CALL for widening participation: short papers from EUROCALL 2020 Karen-Margrete Frederiksen 2020-12-14 Despite the Covid-19 pandemic, the EUROCALL society succeeded in holding the 28th EUROCALL conference, EUROCALL2020, on 20-21 August as an online, two-day gathering. The transition process required to make this happen was demanding and insightful for everyone involved, and, in many ways, a logical consequence of the core content and purpose of EUROCALL. Who would be better suited to transform an onsite conference into an online event than EUROCALL? CALL for widening participation was this year's theme. We welcomed contributions from both theoretical and practical perspectives in relation to the many forms and contexts of CALL. We particularly welcomed longitudinal studies or studies that revisited earlier studies. The academic committee accepted 300 abstracts for paper presentations, symposia, workshops, and posters under this theme; 57 short papers are published in this volume. We hope you will enjoy reading this volume, the first one to reflect a one hundred percent online EUROCALL conference/Online Gathering.

Digital Death: Mortality and Beyond in the Online Age Christopher M. Moreman 2014-10-20 This fascinating work explores the meaning of death in the digital age, showing readers the new ways digital technology allows humans to approach, prepare for, and handle their ultimate destiny. • Explains how new technologies and online accessibility are changing human attitudes to death and dying—and impacting the ways in which people live • Explores the afterlife experience as it can play out in a variety of digital media, including Facebook and other social media, World of Warcraft and video games, YouTube and other video services, and Internet memorials • Analyzes the myriad ways encounters with death and dying and the capacity for mourning are mediated by new technologies • Places death and dying in the digital age in historical perspective, showing how beliefs about and approaches to death and dying have changed constantly over time

Reconceptualizing STEM Education Richard A. Duschl 2016-01-08 Reconceptualizing STEM Education explores and maps out research and development ideas and issues around five central practice themes: Systems Thinking; Model-Based Reasoning; Quantitative Reasoning; Equity, Epistemic, and Ethical Outcomes; and STEM Communication and Outreach. These themes are aligned with the comprehensive agenda for the reform of science and engineering education set out by the 2015 PISA Framework, the US Next Generation Science Standards and the US National Research Council's A Framework for K-12 Science Education. The new practice-focused agenda has implications for the redesign of preK-12 education for alignment of curriculum-instruction-assessment; STEM teacher education and professional development; postsecondary, further, and graduate studies; and out-of-school informal education. In each section, experts set out powerful ideas followed by two eminent discussant responses that both respond to and provoke additional ideas from the lead papers. In the associated website highly distinguished, nationally recognized STEM education scholars and policymakers engage in deep conversations and considerations addressing core practices that guide STEM education.

How Access to Energy Can Influence Food Losses Food and Agriculture Organization of the United Nations 2018-07-26 The report begins by reviewing the evidence to date focussing on the magnitude and geographical distribution of food losses. In the next sections the role of energy in post-harvest losses is discussed. Thereafter, the main entry points within the food value chain where lack of access to energy is the dominant factor influencing food losses is discussed. This report outlines low cost and off-grid post-harvest cooling and processing technologies that can be made available in developing countries. These household to community scale evaporative cooling systems, solar assisted cooling systems and as well as solar drying systems that can help increase shelf life . Additionally, through case studies, focus is laid on assessing the technical and economic feasibility of cooling and processing technologies. Finally, recommendations are made that could be incorporated to further develop food loss strategies that can classify food value chains based on their energy demand. This will enable policy makers to quickly understand the main technologies for food preservation and processing that can be introduced based on the available energy sources in a given region.

Conducting Research Literature Reviews Arlene Fink 2013-07-16 Providing readers with an accessible, in-depth look at how to synthesize research literature, Conducting

Research Literature Reviews is perfect for students, researchers, marketers, planners, and policymakers who design and manage public and private agencies, conduct research studies, and prepare strategic plans and grant proposals. Bestselling author Arlene Fink shows readers how to explain the need for and significance of research, as well as how to explain a study's findings. Offering a step-by-step approach to conducting literature reviews, the Fourth Edition features updated examples and covers: how to select databases and evaluate their quality; selecting and organizing key words and other terms in order to effectively search databases and the Web; setting standards for evaluating the quality of research and other literature; extracting and recording information from articles and studies; synthesizing what the reader finds either descriptively or via a meta-analysis; recording and storing the results in a virtual file cabinet; and how to use bibliographic software.

