Radio Frequency and Microwave Electronics Illustrated Matthew M. Radmanesh 2001 Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples RF and microwave technology are essential throughout industry and to a world of new applications-in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. Whether you're seeking to strengthen your skills or enter the field for the first time, Radio Frequency and Microwave Electronics Illustrated is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh

uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes: A scientific framework for learning RF and microwaves easily and effectively Fundamental RF and microwave concepts and their applications The characterization of two-port networks at RF and microwaves using S-parameters Use of the Smith Chart to simplify analysis of complex design problems Key design considerations for microwave amplifiers: stability, gain, and noise Workable considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits RF and Microwave Integrated Circuits (MICs) Novel use of "live math" in circuit analysis and design Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. Radio Frequency and Microwave Electronics Illustrated includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. Lost and Found Sarah Jakes 2014-04-01 Don't let your past keep you from a full future. Like every girl, Sarah Jakes dreamed of a life full of love, laughter, and happy endings. But her dreams changed dramatically when she became pregnant at age thirteen, a reality only compounded by the fact that her father, Bishop T.D. Jakes, was one of the most influential megachurch pastors in the nation. As a teen mom and a high-profile preacher's kid, her road was lonely. She was shunned at school, gossiped about at church. And a few years later, when a fairy-tale marriage ended in a spiral of hurt and rejection, she could have let her pain dictate her future. Instead, she found herself surrounded by a God she'd given up on, crashing headlong with Him into a destiny she'd never dreamed of. Sarah's captivating story, unflinchingly honest and deeply vulnerable, is a vivid reminder that God can turn even the deepest pain into His perfection. More than a memoir, Lost and Found offers hope and encouragement. Perhaps you, like Sarah, find yourself wandering the detours of life. Regardless of how lost you feel, you, too, can be found.

Janey the Vet Janey Lowes 2020-03-19 'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to

the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work. Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.

Ming Tea Murder Laura Childs 2015-05-05 It's scones and scandal for Indigo Tea Shop owner Theodosia Browning in the latest from the New York Times bestselling author of *Steeped in Evil*... Normally Theodosia wouldn't attend a black tie affair for all the tea in China. But she can hardly say no to her hunky, handsome boyfriend, Max, who directs public relations for the Gibbes Museum in Charleston. Max has organized an amazing gala opening for an exhibit of a genuine eighteenth century Chinese teahouse, and the *crème de la crème* of Charleston society is invited. In the exotic garden staged in the museum's rotunda, a Chinese dragon dances to the beat of drums as it weaves through the crowd. The guests are serenaded by a Chinese violin as they sample an assortment of tempting bites. And to give them a memento of the occasion, there's even a photo booth. But Theodosia makes a grim discovery behind the booth's curtains: the body of museum donor Edgar Webster. While Theodosia prefers tea service over the service of justice, this case is difficult to ignore—especially after Max becomes a suspect. Now she must examine the life of the fallen philanthropist and find out who really wanted him to pay up... INCLUDES DELICIOUS RECIPES AND TEA TIME TIPS!

308 Circuits Jan Buiting 2003 This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

The Moment of Everything Shelly King 2014-09-02 In the tradition of *The Cookbook Collector* comes a funny, romantic novel about a young woman finding her calling while saving a used bookstore. Maggie Dupriv@s, recently "involuntarily separated from payroll" at a Silicon Valley startup, is whiling away her days in *The Dragonfly's Used Books*, a Mountain View institution, waiting for the Next Big Thing to come along. When the opportunity arises for her to network at a Bay Area book club, she jumps at the chance—even if it means having to read *Lady Chatterley's Lover*, a book she hasn't encountered since college, in an evening. But the edition she finds at the bookstore is no Penguin Classics *Chatterley*—it's an ancient hardcover with notes in the margins between two besotted lovers of long ago. What Maggie finds in her search for the lovers and their fate, and what she learns about herself in the process, will surprise and move

readers. Witty and sharp-eyed in its treatment of tech world excesses, but with real warmth at its core, *The Moment of Everything* is a wonderful read.

Kasher in the Rye Moshe Kasher 2012-03-28 Rising young comedian Moshe Kasher is lucky to be alive. He started using drugs when he was just 12. At that point, he had already been in psychoanalysis for 8 years. By the time he was 15, he had been in and out of several mental institutions, drifting from therapy to rehab to arrest to...you get the picture. But *KASHER IN THE RYE* is not an "eye opener" to the horrors of addiction. It's a hilarious memoir about the absurdity of it all. When he was a young boy, Kasher's mother took him on a vacation to the West Coast. Well it was more like an abduction. Only not officially. She stole them away from their father and they moved to Oakland, California. That's where the real fun begins, in the war zone of Oakland Public Schools. He was more than just out of control-his mother walked him around on a leash, which he chewed through and ran away. Those early years read like part Augusten Burroughs, part David Sedaris, with a touch of Jim Carrol...but a lot more Jewish. In fact, Kasher later spends time in a Brooklyn Hasidic community. Then came addiction... Brutally honest and laugh-out-loud funny, Kasher's first literary endeavor finds humor in even the most horrifying situations.
