Communities of Saint Martin Sharon Farmer 2019-03-15 Sharon Farmer here investigates the ways in which three medieval communities—the town of Tours, the basilica of Saint-Martin there, and the abbey of Marmoutier nearby—all defined themselves through the cult of Saint Martin. She demonstrates how in the early Middle Ages the bishops of Tours used the cult of Martin, their fourth-century predecessor, to shape an idealized image of Tours as Martin's town. As the heirs to Martin's see, the bishops projected themselves as the rightful leaders of the community. However, in the late eleventh century, she shows, the canons of Saint-Martin (where the saint's relics resided) and the monks of Marmoutier (which Martin had founded) took control of the cult and produced new legends and rituals to strengthen their corporate interests. Since the basilica and the abbey differed in their spiritualities, structures, and external ties, the canons and monks elaborated and manipulated Martin's cult in quite different ways. Farmer shows how one saint's cult lent itself to these varying uses, and analyzes the strikingly dissimilar Martins that emerged. Her skillful inquiry into the relationship between group identity and cultural expression illuminates the degree to

which culture is contested territory. Farmer's rich blend of social history and hagiography will appeal to a wide range of medievalists, cultural anthropologists, religious historians, and urban historians.

Internal Combustion Engines Institution of Mechanical Engineers 2014-10-10 This book presents the papers from the Internal Combustion Engines:

Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO<sub>2</sub> emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

Great Small Fiats Phil Ward 2014-05-19 In deciding which models to choose for inclusion in this book selected from Fiat's huge inventory, the author concentrated on three criteria - greatness, size and emotion. Where size is an easy parameter to qualify, greatness is more complicated because it is a combination of both the manufacturer's and the public's opinion. A car that is highly regarded by the public may not have been a commercial success and vice versa. A truly great car is one that works well for both parties. Emotion may be considered to be an element of greatness in that the public's 'love' for a car is a fantastic benefit for a manufacturer and must be treasured. Fiat have made the mistake of 'improving' an icon on several occasions only to find that public opinion went against them. Fortunately Fiat has been magnanimous enough to respond by giving the car buying public more of what it wants. As long as they continue to do so then Fiat's reputation as the world's greatest small car manufacturer is set to continue. The author chose the Topolino as the starting point as the car fulfils all the criteria and it was the first Fiat built in the late 1930s to satisfy the Italian public's new-found desire for mobilisation. The old conventions of car production were turned upside down with the arrival of the 600 which revolutionised car production techniques and maximised on passenger space and performance at minimal cost. These principals continued via a succession of models which include the 500, 850, 126, 127 through to more recent models like the Cinquecento and Seicento. Running in parallel with these 'cheeky' Fiats, this book covers a range of slightly larger cars that were built in huge numbers. Though rather staid in appearance, the 1950s Millecento was family transport for millions of Italians covering three decades, four when the Indian-built cars are included. Similarly the 128, Panda and Uno were 'the' Italian small cars of the '70s, '80s and '90s. Nuova Panda carries the banner to the present day.

Management By Processes In Practice Claudio Pires 2021-02-25 A book written for those who really practice process management! This book was born of an

internal corporate training, in which I presented the designed infographic that illustrates the cover page...repeatedly through several years. Participating in other trainings, audits and events, I came to consider that some of my peculiar approaches could always be seen as great nonsense or as a solid experience and its many scars...always being to the taste or criticism of the public. I was careful to name each chapter as a question that someone has already asked me or that I believe I might be asked, and, then, I hope I have been able to put myself in the seated place of the audience rather than on the lighted stage.

The Global Automotive Industry Paul Nieuwenhuis 2015-08-10 The automotive industry is still one of the world's largest manufacturing sectors, but it suffers from being very technology-focused as well as being relatively short-term focused. There is little emphasis within the industry and its consultancy and analyst supply network on the broader social and economic impacts of automobility and of the sector that provides it. The Global Automotive Industry addresses this need and is a first port of call for any academic, official or consultant wanting an overview of the state of the industry. An international team of specialist researchers, both from academia and business, review and analyse the key issues that make vehicle manufacturing still the world's premier manufacturing sector, closely tied in with the fortunes of both established and newly emerging economies. In doing so, it covers issues related to manufacturing, both established practices as well as new developments; issues relating to distribution, marketing and retail, vehicle technologies and regulatory trends; and, crucially, labour practices and the people who build cars. In all this it explains both how the current situation arose and also likely future trajectories both in terms of social and regulatory trends, as the technological, marketing and labour practice responses to those, leading in many cases to the development of new business models. Key features Provides a global overview of the automotive industry, covering its current state and considering future challenges Contains contributions from international specialists in the automotive sector Presents current research and sets this in an historical and broader industry context Covers threats to the industry, including globalization, economic and environmental sustainability The Global Automotive Industry is a must-have reference for researchers and practitioners in the automotive industry and is an excellent source of information for business schools, governments, and graduate and undergraduate students in automotive engineering.

Repair Work Ethnographies Ignaz Strebel 2018-12-14 This pioneering book homes in on repair as an everyday practice. Bringing together exemplary ethnographies of repair work around the world, it examines the politics of repair, its work settings and intricate networks, in and across a wide range of situations, lay and professional. The book evidences the topical relevance of situated inquiry into breakdown, repair, and maintenance for engaging with the contemporary world more broadly. Airplanes and artworks, bicycles and buildings, cars and computers, medical devices and mobile phones, as virtually any commodity, infrastructure or technical artifact, have in common their occasional breakdown, if not inbuilt obsolescence. Hence the point and purpose of closely examining how and when they are fixed.

Futurism Lawrence S. Rainey 2009 In 1909, F.T. Marinetti published his incendiary Futurist Manifesto, proclaiming, "We stand on the last promontory of the centuries!!" and "There, on the earth, the earliest dawn!" Intent on delivering Italy from "its fetid cancer of professors, archaeologists, tour guides, and antiquarians," the Futurists imagined that art, architecture, literature, and music would function like a machine, transforming the world rather than merely

reflecting it. But within a decade, Futurism's utopian ambitions were being wedded to Fascist politics, an alliance that would tragically mar its reputation in the century to follow. Published to coincide with the 100th anniversary of the founding of Futurism, this is the most complete anthology of Futurist manifestos, poems, plays, and images ever to be published in English, spanning from 1909 to 1944. Now, amidst another era of unprecedented technological change and cultural crisis, is a pivotal moment to reevaluate Futurism and its haunting legacy for Western civilization.

Alberto Breccia's Dracula Alberto Breccia 2021-07-13 Alberto Breccia's Dracula is composed of a series of brutally funny satirical misadventures starring the hapless eponymous antihero. Literally defanged (a humiliating trip to the dentist doesn't help), the protagonist's glory days are long behind him and other, more sinister villains (a corrupt government, overtly backed by American imperialism) are sickening and draining the life out of the villagers far more than one creature of the night ever could. This is the first painted, full-color entry in Fantagraphics' artist-focused Alberto Breccia Library, and the atmospheric palette

adds mood and dimension. It also includes a sketchbook showing the artist's process.?
