Disarm June Gray 2013-05-28 PART ONE OF JUNE GRAY'S DISARM SERIES Even the deepest secrets always find a way to surface... Twenty-six-year-old Elsie Sherman has had a crush on her brother's best friend, Henry Logan, since she was twelve years old. Unfortunately, Henry has only ever treated her like a younger sister, stepping into her brother's shoes after he was killed in action. That is, until one night, when one dance ignites a sensual fire between the two, leaving Elsie aroused and confused. Is she allowed to lust after her surrogate big brother who also happens to be her roommate? But Henry, an Air Force officer, has been harboring two secrets—one will bring them together and the other will tear them apart—and it is up to Elsie to decide if their relationship is worth fighting for. Don't miss Besiege, part two of the Disarm series!

Chemiluminescence Immunoassay I. Weeks 1992 Chemiluminescence immunoassay is now established as one of the best alternatives to conventional radioimmunoassay for the quantitation of low concentrations of analytes in complex samples. During the last two decades the technology has evolved into analytical procedures whose performance far exceeds that of immunoassays based on the use of radioactive labels. Without the constraints of radioactivity, the scope of this type of analytical procedure has widened beyond the confines of the specialist clinical chemistry laboratory to other disciplines such as microbiology, veterinary medicine, agriculture, food and environmental testing. This is the first work to present the topic as a subject in its own right. In order to provide a complete picture of the subject, overviews are presented of the individual areas of chemiluminescence and immunoassay with particular emphasis on the requirements for interfacing chemiluminescent and immunochemical reactions. The possible ways of configuring chemiluminescence immunoassays are described. State-of-the-art chemiluminescence immunoassay systems are covered in detail together with those systems which are commercially available. The book is aimed at researchers and routine laboratory staff in the life sciences who wish to make use of this high-performance analytical technique and also at those interested in industrial applications of the technology in the food, agricultural and environmental sciences.

The Museum of Broken Relationships Olinka Vistica 2017-11-14 In the spirit of *Humans of New York* and *PostSecret*, this is a gorgeous gift book celebrating the objects that outlast love: a poignant, funny, sometimes bizarre and always delightful window into modern love and loss. "Leave[s] your heart feeling full and connected." -- Frank Warren, *PostSecret* A postcard from a childhood sweetheart. A wedding dress sealed in a jar. A roll of undeveloped film. An axe used to chop an ex-lover's furniture in a fit of rage. A wind-up toy, a bar of bath soap, a tin of Love Potion with the simple caption "Doesn't work." These objects, and many more, make up the whimsical, imaginative, poignant population of the Museum of Broken Relationships. Started by two former lovers who wanted a way to commemorate their relationship even after it ended, who couldn't bear to simply throw away the objects that had once meant so much, the Museum of Broken Relationships has captured hearts and imaginations around the globe since its founding in 2010. Anonymous submissions have poured in by the thousands: objects with brief, compelling captions confessing to the story behind their meaning. The museum's Croatian exhibit quickly became a main draw for tourists from around the globe, and has garnered enthusiastic, glowing media attention from sources as disparate as the *New York Times* and the Chinese national news. Now, as the physical museum arrives for a permanent spot in Los Angeles, the authors have collected the best, funniest, most heartwarming and heartrending stories from their huge selection of submissions. Much like the bestselling *PostSecret* series, this beautiful oversized, four-color book will offer an irresistible glimpse inside other people's secret worlds, creating moments of deep human connection. It is a must read for anyone who has ever loved and lost.

