Medical Anthropology Andrea S. Wiley 2009 Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

The Sinister Trophy John Kiriamiti 1999 Written by the author of the popular Son of Fate, this follow-up story tells of Adams Wamathina, better known as Son of Fate, who is searching for a trophy which other parties will stop at nothing to get. The action takes place in Nairobi and Tanzania and Son of Fate finds himself involved with car chases

and murder as he becomes embroiled in the chase.
