Young, unmarried, with no resources to speak of, she's forced to flee home and hide out with her aunt on a ranch in a western mining town. She's just passing through on her way farther West, and it's a good thing, too: she can't stand the ranch owner. He's rowdy, immature...and undeniably attractive. And he finds out that life as a bachelor may not be what he likes after all. Contains mild language and sensual content within marriage.

Naturally Composed Marty Straub 2016-08-12 A look at why we are interested in what we see in art. Are we born with aesthetic preferences that are shaped by cultural influences? Is our natural attraction to Beauty another weapon in our arsenal of species' survival? This book examines many so-called rules of composition in the visual arts to find natural reasons for their existence. It is designed to aide the visual artist and those who appreciate their work by bringing attention to subtle cues of attraction cultivated by our ancient and immediate ancestors. It calls upon recent work in neuroaesthetics and other scientific disciplines to back up its speculative claims, and asks the reader to contribute opinions of their own on the books' website at naturallycomposed.com. There are many examples of photos in the book, and the reader is again asked to insert their own examples to enforce or refute the claims.

Back to Venice Michael Grant 2011-05-26 Imagine what it would be like to go back in time to the 15th century Venice. And imagine what it would be like to meet your lifelong hero, Michelangelo. And imagine what it would be like if, on first meeting, you spill a tray of pasta and wine on that very same hero. Well, that's what happens to serious young artist Mark Breen. As the result of a drunken bet, Mark knocks out a painting of a toilet bowl. Much to his amazement, he sells it. In short order he's hailed as the new Andy Warhol and becomes an overnight sensation-and a very wealthy man. Soon, images of his toilet bowls are on more t-shirts, mugs, and calendars than Edvard Munch's The Scream. His friend and mentor, Hugh Connelly, afraid that Mark is in danger of losing his "artistic soul," advises him to go back to Italy and reacquaint himself with the "old masters." In Venice, Mark falls in love with Alexandra, a beautiful art restorer, but it's a one-sided affair. One night, hoping to win her over, he climbs up on a roof to find out who painted her favorite fresco. He falls off the roof and wakes up in 15th century Venice where he meets an innkeeper named Francesca, who looks exactly like Alexandra. And it gets curiouser and curiouser from there. During his stay-which is sometimes zany and sometimes frightening-he meet his hero, Michelangelo, who teaches him the true meaning of art.

Essays and Aphorisms Arthur Schopenhauer 2014-10-22 Schopenhauer believed that human action is determined not by reason but by 'will' - the blind and irrational desire for physical existence. These writings depict individuals struggling in a Godless world, in which art, morality and self-awareness are our only salvation. They are a searing vision of the human condition.

Art and Concept Lucian Krukowski 1987 Addressing the important and timely question of what it is to know something as an artwork, this volume explores the relationship between works of art and the concepts, evaluations, descriptions, and explanations, that we use to account for them. Lucian Krukowski proposes that the origin, meaning, value, and even ending of an artwork can best be understood by examining the interplay between its "concrete and theoretic aspects": i.e., the thesis that what an artwork says or shows includes what is said or shown about it. In Krukowski's view, this relationship is highly volatile, with artworks achieving and relinquishing both status and value as their stylistic alliances with other works prosper or wane over time. Krukowski, a professional philosopher and a working painter, brings special insight to a number of key issues in this debate, focusing primarily on modern and avant-garde art. He discusses both the European and the American versions of abstract and nonobjective art through the Hegelian concept of historical progress and the Kantian concept of formal autonomy, and he examines Theodor Adorno's attempt to reconcile "radical form" and "social criticism" in the concept of twelve-tone music. He then explores a distinction between "art" and "non-art" by questioning whether there are things we "ought not" appreciate. The later chapters, responding to the writings of Joseph Margolis, Arthur Danto, and George Dickie, provide a comprehensive theory on the ontology of art.

The Art of Being Indispensable at Work Bruce Tulgan 2020-07-21 What's the secret to being indispensable--being a true go-to person--in today's workplace? With new technology, flatter organizations, far-flung virtual teams, and constant change, getting things done at work is tougher and more complex than ever. We're in the midst of a collaboration revolution--but sometimes it feels more like a meltdown. Managers and executives are trying harder than ever to keep up and stay effective, relying on cross-functional coordination, better planning and resource sharing, simplified processes, and speeded-up work. It's a herculean challenge, and people are struggling. Overcommitment grows and burnout looms. But even amid the seeming chaos of the matrix organization--where you are constantly being asked to do things by people who aren't your boss, and where you must ask things of others who don't report to you--there is always that special person who seems indispensable, who seems to thrive on complexity, and who is able to stay focused and positive and get the right things done: This is the go-to person. In this game-changing yet practical book, talent guru and bestselling author Bruce Tulgan reveals the secrets of the go-to person in our new world of work. Based on an intensive study of people at all levels, in all kinds of organizations, Tulgan shows how go-to people not only behave differently, but also think differently, basing their decisions and actions on their own personal influence rather than on any formal designation of authority. At the heart of the go-to person's unique credo are the basics of "the ask" and the response--a powerful reimagining of how to say yes and when to say no. Nearly a century ago, Dale Carnegie's classic How to Win Friends and Influence People propelled millions of readers up the ladder of success. Now, in a world of work where you truly need to interact with everybody, Tulgan provides the new must-read guidebook for achieving real influence and learning to thrive when the guardrails of traditional management are pulled away.