Empress of Flames Mimi Yu 2021-08-19 In this epic conclusion to *The Girl King*, two sisters war for a crown that was never meant to be theirs - though only one can wear it. As the late-Emperor's first-born, Princess Lu knows the throne rightfully belongs to her. She also can't forget her promise to shapeshifter Nok, the boy she loves, to win justice for his now powerless people. Yet even with an army at her side, Lu must face a major obstacle: the current Empress, her younger sister, Min. Princess Min used to live in Lu's shadow. Now she wields an ancient magic, one she's determined to use to forge her own path for the Empire, even if that means making enemies in court. But first, she must learn to control her power - before it consumes her . . . and the entire realm. Lu and Min are set for an epic confrontation, but the Empire faces a threat even greater than their rivalry. One that could cost them both the throne - and their lives. Praise for *The Girl King*: 'Everything I want in a high fantasy' Samantha Shannon, *Sunday Times* bestselling author 'Mimi Yu has that gift of magic' Marjorie Liu, *New York Times* bestselling author 'If you're down with dangerous magic, clans of shapeshifters, and worthy girls who somehow STILL need to prove their worth, then you will love this as much as I did' Kendare Blake, *New York Times* bestselling author

Sizwe's Test Jonny Steinberg 2008-02-12 At the age of twenty-nine, Sizwe Magadla is among the most handsome, well-educated, and richest of the men in his poverty-stricken village. Dr. Hermann Reuter, a son of old South West African stock, wants to show the world that if you provide decent treatment, people will come and get it, no matter their circumstances. Sizwe and Hermann live at the epicenter of the greatest plague of our times, the African AIDS epidemic. In South Africa alone, nearly 6 million people in a population of 46 million are HIV-positive. Already, Sizwe has watched several neighbors grow ill and die, yet he himself has pushed AIDS to the margins of his life and associates it obliquely with other people's envy, with comeuppance, and with misfortune. When Hermann Reuter establishes an antiretroviral treatment program in Sizwe's district and Sizwe discovers that close family members have the virus, the antagonism between these two figures from very different worlds -- one afraid that people will turn their backs on medical care, the other fearful of the advent of a world in which respect for traditional ways has been lost and privacy has been obliterated -- mirrors a continent-wide battle against an epidemic that has corrupted souls as much as bodies. A heartbreaking tale of shame and pride, sex and death, and a continent's battle with its demons, Steinberg's searing account is a tour-de-force of literary journalism.

The Mobile Mapping Clancy Wilmott 2020-03-12 This book argues for a theory of mobile mapping, a situated and spatial approach towards researching how everyday digital mobile media practices are bound up in global systems of knowledge and power. Drawing from literature in media studies and geography - and the work of Michel Foucault and Doreen Massey - it examines how geographical and historical material, social, and cultural conditions are embedded in the way in which contemporary (digital) cartographies are read, deployed, and engaged. This is explored through seventeen walking interviews in Hong Kong and Sydney, as potent discourses like cartographic reason continue to transform and weave through the world in ways that haunt mobile mapping and bring old conflicts into new media. In doing so, *Mobile Mapping* offers an interdisciplinary rethinking about how multiple translations of spatial knowledges between rational digital epistemologies and tacit

ways of understanding space and experience might be conceptualized and researched.

The Mind's Eye Ralph Radach 2003-06-05 The book provides a comprehensive state-of-the-art overview of current research on cognitive and applied aspects of eye movements. The contents include peer-reviewed chapters based on a selection of papers presented at the 11th European Conference on Eye Movements (Turku,

Finland 2001), supplemented by invited contributions. The ECEM conference series brings together researchers from various disciplines with an interest to use eye-tracking to study perceptual and higher order cognitive functions. The contents of the book faithfully reflect the scope and diversity of interest in eye-tracking as a fruitful tool both in basic and applied research. It consists of five sections: visual information processing and saccadic eye movements; empirical studies of reading and language production; computational models of eye movements in reading; eye-tracking as a tool to study human-computer interaction; and eye movement applications in media and communication research. Each section is concluded by a commentary chapter by one of the leading authorities in the field. These commentaries discuss and integrate the contributions in the section and provide an expert view on the most significant present and future developments in the respective areas. The book is a reference volume including a large body of new empirical work but also principal theoretical viewpoints of leading research groups in the field.

