Decolonial Voices Arturo J. Aldama 2002 The interdisciplinary essays in *Decolonial Voices* discuss racialized, subaltern, feminist, and diasporic identities and the aesthetic politics of hybrid and mestiza/o cultural productions. This collection represents several key directions in the field: First, it charts how subaltern cultural productions of the US/ Mexico borderlands speak to the intersections of "local," "hemispheric," and "globalized" power relations of the border imaginary. Second, it recovers the Mexican women's and Chicana literary and cultural heritages that have been ignored by Euro-American canons and patriarchal exclusionary practices. It also expands the field in postnationalist directions by creating an interethnic, comparative, and transnational dialogue between Chicana and Chicano, African American, Mexican feminist, and U.S. Native American cultural vocabularies. Contributors include Norma Alarcón, Arturo J. Aldama, Frederick Luis Aldama, Cordelia Chávez Candelaria, Alejandra Elenes, Ramón García, María Herrera-Sobek, Patricia Penn Hilden, Gaye T. M. Johnson, Alberto Ledesma, Pancho McFarland, Amelia María de la Luz Montes, Laura Elisa Pérez, Naomi Quiñonez, Sarah Ramirez, Rolando J. Romero, Delberto Darío Ruiz, Vicki Ruiz, José David Saldívar, Anna Sandoval, and Jonathan Xavier Inda.

Ordinary Violence Mary White Stewart 2002 Presents a cross-cultural analysis of violence against women that is a socio-political-cultural pandemic phenomenon that can only be addressed through major changes in the economic system and cultural values of this and other societies.

The Faro Convention's role in a changing society Francesc Pla 2022-01-05 Council of Europe action in the field of cultural heritage targets promoting diversity and dialogue through access to heritage to foster a sense of identity, collective memory and mutual understanding within and between communities. The year 2021 marks the 10th anniversary of the entry into force of the Framework Convention on the Value of Cultural Heritage for Society, also known as the Faro Convention. The present publication shows that what emerged back in 2005 as a truly innovative approach is still relevant today and can also have an impact on issues beyond its traditional realm. This is illustrated through a set of articles that demonstrate the pertinence of the Faro Convention's approach to cultural heritage in addressing different aspects, ranging from democratic participation to tourism rethinking. The wide range of topics addressed and the numerous possibilities described by the various contributors suggest that the next ten years of the Faro Convention will be as challenging and rewarding as the decade that has elapsed since its entry into force.

Gendered Worlds Judy Root Aulette 2009 In *Gendered Worlds*, the authors use the sociological imagination to explore gender relations throughout the world. They look at how concrete forms of gender, race, class, and sexual inequality operate transnationally; examine the impact of globalization on local and everyday life experiences; and identify how local actors re-imagine social possibilities, resist injustice, and work toward change. Integrating theory with empirical studies that are of particular interest to college students—including research on violence, sports, and sexuality—the authors make gender concepts genuinely interesting and accessible. They also demonstrate how students can think critically about gender, both within and beyond the classroom. Each chapter begins with an opening scenario about an individual experience of gender, and then traces how macro-level factors shape that micro experience. A section entitled "Gender Matters" follows each chapter to summarize the micro-macro connection.

The Routledge Handbook of Census Resources, Methods and Applications John Stillwell 2017-08-24 The collection of reliable and comprehensive data on the magnitude, composition and distribution of a country's population is essential in order for governments to provide services, administer effectively and guide a country's development. The primary source of basic demographic statistics is frequently a population census, which provides hugely important data sets for policy makers, practitioners and researchers working in a wide range of different socio-demographic contexts. The *Routledge Handbook of Census Resources, Methods and Applications* provides a comprehensive and authoritative guide to the collection, processing, quality assessment and delivery of the different data products that constitute the results of the population censuses conducted across the United Kingdom in 2011. It provides those interested in using census data with an introduction to the collection, processing and quality assessment of the 2011 Census, together with guidance on the various types of data resources that are available and how they can be accessed. It demonstrates how new methods and technologies, such as interactive infographics and web-based mapping, are now being used to visualise census data in new and exciting ways. Perhaps most importantly, it presents a collection of applications of census data in different social and health science research contexts that reveal key messages about the characteristics of the UK population and the ways in which society is changing. The operation of the 2011 Census and the use of its results are set in the context of census-taking around the world and its historical development in the UK over the last 200 years. The results of the UK 2011 Census are a unique and reliable source of detailed information that are immensely important for users from a wide range of public and private sector organisations, as well as those working in Population Studies, Human Geography, Migration Studies and the Social Sciences more generally.

