Mayo Clinic Neurology Board Review Kelly D. Flemming 2021 "The cerebrospinal vasculature originates at the aortic arch. The right brachiocephalic artery divides into the right common carotid artery and the right subclavian artery. The left common carotid and left subclavian arteries arise directly from the aortic arch. The 2 common carotid arteries bifurcate into the internal and external carotid arteries. The anterior circulation of the brain includes the distal branches from the internal carotid artery, including the anterior cerebral artery and the middle cerebral artery. The vertebral arteries arise from the subclavians and join at the pontomedullary junction, forming the basilar artery. The vertebrobasilar system and distal branches are commonly known as the posterior circulation of the brain"--

Remington David B. Troy 2006 For over 100 years, Remington has been the definitive textbook and reference on the science and practice of pharmacy. This Twenty-First Edition keeps pace with recent changes in the pharmacy curriculum and professional pharmacy practice. More than 95 new contributors and 5 new section editors provide fresh perspectives on the field. New chapters include pharmacogenomics, application of ethical principles to practice dilemmas, technology and automation, professional communication, medication errors, re-engineering pharmacy practice, management of special risk medicines, specialization in pharmacy practice, disease state management, emergency patient care, and wound care. Purchasers of this textbook are entitled to a new, fully indexed Bonus CD-ROM, affording instant access to the full content of Remington in a convenient and portable format.

World Migration Report 2020 United Nations 2019-11-27 Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

The Social Life of Coffee Brian Cowan 2008-10-01 What induced the British to adopt foreign coffee-drinking customs in the seventeenth century? Why did an entirely new social institution, the coffeehouse, emerge as the primary place for consumption of this new drink? In this lively book, Brian Cowan locates the answers to these questions in the particularly British combination of curiosity, commerce, and civil society. Cowan provides the definitive account of the origins of coffee drinking and coffeehouse society, and in so doing he reshapes our understanding of the commercial and consumer revolutions in Britain during the long Stuart century. Britain's virtuosi, gentlemanly patrons of the arts and sciences, were profoundly interested in things strange and exotic. Cowan explores how such virtuosi spurred initial consumer interest in coffee and invented the social template for the first coffeehouses. As the coffeehouse evolved, rising to take a central role in British commercial and civil society, the virtuosi were also transformed by their own invention.

Throw away your real estate course test books and class notes, this is all you need to pass!

Neuroscience in Education Sergio Della Sala 2012-04-05 In the past ten years, there has been growing interest in applying our knowledge of the functioning of the human brain to the field of education-including reading, learning, language and mathematics. This has resulted in the development of a number of new practices in education-some good, some bad and some just crazy. The 'good' is nearly always sound cognitive research that has clear implications for educational practice. The 'bad' is the use of neuroscience jargon to lure the unwary and to give an apparent scientific aura to flawed educational programs with no evidence base and which no reputable neuroscientist would endorse. The 'ugly' is simplistic interpretation and misapplication of cognitive theories leading to errors in their application. More and better could be done if neuroscientists and educationalists acknowledge the limits of their disciplines and start listening to each other. Neuroscience in Education brings together an international group of leading psychologists, neuroscientists, educationalists and geneticists to critically review some of these new developments, examining the science behind these practices, the validity of the theories on which they are based, and whether they work. It will be fascinating reading for anyone involved in education, including teachers, psychologists, neuroscientists, and policy makers as well as interested parents.

Mayo Clinic Internal Medicine Board Review Questions and Answers Robert D. Ficalora 2013-07-08 This question-and-answer companion to Mayo Clinic Internal Medicine Board Review, 10th Edition, tests physicians and physicians-in-training on all relevant material related to the goals set forth by ABIM to ensure the success of internal medicine clinicians. Medical Licensing and Discipline in America David A. Johnson 2012 Medical Licensing and Discipline in America traces the evolution of the U.S. medical licensing system from its historical antecedents in the 18th and 19th century to its modern structure, emphasizing a focus on public accountability and the policies, guidelines and practices of medical boards. In doing so, the book underscores the role of the Federation of State Medical Boards in facilitating state-based licensure and discipline and the promotion of quality health care.

Clinical Neuropsychology Study Guide and Board Review Kirk Stucky 2020-09-01 Clinical Neuropsychology Study Guide and Board Review, Second Edition provides an easy to study volume with sample questions and recommended readings that are specifically designed to help individuals prepare for the ABCN written examination. In addition, this book can be used as a teaching tool for graduate students and trainees at various levels. The book is divided into three sections: Section 1: Foundations of Clinical Neuropsychology; Section II: Fundamentals of Assessment; and Section III: Disorders and Conditions. The format is geared toward exam preparation and is much less dense than a typical textbook. Information is provided in a concise, outlined manner, with liberal use of bullets, boxes, illustrations, and tables that allow readers to easily review and integrate information into their already established knowledge base. To augment the study guide, a recommended readings list at the end of each chapter provides references to more comprehensive materials considered important or seminal in each topic area. Additionally, the book contains four 125-question mock exams designed to help readers study and prepare for the written exam. The answers to all questions are explained along with appropriate and supportive references. Features: Detailed charts and summary tables that facilitate conceptual learning Concise coverage of pediatric, adult, and geriatric issues and conditions Emphasis on critical teaching points relevant to current neuropsychological practice Mock exam questions with answers and references at the end of every chapter relevant to the content Four separate 125-question full-length mock exams with answers and references