Peculiar Questions and Practical Answers New York Public Library 2019-10-22 The New York Public Library staff answers questions remarkable and preposterous, with illustrations by Barry Blitt. Have you've ever wondered if you can keep an octopus in a private home? Do you spend your time thinking about how much Napoleon's brain weighed? If so, Peculiar Questions and Practical Answers is the book for you. The New York Public Library has been fielding questions like these ever since it was founded in 1895. Of course, some of the questions have left the librarians scratching their heads... "In what occupations may one be barefooted?" "What time does a bluebird sing?" "What does it mean when you're being chased by an elephant?" "What kind of apple did Eve eat?" "How many neurotic people are there in the U.S.?" In Peculiar Questions and Practical Answers, the staff of the NYPL has dug through the archives to find thoughtful and often witty answers to over one hundred of the oddest, funniest, and most whimsical questions the library has received since it began record-keeping over seventy-five years ago. One of The New Yorker's best-known and beloved illustrators, Barry Blitt, has created watercolors that bring many of the questions hilariously to life in a book that answers, among others, the question "Does anyone have a copyright on the Bible?"

The Extraordinary Coach: How the Best Leaders Help Others Grow John Zenger 2010-06-04 COACH YOUR BUSINESS TO SUCCESS USING THIS "INTERACTIVE" APPROACH FROM TWO OF TODAY'S MOST FORWARD-THINKING LEADERSHIP GURUS "A wonderful and indispensable guide to the practice of coaching. The authors are among the most seasoned practitioners around . . . and it shows! Whether you are coaching subordinates or clients, you will want to keep this book close at hand—full of detailed guidance." —Jay A. Conger, Kravis Professor of Leadership Studies,Claremont McKenna College, and author of Building Leaders and Learning to Lead "Stinnett and Zenger provide a comprehensive look at the value of coaching inside the organization, complete with a process, tools, and supports for getting started. This book is a great resource and contribution to the field!" —Pam McLean, Ph.D., CEO, Hudson Institute of Santa Barbara "Finally, and I do mean finally, a book has emerged that is the very best guide to the philosophy, competencies, and discipline required to be a coach who makes a true difference in lives of others. This is not a book to read. It is a book to study and live by. Why? Because it is all there: the right questions, the right answers, and the right motives of giving your best to others." —Larry Wilson, CEO, The Wilson Collaborative, and author of Play to Win! "The Extraordinary Coach offers a compelling view of what it means to be a truly effective leader— one who empowers and grows capability through coaching. It demystifies coaching into an actionable framework that generates immediate change." —Christy Consler, Vice President, Leadership Development and Sustainability, Safeway, Inc. "Powerful, thought-provoking, and packed with practical tools, concepts, and ideas you can use immediately. It will change the way you think about coaching, and about yourself." —Lou Kaucic, retired Chief People Officer of Applebee's International, founder of Coaches Collective International About the Book: Imagine your workplace filled with curious, creative, committed employees. People who take initiative, who are fearless decision makers, who "own" their work. With the right coaching system in place, this dream will soon become reality. With The Extraordinary Coach, leadership guru Jack Zenger and coaching expert Kathleen Stinnett deliver an entire toolbox for coaching your organization to success. While other such books simply tell you how to coach, The Extraordinary Coach uses companion videos (at www.zengerfolkman.com), worksheets, checklists, sample questions, and the latest research fi ndings to provide a fullimmersion course on becoming the kind of coach who brings dramatic changes to an organization. Applying Zenger and Stinnett's system, you'll see immediate results in your business including: Increased productivity High-energy company culture Dynamic supervisor/employee relationships Creative problem solving Greater risk taking Heightened innovation The authors collected 360-degree feedback assessments from some of the most effective leaders in business today and identified those who were excellent coaches. Then they combined the research with the latest findings from the worlds of psychology, adult development, and systems theory to map out the real science behind effective coaching. The result is a practical, evidence-based coaching system that can be applied in any type of business. When you coach individuals to success, you lead your entire organization to success. This "interactive" package is exactly what you need to master one of today's most critical business leadership skills.