Strangers in New Homelands Lewis Asimeng-Boahene 2013-02-21 *Strangers in New Homelands* is a collection of papers emanating from Annual International Conferences on the Social Reconstruction of the concept of "home" among immigrants in the diaspora. For many immigrants in the diaspora, the concept of "home", around which this conference has revolved, evokes confusion, fear, hopes, and aspirations. The presentations in this book therefore seek to throw light on what this concept means for many people who have uprooted themselves from their familiar environments and settled or seek to make new homes out of strange and unfamiliar environments. The contributors in this publication were drawn from the field of researchers on immigrant and refugee movements and settlements, education, community development and front-line immigrant and refugee settlement workers. They draw on experiences from their research, field practice vignettes, personal experiences and case work examples to highlight and explore the critical issues involved in the field of forced and voluntary migration and resettlement around the world, and the settlement of migrants and refugees in new societies. Cumulatively, the contributors examine the challenges of settlement, integration and adaptation that new comers face in host societies. The critical approaches and strong balance of research with applications show the implications

of the issues for the profession of social work and allied fields. The scholarship presented here also highlights the implications of the issues discussed for further research and social policy development. Anyone interested in learning about the challenges and intricacies of the migration process around the world must read this book. It is highly recommended for politicians, policy makers, social work professionals, educators and organizations dealing with immigrants and refugees. The Politics of Identity in Latin American Censuses Luis F. Angosto-Ferrández 2017-10-02 The Politics of Identity in Latin American Censuses contributes new and original perspectives to existing discussions about the shaping of multiculturalist ideology in Latin America, its interweaving with the cultural politics of neoliberalism and the relation between ethnic identification resurgence and economic globalization. Scrutinising national censuses across the continent, the studies included in this volume reveal clear relationships between censuses, nation-building and government projects, but also strong and determinant connections between domestic and supra-national spheres. The contributors to this volume open provocative avenues of research on Latin American societies by demonstrating how, in the realm of identity politics, supra-national institutions and normativity socialise national census bureaus in a way that largely annuls ideological differences between regional governments. This book was originally published as a special issue of the Journal of Iberian and Latin American Research.

Sociology David M. Newman 2016-08-02 Adapted from David M. Newman's best-selling Sociology: Exploring the Architecture of Everyday Life, this briefer, streamlined version continues to show students how to see the "unfamiliar in the familiar," inspiring them to think critically about their own lives and social contexts. As in the full text, the author's approachable writing style and lively personal anecdotes make the Brief Edition a text that "reads like a real book." It uses the metaphors of "architecture" and "construction" to help students understand that society is not something that exists "out there," independently of themselves; it is a human creation that is planned, formed, maintained, or altered by individuals. Rather than surveying every subfield in sociology, the Brief Edition focuses on the individual and society, the construction of self and society, and social inequality in the context of social structures.

In Conflict and Order D. Stanley Eitzen 2004 Broadly viewing the global economy as a political competition that produces winners and losers, "International Political Economy" holistically and accessibly introduces the field of IPE to readers with limited background in political theory, history, and economics. This book surveys major interests and institutions and examines how state and non-state actors pursue wealth and power. Emphasizing fundamental economic concepts as well as the interplay between domestic and international politics, "International Political Economy" not only explains how the global economy works; it also encourages readers to think critically about how economic policy is made in the context of globalization.

Horizontal Inequalities and Conflict F. Stewart 2016-01-22 Drawing on econometric evidence and in-depth studies of West Africa, Latin America and Southeast Asia, this book explores how horizontal inequalities - ethnic, religious or racial - are a source of violent conflict and how political, economic and cultural status inequalities have contributed. Policies to reverse inequality would reduce these risks.

Sociology of Sport George Harvey Sage 2022-10 "Now in its twelfth edition, Sociology of Sport offers a compact yet comprehensive and integrated perspective on sport in North American society. Bringing a unique viewpoint to the subject, George H. Sage, D. Stanley Eitzen, Becky Beal, and Matthew Atencio analyze and, in turn, demythologize sport. This method promotes an understanding of how a sociological perspective differs from commonsense perceptions about sport and society, helping students to understand sport in a new way"--

Principles and Recommendations for Population and Housing Censuses, Revision 3 United Nations Department of Economic and Social Affairs 2017-11-01 Since its early years, the United Nations has issued a series of international recommendations on population and housing censuses under the title "Principles and Recommendations for Population and Housing Censuses". These publication series, which are based on good national practices in census taking, are widely used by national statistical offices and census officials in countries throughout the world in planning and carrying out population and housing censuses, as well as other related data collection activities, particularly demographic and socio-economic surveys. The recommendations provide guidance on the main characteristics of population and housing censuses, general material on census methodology, planning, and operations, and more detailed guidance on the content of censuses, in terms of topics for population and also housing. These series are currently revised to assist countries in preparing for the 2020 round of censuses by taking into account changes in methodology, technology, as well as the need for better data dissemination and utilization.

