Managing Contractors Great Britain. Health and Safety Executive 2011

Managing contractors is a guide for small to medium-sized companies in the chemical industry, but it will also be of use to other industries and larger companies. Safe working with contractors presents a challenge, but being a smaller company has its advantages. You can be more flexible in your approach and decisions can be made more quickly. Lines of communication are shorter, usually there are not too many people involved and it is easier to know who is around. In this guidance we aim to help you understand what you need to do and give sound practical advice for action. Working together helps everyone to work safely. This second edition brings guidance and references up to date.

Learning from Accidents Trevor Kletz 2007-08-22 Review of previous edition:

"Trevor Kletz's book makes an invaluable contribution to the systematic, professional and scientific approach to accident investigation". The Chemical Engineer Fully revised and updated, the third edition of Learning from Accidents provides more information on accident investigation, including coverage of accidents involving liquefied gases, building collapse and other incidents that have occurred because faults were invisible (e.g. underground pipelines). By analysing accidents that have occurred Trevor Kletz shows how we can learn and thus be better able to prevent accidents happening again. Looking at a wide range of incidents, covering the process industries, nuclear industry and transportation, he analyses each accident in a practical and non-theoretical fashion and summarises each with a chain of events showing the prevention and mitigation which could have occurred at every stage. At all times Learning from Accidents, 3rd Edition emphasises cause and prevention rather than human interest or cleaning up the mess. Anyone involved in accident investigation and reporting of whatever sort and all those who work in industry, whether in design, operations or loss prevention will find this book full of invaluable guidance and advice.
