Corporate Vulnerabilities in India and Banks' Loan Performance Peter Lindner 2014-12-19 The financial performance of India's corporate sector has been under pressure since the Global Financial Crisis. Balance-sheet data on a large cross-section of Indian non-financial corporates show that the growth in their leverage over the last 15 years has been associated with a notable increase in the vulnerabilities of firms carrying high interest payment burdens. Gauged by the debt carried by the most vulnerable component of firms, the Indian corporate sector's vulnerability to severe systemic shocks has increased to levels not seen since 2001. Progress on the macroeconomic front, together with improved credit appraisals and stricter impairment standards on the bank side, will be critical to help India's banks resume their role as economic growth drivers.

Environmental Sociology John Hannigan 2014-03-26 The third edition of John Hannigan's classic undergraduate text has been fully updated and revised to highlight contemporary trends and controversies within global environmental sociology.

Environmental Sociology offers a distinctive, balanced treatment of environmental issues, reconciling Hannigan's much-cited model of the social construction of environmental problems and controversies with an environmental justice perspective that stresses inequality and toxic threats to local communities.

Innovations in Concrete David Bennett 2002 A summary on developments in construction, design and the innovation in concrete technology. It describes a number of building studies where speed of construction, cost savings and early completion were a priority, and it highlights the outcome of some pioneering research on concrete technology.

Agricultural and Rural Reconstruction Jayant Patil 1996 Chiefly covers Maharashtra, India, as a case study.

Reducing Inequalities Rémi Genevey 2013-01-01 The reduction of inequalities within and between countries stands as a policy goal, and deserves to take centre stage in the design of the Sustainable Development Goals agreed during the Rio+20 Summit in 2012. The 2013 edition of *A Planet for Life* represents a unique international initiative grounded on conceptual and strategic thinking, and "most importantly" empirical experiments, conducted on five continents and touching on multiple realities. This unprecedented collection of works proposes a solid empirical approach, rather than an ideological one, to inform future debate. The case studies collected in this volume demonstrate the complexity of the new systems required to accommodate each country's specific economic, political and cultural realities. These systems combine technical, financial, legal, fiscal and organizational elements with a great deal of applied expertise, and are articulated within a clear, well-understood, growth- and job-generating development strategy. Inequality reduction does not occur by decree; neither does it automatically arise through economic growth, nor through policies that equalize incomes downward via ill conceived fiscal policies. Inequality reduction involves a collaborative effort that must motivate all concerned parties, one that constitutes a genuine political and social innovation, and one that often runs counter to prevailing political and economic forces.

Goa Indica Arun Sinha 2002 This Book Suggests That Goa Is Destined To Become A Multicultural Cosmopolitan State, Not Depending On Agriculture And Heavy Industry, But On Horticulture And Service Industry.

Countries. Without Dustcover, Text Clean, Condition Good.

Corporate Social Responsibility in Asia Kyoko Fukukawa 2009-10-29 Corporate Social Responsibility (CSR) is an important issue in contemporary business, management and politics, especially since the launch of the United Nations Global Compact in 2000 as an initiative to encourage businesses worldwide to adopt sustainable and socially responsible policies, and to report on them. This book examines the theory and practice of CSR in Asia. The philosophical and ideological underpinnings of CSR are rooted in Anglo-American and European principles of liberal democratic rights, justice and societal structures. This book not only considers the impact of Western CSR practices in Asia, but also provides much needed Asian perspectives on this issue. It investigates the operation of CSR in different countries across Asia, including China, Japan, Malaysia, Thailand and Bangladesh – comparing the different meanings given to CSR, and the varying degrees of success experienced in different national contexts. This book argues if CSR is ever to revolutionize the manner in which we trade then it is needs to open itself up to the full variety of social responsibility as it occurs around the world. The book re-maps and refines debates about CSR as a global phenomenon, and will be of great value to professionals making strategic decisions in the global business environment.

Assistant Statistician Jack Rudman 1994-06 The Assistant Statistician Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to: basic statistics including data collection; arithmetic computation and reasoning; understanding and interpreting tabular material; understanding and interpreting written material; preparing written material; and more

Socio-economics of Personalized Medicine in Asia Shirley Sun 2016-07-01 The second decade of the twenty-first century has witnessed a surging interest in personalized medicine with the concomitant promise to enable more precise diagnosis and treatment of disease and illness, based upon an individual's unique genetic makeup. In this book, my goal is to contribute to a growing body of literature on personalized medicine by tracing and analyzing how this field has blossomed in Asia. In so doing, I aim to illustrate how various social and economic forces shape the co-production of science and social order in global contexts. This book shows that there are inextricable transnational linkages between developing and developed countries and also provides a theoretically guided and empirically grounded understanding of the formation and usage of particular racial and ethnic human taxonomies in local, national and transnational settings.