Recognizing Race and Ethnicity Kathleen J. Fitzgerald 2018-05-15 Despite promising changes over the last century, race remains a central organizing principle in US society, a key arena of inequality, power, and privilege, and the subject of ongoing conflict and debate. In this second edition of Recognizing Race and Ethnicity, Kathleen J. Fitzgerald continues to examine the sociology of race and encourages students to think differently by challenging the notion that we are, or should even aspire to be, color-blind. Fitzgerald considers how race manifests in both significant and obscure ways by looking across all racial/ethnic groups within the socio-historical context of institutions and arenas, rather than discussing each group by group. Incorporating recent research and contemporary theoretical perspectives, she guides students to examine racial ideologies and identities as well as structural racism; at the same time, she covers topics like popular culture, sports, and interracial relationships. This latest edition includes an expanded look at global perspectives on racial inequality, including international migration and Islamophobia; updated examples of contemporary issues, including the Black Lives Matter movement; more emphasis on intersectionality, specifically the ways sexuality and race intersect; and an extended discussion on why the sociology of race and the sociological imagination matter. Recognizing Race and Ethnicity continues to reflect the latest sociological research on race/ethnicity and provides unparalleled coverage of white privilege while remaining careful not to treat "white" as the norm against which all other groups are defined.

The Future of the Public's Health in the 21st Century Institute of Medicine 2003-02-01 The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. The Future of the Public's Health in the 21st Century reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.

Conflict and Compromise in Multilingual Societies Kenneth Douglas McRae 1999 Conflict and Compromise, Volume 3: Finland examines historical and developmental patterns during the Swedish, Russian and post-independence periods of Finland's history. McRae outlines Finland's changing social structures, showing how the language groups have evolved within these structures in the twentieth century. He compares how Finnish-speaking and Swedish-speaking citizens perceive themselves and other language groups, as well as the similarities and differences in their views on political and social issues. Further, the book describes in detail the constitutional and institutional arrangements for languages in Finland's political and administrative system, as well as in education and the mass media.

Everyday Ethnicity in Sri Lanka Daniel Bass 2013 Focusing on notions of diaspora, identity and agency, this book examines ethnicity in war-torn Sri Lanka. It highlights the historical development and negotiation of a new identification of Up-country Tamil amidst Sri Lanka's violent ethnic politics. Over the past thirty years, Up-country (Indian) Tamils generally have tried to secure their vision of living within a multi-ethnic Sri Lanka, not within Tamil Eelam, the separatist dream that

ended with the civil war in 2009. Exploring Sri Lanka within the deep history of colonial-era South Asian plantation diasporas, the book argues Up-country Tamils form a "diaspora next-door" to their ancestral homeland. It moves beyond simplistic Sinhala-Tamil binaries and shows how Sri Lanka's ethnic troubles actually have more in common with similar battles that diasporic Indians have faced in Fiji and Trinidad than with Hindu-Muslim communalism in neighbouring India, Pakistan and Bangladesh. Shedding new light on issues of agency, citizenship, displacement and re-placement within the formation of diasporic communities and identities, this book demonstrates the ways that culture workers, including politicians, trade union leaders, academics and NGO workers, have facilitated the development of a new identity as Up-country Tamil. It is of interest to academics working in the fields of modern South Asia, diaspora, violence, post-conflict nations, religion and ethnicity.

Sociology of North American Sport D. Stanley Eitzen 2009 The book that set the standard for sports textbooks has been extensively revised and updated for its new eighth edition. Among the many new topical additions are elite child athletics, gambling in college sports, performance enhancement drugs, sport and nationalism after 9/11, the Beijing Olympics, Nike and other corporations, the power of media in sport, and more on minorities and on disabilities in sport.

