La Papauté et les croisades / The Papacy and the Crusades Michel Balard 2016-04-22 This volume brings together a selection of the papers on the theme of the Papacy and the Crusades, delivered at the 7th Congress of the Society for the Study of the Crusades and the Latin East. After the introduction by Michel Balard, the first papers examine aspects of crusader terminology. The next section deals with events and perceptions in the West, including papers on the crusades against the Albigensians and Frederick II, and on the situation in the Iberian peninsula. There follow studies on relations between crusaders and the local populations in the Byzantine world after 1204 and Frankish Greece, and in Cilician Armenia, while a final pair looks at papal interventions in Poland and Scandinavia.

Abraham - the father of faith Domenico Barbera 2019-03-29 Speaking of Abraham, it is not the simple tale of a character of antiquity, who was famous Abraham that the Bible presents as the father of a people, that is the Jews. Because if this is true, in that it cannot be disputed, according to what the Bible says, it is also true that Abraham is not only the acknowledged father of the Jews, but it is also the father of faith, as the New Testament recognizes it as such. The purpose of our intervention, is not only to talk about this, but mainly highlight the characteristics that Abraham had that from the point of view of faith, made him famous, not only among the Jews, but also in the midst of Christianity. In fact, when Christianity speaks of Abraham and holds him up for example of faith, it does so primarily on the basis of the characteristics that showed in believing in God and in having faith in Him, in all that which God said and the promises the he promised. These are the essential elements of antiquity proved that this man in his time, which made him famous in this area of ??life, Christianity, do not hesitate to call the Christian character, supported especially by the testimony that the same Jesus He made when talking about

him, and pointed for example model to the religious Jews who constantly challenged.

The Italian Academies 1525-1700 Jane E. Everson 2016-04-14 The intellectual societies known as Academies played a vital role in the development of culture, and scholarly debate throughout Italy between 1525-1700. They were fundamental in establishing the intellectual networks later defined as the 'République des Lettres', and in the dissemination of ideas in early modern Europe, through print, manuscript, oral debate and performance. This volume surveys the social and cultural role of Academies, challenging received ideas and incorporating recent archival findings on individuals, networks and texts. Ranging over Academies in both major and smaller or peripheral centres, these collected studies explore the interrelationships of Academies with other cultural forums. Individual essays examine the fluid nature of academies and their changing relationships to the political authorities; their role in the promotion of literature, the visual arts and theatre; and the diverse membership recorded for many academies, which included scientists, writers, printers, artists, political and religious thinkers, and, unusually, a number of talented women. Contributions by established international scholars together with studies by younger scholars active in this developing field of research map out new perspectives on the dynamic place of the Academies in early modern Italy. The publication results from the research collaboration 'The Italian Academies 1525-1700: the first intellectual networks of early modern Europe' funded by the Arts and Humanities Research Council and is edited by the senior investigators.