Small Ball Don Geidel 2016-09-11 September 11th, 2001 was America's wake up call to terrorism. Unfortunately, we hit the snooze alarm. The next wave of terror attacks won't be nation shaking, cataclysmic events. We're ready for that. Instead, they'll be minor, localized nightmares. Mere pinpricks to our country, but catastrophic to the small towns that find themselves in the crosshairs. Worst of all, there's nothing we can do to stop it from happening - or is there? A gritty novel extrapolated from real world events, this fast-paced, riveting thriller will leave you alarmed, angry, and awestruck at America's unpreparedness for the next wave of terror attacks. Some might refer to it as death by a thousand cuts, but the counterterrorism community calls it Small Ball. Small Ball is an indictment of our woefully wrongheaded security infrastructure and a testament to the resilience, resourcefulness, and integrity of the average American. You'll wonder why it hasn't happened already. Perhaps it's happening right now...

The Subtle Art of Not Giving a F*ck Mark Manson 2016-09-13 #1 New York Times Bestseller Over 10 million copies sold In this generation-defining self-help guide, a superstar blogger cuts through the crap to show us how to stop trying to be "positive" all the time so that we can truly become better, happier people. For decades, we've been told that positive thinking is the key to a happy, rich life. "F**k positivity," Mark Manson says. "Let's be honest, shit is f**ked and we have to live with it." In his wildly popular Internet blog, Manson doesn't sugarcoat or equivocate. He tells it like it is—a dose of raw, refreshing, honest truth that is sorely lacking today. The Subtle Art of Not Giving a F**k is his antidote to the coddling, let's-all-feel-good mindset that has infected American society and spoiled a generation, rewarding them with gold medals just for showing up. Manson makes the argument, backed both by academic research and well-timed poop jokes, that improving our lives hinges not on our ability to turn lemons into lemonade, but on learning to stomach lemons better. Human beings are flawed and limited—"not everybody can be extraordinary, there are winners and losers in society, and some of it is not fair or your fault." Manson advises us to get to know our limitations and accept them. Once we embrace our fears, faults, and uncertainties, once we stop running and avoiding and start confronting painful truths, we can begin to find the courage, perseverance, honesty, responsibility, curiosity, and forgiveness we seek. There are only so many things we can give a f**k about so we need to figure out which ones really matter, Manson makes clear. While money is nice, caring about what you do with your life is better, because true wealth is about experience. A much-needed grab-you-by-the-shoulders-and-look-you-in-the-eye moment of real-talk, filled with entertaining stories and profane, ruthless humor, The Subtle Art of Not Giving a F**k is a refreshing slap for a generation to help them lead contented, grounded lives.

In the bestselling How To Be Right, James provides a hilarious and invigorating guide to talking to people with unchallenged opinions. With chapters on every lightning-rod issue, James shows how people have been fooled into thinking the way they do, and in each case outlines the key questions to ask to reveal fallacies, inconsistencies and double standards. How Not To Be Wrong James O'Brien 2020-10-22 'Simply Brilliant' THE SECRET BARRISTER 'Passionate and brilliantly argued' DAVID OLUSOGA 'An admirably personal guide' MARINA HYDE 'Smart, analytical, self-aware and important' ALASTAIR CAMPBELL THE INTIMATE, REVEALING NEW BOOK FROM THE AUTHOR OF THE BESTSELLING, PRIZE-WINNING HOW TO BE RIGHT There's no point having a mind if you're not willing to change it James O'Brien has built well over a million loyal listeners to his radio show by dissecting the opinions of callers live on air, every day. But winning the argument

doesn't necessarily mean you're right. In this deeply personal book, James turns the mirror on himself to reveal what he has changed his mind about and why, and explores how examining and changing our own views is our new civic duty in a world of outrage, disagreement and echo chambers. He writes candidly about the stiff upper lip attitudes and toxic masculinity that coloured his childhood, and the therapy and personal growth that have led him question his assumptions and explore new perspectives. Laying open his personal views on everything from racial prejudice to emotional vulnerability, from fat-shaming to tattoos, he then delves into the real reasons -- often irrational or unconscious -- he holds them. Unflinchingly honest, revealing and funny, *How Not to Be Wrong* is a tonic for a world more divided than ever and a personal manifesto for a better way of thinking and living. Because after all, if we can't change our own minds we'll never really be able to change anyone else's.

