerk activism. We are not merely commanded to execute justice, but to "truly execute justice." The God who commands us to seek justice is the same God who commands us to "test everything" and "hold fast to what is good." Drawing from a diverse range of theologians, sociologists, artists, and activists, Thaddeus Williams builds a case that we must be discerning if we are to "truly execute justice" as Scripture commands. Not everything called "social justice" today is compatible with a biblical vision of a better world. The Bible offers hopeful and distinctive answers to deep questions of worship, community, salvation, and knowledge that ought to mark a uniquely Christian pursuit of justice. In the Confronting Injustice without Compromising Truth Study Guide, Williams confronts our religious and political tribalism and challenges readers to discover what the Bible and the example of Jesus have to teach us about justice. He presents a compelling vision of justice for all God's image-bearers that offers hopeful answers to life's biggest questions.

The Well-Trained Mind: A Guide to Classical Education at Home (Fourth Edition) Susan Wise Bauer 2016-08-09 Is your child getting lost in the system, becoming bored, losing his or her natural eagerness to learn? If so, it may be time to take charge of your child's education—by doing it yourself. The Well-Trained Mind will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool through high school—one that will train him or her to read, to think, to understand, to be well-rounded and curious about learning. Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the trivium, which organizes learning around the maturing capacity of the child's mind and comprises three stages: the elementary school "grammar stage," when the building blocks of information are absorbed through memorization and rules; the middle school "logic stage," in which the student begins to think more analytically; and the high-school "rhetoric stage," where the student learns to write and speak with force and originality. Using this theory as your model, you'll be able to instruct your child—whether full-time or as a supplement to classroom education—in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Thousands of parents and teachers have already used the detailed book lists and methods described in The Well-Trained Mind to create a truly superior education for the children in their care. This extensively revised fourth edition contains completely updated curricula and book lists, links to an entirely new set of online resources, new material on teaching children with learning challenges, cutting-edge math and sciences recommendations, answers to common questions about home education, and advice on practical matters such as standardized testing, working with your local school board, designing a high-school program, preparing transcripts, and applying to colleges. You do have control over what and how your child learns. The Well-Trained Mind will give you the tools you'll need to teach your child with confidence and success.