Recognizing Race and Ethnicity Kathleen J. Fitzgerald 2020-06-26 This best-selling textbook explains the current state of research in the sociology of race/ethnicity, emphasizing white privilege, the social construction of race, and the newest theoretical perspectives for understanding race and ethnicity. It is designed to engage students with an emphasis on topics that are meaningful to their lives, including sports, popular culture, interracial relationships, and biracial/multiracial identities and families. The new third edition comes at a pivotal time in the politics of race and identity. Fitzgerald includes vital new discussions on white ethnicities and the politics of Trump and populism. Prominent attention is given to immigration and the discourse surrounding it, police and minority populations, and the criminal justice system. Using the latest available data, the author examines the present and future of generational change. New cases studies include athletes and racial justice activism, removal of Confederate monuments, updates on Black Lives Matter, and Native American activism at Standing Rock and against the Bayou Bridge pipeline.

Crisis, Conflict, and Consensus William J. Murray 1984 Passing reference to Aborigines at first settlement; documents on Black War in Tasmania, Myall Creek massacre , Aborigines Friends Association, Kanaka labour, Aboriginal rights movements, Gurindji and Vestey's at Wave Hill; attitudes toward Aborigines, particularly Queensland and Moree; land rights situation in 1982.

The Untouchables Oliver Mendelsohn 1998-04-30 In a sensitive and compelling account of the lives of those at the very bottom of Indian society, Oliver Mendelsohn and Marika Vicziany explore the construction of the Untouchables as a social and political category, the historical background which led to such a definition, and their position in India today. The authors argue that, despite efforts to ameliorate their condition on the part of the state, a considerable edifice of discrimination persists on the basis of a tradition of ritual subordination. Even now, therefore, it still makes sense to categorise these people as 'Untouchables'. The book promises to make a major contribution to the social and economic debates on poverty, while its wide-ranging perspectives will ensure an interdisciplinary readership from historians of South Asia, to students of politics, economics, religion and sociology.

Principles and Recommendations for Population and Housing Censuses United Nations. Statistical Division 2008 The population and housing census is part of an integrated national statistical system, which may include other censuses (for example, agriculture), surveys, registers and administrative files. It provides, at regular intervals, the benchmark for population count at national and local levels. For small geographical areas or sub-populations, it may represent the only source of information for certain social, demographic and economic characteristics. For many countries the census also provides a solid framework to develop sampling frames. This publication represents one of the pillars for data collection on the number and characteristics of the population of a country.

Sociology for the Twenty-first Century Timothy Jon Curry 2002 This volume introduces readers to sociology using an eclectic approach that is tied together by systematically highlighting two aspects of social change—1) the change or contrast between social life organized around personal, communal relations and social life organized around impersonal, associational relations; and 2) the ongoing social processes and the implications they have for life in the twenty-first century. While focusing on critical thinking, this reference encourages readers to think about tomorrow and the next century from a sociological viewpoint. The authors present culture, society and social change; social inequality; social institutions population, ecology, and urbanization; and collective social action. Anyone interested in a sociological viewpoint of society, culture, and change.

Social Problems D. Stanley Eitzen 2004 After years of diplomatic isolation Syria is emerging from the cold. Its government is a key Middle Eastern player, and will be a major element of any possible comprehensive Middle Eastern peace deal. To visit Syria is to become acquainted with one of the most rewarding destinations in the Middle East. Its historic attractions are stunning, and the Syrians are proud and gracious hosts; you can expect to be treated like a person and not just a tourist. Of course, there are always thorns with the roses: Syria's economy is inefficient, and its youth are frustrated; the strong-man political system that has held the country together does not encourage public intellectual life, but nor does it prevent young Syrians from debating with passion in private. The Syrian sense of tradition has preserved some of the bad along with the good, and society remains highly patriarchal. Despite such drawbacks, this is a country that's rich not only in resources, but also, and especially, in its people. American author Sarah Standish looks at Syria's long history and its present-day political realities. She describes the many subgroups that make up the population as well as what unites all Syrians. She offers practical tips for traveling and on what to expect when conducting business. You'll learn how people communicate with each other, and how you can communicate with them. The Syrians will never stop surprising you: get to know a few, and they will turn the stereotypes inside out several times over.

Diversity in Families Maxine Baca Zinn 1996 This highly regarded book treats diversity as the norm in family life, exploring the many varieties of familiar relationships in society today. This exploration of the socio-economic, cultural, and ethnic diversities in families views the family on both the macro and micro levels, examining the influence of larger social trends on personal experience, with particular focus on gender, race, class, and economic factors.