Television and Social Change in Rural India Kirk Johnson 2000-03-14 This text examines the role played by television in the social environment of village life in India. The author delves into the lives of villagers and looks at the impact of television on their aspirations, values, ideas, relationships and traditions.

The Ethnic Encounter in the Secondary School Brian Milton Bullivant 1987

Women's Education and Fertility Behaviour United Nations. Department of Economic and Social Information and Policy Analysis 1993

U.S. Health in International Perspective National Research Council 2013-04-12 The United States is among the wealthiest nations in the world, but it is far from the healthiest. Although life expectancy and survival rates in the United States have improved dramatically over the past century, Americans live shorter lives and experience more injuries and illnesses than people in other high-income countries. The U.S. health disadvantage cannot be attributed solely to the adverse health status of racial or ethnic minorities or poor people: even highly advantaged Americans are in worse health than their counterparts in other, "peer"

countries. In light of the new and growing evidence about the U.S. health disadvantage, the National Institutes of Health asked the National Research Council (NRC) and the Institute of Medicine (IOM) to convene a panel of experts to study the issue. The Panel on Understanding Cross-National Health Differences Among High-Income Countries examined whether the U.S. health disadvantage exists across the life span, considered potential explanations, and assessed the larger implications of the findings. U.S. Health in International Perspective presents detailed evidence on the issue, explores the possible explanations for the shorter and less healthy lives of Americans than those of people in comparable countries, and recommends actions by both government and nongovernment agencies and organizations to address the U.S. health disadvantage.

Population and Society Clare Holdsworth 2013-02-01 "An excellent introduction to the study of population and its significance for many of the key social, political, cultural and environmental issues facing the world today. It covers population growth, ageing, migration and mobility, parenting, health inequalities, and much more... The authors do not shy away from areas of continuing debate, providing both sides of an argument and encouraging readers to follow up the original sources" - Tony Champion, Emeritus Professor of Population Geography, Centre for Urban, Regional & Development Studies, Newcastle University and Vice President, British Society for Population Studies, 2011-2013 Population and Society is an undergraduate introduction to population that explains the latest trends in population studies. The text provides a detailed and completely accessible overview that: situates demographic events - fertility, mortality and migration - within the context of broader social impacts and theorisations like social inequalities, individualisation and life course analysis uses global illustrative examples to demonstrate the importance of data and data interpretation in population studies is illustrated throughout with pedagogic features, like chapter opening summaries, suggestions for further readings and case study examples. This text will be widely used as the standard and most up-to-date text on population and society for courses across the social sciences.

Knowledge-building Karl Maton 2015-10-08 Education and knowledge have never been more important to society, yet research is segmented by approach, methodology or topic. Legitimation Code Theory or 'LCT' extends and integrates insights from Pierre Bourdieu and Basil Bernstein to offer a framework for research and practice that overcomes segmentalism. This book shows how LCT can be used to build knowledge about education and society. Comprising original papers by an international and multidisciplinary group of scholars, Knowledge-building offers the first primer in this fast-growing approach. Through case studies of major research projects, Part I provides practical insights into how LCT can be used to build knowledge by: - enabling dialogue between theory and data in qualitative research - bringing together quantitative and qualitative methodologies in mixed-methods research - relating theory and practice in praxis - conducting interdisciplinary studies with systemic functional linguistics Part II offers a series of studies of pressing issues facing knowledge-building in education and beyond, encompassing: - diverse subject areas, including physics, English, cultural studies, music, and design - educational sites: schooling, vocational education, and higher education - practices of research, curriculum, pedagogy and assessment - both education and informal learning contexts, such as museums and masonic lodges Carefully sequenced and interrelated, these chapters form a coherent collection that

gives a unique insight into one of the most thought-provoking and innovative ways of building knowledge about knowledge-building in education and society to have emerged this century. This book is essential reading for all serious students and scholars of education, sociology and linguistics.

The Social Determinants of Mental Health Michael T. Compton 2015-04-01 The Social Determinants of Mental Health aims to fill the gap that exists in the psychiatric, scholarly, and policy-related literature on the social determinants of mental health: those factors stemming from where we learn, play, live, work, and age that impact our overall mental health and well-being. The editors and an impressive roster of chapter authors from diverse scholarly backgrounds provide detailed information on topics such as discrimination and social exclusion; adverse early life experiences; poor education; unemployment, underemployment, and job insecurity; income inequality, poverty, and neighborhood deprivation; food insecurity; poor housing quality and housing instability; adverse features of the built environment; and poor access to mental health care. This thought-provoking book offers many beneficial features for clinicians and public health professionals: Clinical vignettes are included, designed to make the content accessible to readers who are primarily clinicians and also to demonstrate the practical, individual-level applicability of the subject matter for those who typically work at the public health, population, and/or policy level. Policy implications are discussed throughout, designed to make the content accessible to readers who work primarily at the public health or population level and also to demonstrate the policy relevance of the subject matter for those who typically work at the clinical level. All chapters include five to six key points that focus on the most important content, helping to both prepare the reader with a brief overview of the chapter's main points and reinforce the "take-away" messages afterward. In addition to the main body of the book, which focuses on selected individual social determinants of mental health, the volume includes an in-depth overview that summarizes the editors' and their colleagues' conceptualization, as well as a final chapter coauthored by Dr. David Satcher, 16th Surgeon General of the United States, that serves as a "Call to Action," offering specific actions that can be taken by both clinicians and policymakers to address the social determinants of mental health. The editors have succeeded in the difficult task of balancing the individual/clinical/patient perspective and the population/public health/community point of view, while underscoring the need for both groups to work in a unified way to address the inequities in twenty-first century America. The Social Determinants of Mental Health gives readers the tools to understand and act to improve mental health and reduce risk for mental illnesses for individuals and communities. Students preparing for the Medical College Admission Test (MCAT) will also benefit from this book, as the MCAT in 2015 will test applicants' knowledge of social determinants of health. The social determinants of mental health are not distinct from the social determinants of physical health, although they deserve special emphasis given the prevalence and burden of poor mental health.