Big Data in Complex Systems Aboul Ella Hassanien 2015-01-02 This volume provides challenges and Opportunities with updated, in-depth material on the application of Big data to complex systems in order to find solutions for the challenges and problems facing big data sets applications. Much data today is not natively in structured format; for example, tweets and blogs are weakly structured pieces of text, while images and video are structured for storage and display, but not for semantic content and search. Therefore transforming such content into a structured format for later analysis is a major challenge. Data analysis, organization, retrieval, and modeling are other foundational challenges treated in this book. The material of this book will be useful for researchers and practitioners in the field of big data as well as advanced undergraduate and graduate students. Each of the 17 chapters in the book opens with a chapter abstract and key terms list. The chapters are organized along the lines of problem description, related works, and analysis of the results and comparisons are provided whenever feasible.

Nonlinear Dynamics and Chaos Steven H. Strogatz 2018-05-04 This textbook is aimed at newcomers to nonlinear dynamics and chaos, especially students taking a first course in the subject. The presentation stresses analytical methods, concrete examples, and geometric intuition. The theory is developed systematically, starting with first-order differential equations and their bifurcations, followed by phase plane analysis, limit cycles and their bifurcations, and culminating with the Lorenz equations, chaos, iterated maps, period doubling, renormalization, fractals, and strange attractors.

Jack McAfghan Kate McGahan 2015-04-02 An expert communicator, Jack McAfghan writes the memoirs of his four-legged life as a mixed-breed Afghan Hound. From obedience and agility training to hospice work, Jack and his master learn their lessons side by side, inevitably applying what they have learned as their own lives unfold. It is a love story that can be used as an informal study guide for those who are in the process of training a dog, learning to love, or grieving over the loss of a friend. Jack presents with a wise, open and informed mind. He

speaks firsthand about the psychological aspects of canine behavior as he opens the reader's mind to the possibilities that exist in life and after death. He reminds us that the way we think can change the course of our lives. This story will touch everyone who has ever loved. It matters not if they have four legs or two. Jack leads us to a higher love as he expands our tolerance and compassion for all of humanity. He extends himself to every creature of the earth, every human on the planet, every spirit in the universe and most of all, to the bona fide Master over all.

Bikepacking gestalten 2021-06-22 They say that what matters is the journey and not the destination, and that couldn't be more accurate when one goes bikepacking. Choosing the path less travelled, exploring the surroundings at every pedal of the way, and embracing the freedom it offers: long-distance cycling is more than a method of transportation - it's a vibrant travelling philosophy. *Bicycle Getaways* is the ultimate publication to discover the adventurous spirit of bikepacking. Exploring journeys in different regions around the world, introducing the people and culture around it, and giving you the lowdown of all the tips and tricks, this book presents the insights and inspiration to plan your own expeditions, no matter how experienced (or not) you are. Pack your bag and prep your bike, the journey awaits!

Data Protection and Privacy: (In)visibilities and Infrastructures Ronald Leenes 2017-02-07 This book features peer reviewed contributions from across the disciplines on themes relating to protection of data and to privacy protection. The authors explore fundamental and legal questions, investigate case studies and consider concepts and tools such as privacy by design, the risks of surveillance and fostering trust. Readers may trace both technological and legal evolution as chapters examine current developments in ICT such as cloud computing and the Internet of Things. Written during the process of the fundamental revision of revision of EU data protection law (the 1995 Data Protection Directive), this volume is highly topical. Since the European Parliament has adopted the General Data Protection Regulation (Regulation 2016/679), which will apply from 25 May 2018, there are many details to be sorted out. This volume identifies and exemplifies key, contemporary issues. From fundamental rights and offline alternatives, through transparency requirements to health data breaches, the reader is provided with a rich and detailed picture, including some daring approaches to privacy and data protection. The book will inform and inspire all stakeholders. Researchers with an interest in the philosophy of law and philosophy of technology, in computers and society, and in European and International law will all find something of value in this stimulating and engaging work.