The Art Of Effective Giving R. M. Lala 2011-12-13 Philanthropy, is becoming a huge enterprise, with wealthy businessmen setting aside fortunes for worthy cause. Their targets are ambitious: no less than the removal of disease, disparity and deprivation on a vast scale that even governments may not be able to tackle. Thus, Bill Gates is striving to eradicate AIDS and Azim Premji is donating billions towards improving primary school education. And the Tatas have been running a host of institutions that have made a positive difference in the lives of thousands over the decades. In *The Art of Effective Giving*, R.M. Lala, director of the Sir Dorabji Tata Trust for eighteen years, shows how the choice to give enriched the lives of leading businessmen who practised philanthropy with the same passion that they showed as entrepreneurs. These pacesetters can serve as examples for us to follow in our own small ways. For compassion is greater than wealth, and learning to care is all that is necessary to make a difference. *The Art of Effective Giving* is about spreading the circle of people willing to reach out to others - for the sheer joy of giving.

The Art of Thinking Clearly Rolf Dobelli 2014-05-06 A world-class thinker counts the 100 ways in which humans behave irrationally, showing us what we can do to recognize and minimize these "thinking errors" to make better decisions and have a better life. Despite the best of intentions, humans are notoriously bad—that is, irrational—when it comes to making decisions and assessing risks and tradeoffs. Psychologists and neuroscientists refer to these distinctly human foibles, biases, and thinking traps as "cognitive errors." Cognitive errors are systematic deviations from rationality, from optimized, logical, rational thinking and behavior. We make these errors all the time, in all sorts of situations, for problems big and small: whether to choose the apple or the cupcake; whether to keep retirement funds in the stock market when the Dow tanks, or whether to take the advice of a friend over a stranger. The "behavioral turn" in neuroscience and economics in the past twenty years has increased our understanding of how we think and how we make decisions. It shows how systematic errors mar our thinking and under which conditions our thought processes work best and worst. Evolutionary psychology delivers convincing theories about why our thinking is, in fact, marred. The neurosciences can pinpoint with increasing precision what exactly happens when we think clearly and when we don't. Drawing on this wide body of research, *The Art of Thinking Clearly* is an entertaining presentation of these known systematic thinking errors--offering guidance and insight into everything why you shouldn't accept a free drink to why you SHOULD walk out of a movie you don't like it to why it's so hard to predict the future to why shouldn't watch the news. The book is organized into 100 short chapters, each covering a single cognitive error, bias, or heuristic. Examples of these concepts include: Reciprocity, Confirmation Bias, The It-Gets-Better-Before-It-Gets-Worse Trap, and the Man-With-A-Hammer Tendency. In engaging prose and with real-world examples and anecdotes, *The Art of Thinking Clearly* helps solve the puzzle of human reasoning.

The Duh! Book of Management and Supervision Gerri King 2014-02-25 Managerial styles are influenced by habit, familiarity, and workplace culture. It's no wonder that well-intentioned professionals doing their best to be good organizational leaders often repeat unhelpful supervisory practices experienced in their early careers, even if they disliked them at the time. In the DUH! Book of Management and Supervision, the author disagrees with many accepted leadership principles (unabashedly referring to them as myths) and makes new and different approaches easier to imagine. Her challenging and controversial concepts illustrated with poignant stories suggest common-sense and immediately applicable alternatives more suitable in today's workplace.

The Art of Neighboring Jay Pathak 2012-08-01 Once upon a time, people knew their neighbors. They talked to them, had cook-outs with them, and went to church with them. In our time of unprecedented mobility and increasing isolationism, it's hard to make lasting connections with those who live right outside our front door. We have hundreds of "friends" through online social networking, but we often don't even know the full name of the person who lives right next door. This unique and inspiring book asks the question: What is the most loving thing I can do for the people who live on my street or in my apartment building? Through compelling true stories of lives impacted, the authors show readers how to create genuine friendships with the people who live in closest proximity to them. Discussion questions at the end of each chapter make this book perfect for small groups or individual study.

Tiger Hunting Stories K. Pradeep Chandra 2019-05-15 'An IAS officer's must-read anecdotal account of how official karma prevails over personal dharma.' - Y.V. Reddy, former RBI governor India is famous for Jim Corbett's tales of hunting man-eaters in the Kumaon region. Equally fascinating are the tiger hunting tales that senior bureaucrats recount, of achievements real and imagined, when they look back on their career. K. Pradeep Chandra has many stories of this kind to tell, and for those interested in the IAS, they are of immense use. From a career that spanned thirty-four years, there are examples of fighting corruption, ignorance and casteism. There are also problems that defy solution - an old woman whose insistence on division of land results in a tragedy, an attempt to find an acceptable solution to ownership of shifting lanka (island) lands in Rajahmundry. And there is a taut chapter on a prolonged negotiation with naxalites when lives of fellow officers are at stake; a lesson that a course book may not offer. Pradeep Chandra also shares about the challenges of working with powerful politicians like N.T. Rama Rao, Chandrababu Naidu and K. Chandrasekhar Rao. At the beginning of his career, his father had told him, 'If you can make a concrete difference in the lives of 100 poor people, you would have some meaning in your life.' As the author discovered, this was perhaps the hardest thing to accomplish, and what gave his work the truest value.