Electoral Systems and Conflict in Divided Societies National Research Council 1999-05-20 This paper is one of a series being prepared for the National Research Council's Committee on International Conflict Resolution. The committee was organized in late 1995 to respond to a growing need for prevention, management, and resolution of violent conflict in the international arena, a concern about the changing nature and context of such conflict in the post-Cold War era, and a recent expansion of knowledge in the field. The committee's main goal is to advance the practice of conflict resolution by using the methods and critical attitude of science to examine the effectiveness of various techniques and concepts that have been advanced for preventing, managing, and resolving international conflicts. The committee's research agenda has been designed to supplement the work of other groups, particularly the Carnegie Corporation of New York's Commission on Preventing Deadly Conflict, which issued its final report in December 1997. The committee has identified a number of specific techniques and concepts of current interest to policy practitioners and has asked leading specialists on each one to carefully review and analyze available knowledge and to summarize what is known about the conditions under which each is or is not effective. These papers present the results of their work.

Exotic No More Jeremy MacClancy 2010-04-08 Since its founding in the nineteenth century, social anthropology has been seen as the study of exotic peoples in faraway places. But today more and more anthropologists are dedicating themselves not just to observing but to understanding and helping solve social problems wherever they occur—in international aid organizations, British TV studios, American hospitals, or racist enclaves in Eastern Europe, for example. In *Exotic No More*, an initiative of the Royal Anthropological Institute, some of today's most respected anthropologists demonstrate, in clear, unpretentious prose, the tremendous contributions that anthropology can make to contemporary society. They cover issues ranging from fundamentalism to forced migration, child labor to crack dealing, human rights to hunger, ethnicity to environmentalism, intellectual property rights to international capitalisms. But *Exotic No More* is more than a litany of gloom and doom; the essays also explore topics usually associated with leisure or "high" culture, including the media, visual arts, tourism, and music. Each author uses specific examples from their fieldwork to illustrate their discussions, and 62 photographs enliven the text. Throughout the book, the contributors highlight anthropology's commitment to taking people seriously on their own terms, paying close attention to what they are saying and doing, and trying to understand how they see the world and why. Sometimes this bottom-up perspective makes the strange familiar, but it can also make the familiar strange, exposing the cultural basis of seemingly "natural" behaviors and challenging us to rethink some of our most cherished ideas—about gender, "free" markets, "race," and "refugees," among many others. LGBT Families Nancy J. Mezey 2015 Nancy J. Mezey's *LGBT Families* presents a comprehensive yet accessible understanding of LGBT families today by drawing upon and making sense of the burgeoning scholarly literature about LGBT families from the late twentieth and early twenty first centuries. It pays particular attention to how structures of race, class, gender, sexuality, and age shape LGBT families, and how members of such families negotiate the social landscapes within which they exist. The book will help readers better understand the formation, experiences, challenges, and strengths of LGBT families, and addresses two main questions: Why are new family forms so threatening to certain groups of people in society? and How are new family forms beneficial to the society in which they exist?

The Demographics of Empire Karl Ittmann 2010-10-05 The Demographics of Empire is a collection of essays examining the multifaceted nature of the colonial science of demography in the last two centuries. The contributing scholars of Africa and the British and French empires focus on three questions: How have historians, demographers, and other social scientists understood colonial populations? What were the demographic realities of African societies and how did they affect colonial systems of power? Finally, how did demographic theories developed in Europe shape policies and administrative structures in the colonies? The essays approach the subject as either broad analyses of major demographic questions in Africa's history or focused case studies that demonstrate how particular historical circumstances in individual African societies contributed to differing levels of fertility, mortality, and migration. Together, the contributors to The Demographics of Empire question demographic orthodoxy, and in particular the assumption that African societies in the past exhibited a single demographic regime characterized by high fertility and high mortality.

Fair and Foul D. Stanley Eitzen 2016-02-04 Fair and Foul explores our love of sport, just as it reveals sport's darker side—the influence of big business, corruption, price gouging, political maneuvering, gender bias, media grandstanding, and more. The sixth edition features a new chapter on mass media and sport, a revised introduction that lays out the two themes of the book with fresh examples, and a significantly revised chapter on college sport that asks whether or not big-time college sports are compatible with higher education. This edition also features new material throughout, such as the rising costs and increasing injuries in youth sports, fantasy sports, homophobia in sport, “one and done,” and more. Fair and Foul draws on examples ranging from youth to pro sports to give us a deeper understanding of how sports shape our everyday world. Ideal for sparking classroom discussion, Fair and Foul is an excellent book for students of sports and society, American culture, and other courses