The Digital Divide Massimo Ragnedda 2013-06-19 This book provides an in-depth comparative analysis of inequality and the stratification of the digital sphere. Grounded in classical sociological theories of inequality, as well as empirical evidence, this book defines 'the digital divide' as the unequal access and utility of internet communications technologies and explores how it

has the potential to replicate existing social inequalities, as well as create new forms of stratification. The Digital Divide examines how various demographic and socio-economic factors including income, education, age and gender, as well as infrastructure, products and services affect how the internet is used and accessed. Comprised of six parts, the first section examines theories of the digital divide, and then looks in turn at: Highly developed nations and regions (including the USA, the EU and Japan); Emerging large powers (Brazil, China, India, Russia); Eastern European countries (Estonia, Romania, Serbia); Arab and Middle Eastern nations (Egypt, Iran, Israel); Under-studied areas (East and Central Asia, Latin America, and sub-Saharan Africa). Providing an interwoven analysis of the international inequalities in internet usage and access, this important work offers a comprehensive approach to studying the digital divide around the globe. It is an important resource for academic and students in sociology, social policy, communication studies, media studies and all those interested in the questions and issues around social inequality.

Reworking Race Moon-Kie Jung 2006 25 Documents and Speeches Every American Should Own.

Dr. Babasaheb Ambedkar, Writings and Speeches: The Buddha and his Dhamma Bhimrao Ramji Ambedkar 1992

Interactive Evaluation Practice Jean A. King 2012-04-12 You've taken your introduction to evaluation course and are about to do your first evaluation project. Where do you begin? Interactive Evaluation Practice: Managing the Interpersonal Dynamics of Program Evaluation helps bridge the gap between the theory of evaluation and its practice, giving students the specific skills they need to use in different evaluation settings. Jean A. King and Laurie Stevahn present readers with three organizing frameworks (derived from social interdependence theory from social psychology, evaluation use research, and the evaluation capacity building literature) for thinking about evaluation practice. These frameworks help readers track the various skills or strategies to use for distinctive evaluation situations. In addition, the authors provide explicit advice about how to solve specific evaluation problems. Numerous examples throughout the text bring interactive practice to life in a variety of settings.

UGC NET Physical Education Arihant Experts 2019-11-29 University Grants Commission National Eligibility Test (UGC NET) is a national level test which is held twice in a year by Central Board of Secondary Education (CBSE) on behalf of UGC. This test is for Junior Research fellowship (JRF) and Assistant Professor or for both in Indian Colleges & Universities. Parents and Teachers Carol Vincent 1996 This work examines the factors that shape and influence home-school relations. At its heart is an analysis of parent-teacher relationships in an inner city borough, drawn from case studies of five primary schools and a parents' centre. Interviews with parents are revealing windows into parents' views on a range of issues, including curriculum, discipline and parents' relationships with their children's teachers.; The author also considers teachers' perspectives on these matters, and explores the influence of social class, ethnicity and gender on parent-teacher interactions. While presenting these issues within a consideration of broader themes such as citizenship, community, power and participation, the book discusses the reasons why initiatives designed to improve home- school relations appear to result in such limited change.

Protest In Democratic India Leslie J Calman 1985-11-20

The Virtue of Prosperity Dinesh D'Souza 2000 The author focuses his attention on the new economy to search for morality in the midst of unprecedented prosperity.

Two Faces of Protest Amrita Basu 1992-01-01 Drawing on case studies of the Communist Party of India in West Bengal and Shramik Sangathana in Maharashtra, this work examines Indian women's political activism. Investigating institutional changes at the state level and protest at the village level, Amrita Basu traces the paths of two kinds of political activism among these women. With insights gleaned from extensive interviews with activists, government officials, and ordinary men and women, she finds that militancy has been fueled by pronounced sexual class cleavages combined with potentially rancorous ethnic division.