The Sensory Processing Disorder Answer Book Tara Delaney 2008-07-01 Q&A Is there medication for sensory processing disorder? How can occupational therapy help? What advice can I give my child's teacher? Can you "outgrow" sensory processing disorder? How can we make social situations less of an ordeal? What are some therapeutic activities I can do with my child? It is estimated that more than 10 percent of children deal with some form of sensory processing disorder (SPD), a neurological disorder characterized by the misinterpretation of everyday sensory information, such as touch, sound, and movement. For many children, SPD can lead to academic struggles, behavioral problems, difficulties with coordination, and other issues. The Sensory Processing Disorder Answer Book is a reassuring, authoritative reference, providing sound advice and immediate answers to your most pressing questions about SPD, such as: What is sensory processing? Does SPD affect social skills? Can you see sensory processing difficulties in an infant? What is Sensory Integration Therapy? Is SPD a sign of autism? Are there tests for SPD? How do I get a prescription for occupational therapy? How do I teach my child to understand his sensory needs? Written in an easy-to-read question and answer format, The Sensory Processing Disorder Answer Book helps you fully understand SPD, conquer your fears, and seek help for your child when necessary.

Internet Reference Support for Distance Learners Rita Pellen 2013-12-19 Make separate library services for distance learners a thing of the past Internet Reference Support for Distance Learners takes a comprehensive look at efforts by librarians and information specialists to provide distance learners with effective services that match those already available on campus. With the development of the World Wide Web and the evolution of Web-based services, reference librarians are adding a human element to the virtual library, blurring the difference between distance learners and traditional users. This unique book examines how they deal with a wide range of related topics, including standards and guidelines, copyright issues, streaming media, and chat and digital references, and presents a historical overview of how reference and instructional services have been delivered to distance users—before and after the creation of the Internet. Internet Reference Support for Distance Learners reveals that librarians do not make a sharp distinction between reference and instruction within the context of distance learning, and that there is no clear boundary between "true" distance learners and more traditional students who might use services designed for nontraditional users. Online capabilities have allowed reference librarians to approximate services advocated by published guidelines and standards, including the ACRL Distance Learning Section's Guidelines for Distance Learning Library Services, to provide a framework for librarians to plan services for off-campus students. Internet Reference Support for Distance Learners provides practical information on: how librarians can "keep IT simple" when designing methods to access reference support why library Web sites are vital sources of communication between the distance learning student and the reference-based instructional component how to set

up a university chat service, including software selection, staff training and assessment how to provide students services beyond traditional provision of resources, including advising, enrollment, and payment of fees how to create an online assistance site that incorporates online versions of traditional print handouts, FAQs, subject guides, course-specific guides, learning modules, and instructional videos in one central location how to work with faculty to create online support for students in Blackboard courses the pros and cons of using open-source software how to create an online library assistance site how to create online information literacy course to teach independent research skills to remote students how to avoid copyright infringement and how to educate library personnel about copyright law how to use Camtasia Studio, a screen capture program to create audio and video for online presentations Internet Reference Support for Distance Learners is an invaluable resource for librarians working in academic, school, special, and public settings, and for library science faculty and students.

Professional Development in Online Teaching and Learning in Technical Communication Beth L. Hewett 2020-05-18 Technical communication instructors need professional development opportunities that will aid them in creating their online courses; in developing curricula; and in teaching in what may be a new environment. Although instructors can turn to instructional design teams for assistance in using Learning Management System and its functions, they specifically need their own first-hand, immersive learning within their pedagogical training. In other words, teachers need to learn in an online context like the environment that their students will use; such direct training helps instructors to facilitate student learning in a technologically distributed classroom. Beyond learning technological skills to facilitate a course, these teachers need to learn to use the technology effectively to keep students on track and to teach them skills and material. This collection—which includes three contributions from 2007 and 10 from 2017—focuses on the types of professional development instructors need to be successful in the online technical communication classroom. Formed as a 10-year retrospective of the field and its advances in online education professional development, the book offers instructors theoretical and practical suggestions for creating and teaching successful online courses and managing entire online technical communication programs. This book was originally published as a special issue of Technical Communication Quarterly (TCQ).

Cataloging with AACR2 and MARC21 Deborah A. Fritz 2007 Recent changes in both cataloging rules (AACR2) and MARC coding standards (MARC21) mean that for catalogers to create or edit records effectively, they need new up-to-date guidance. In a unique one-stop guide, cataloging expert Fritz provides the hands-on cross-references between AACR2 and MARC21 required for easy online cataloging. The 2006 Cumulation brings the second edition up-to-date with the inclusion of the 2004, 2005, and 2006 updates. Designed to streamline the process and avoid errors, the book is organized in order of MARC tags. Following this step-by-step guide, users can: Identify the rules that govern each MARC field Match resources to records Edit records Create new records easily Clone records for different editions Make individual MARC records "play well" with others in the database. Beginning catalogers can use this guide to create simple records while experienced catalogers will be able to identify specific rules. Fritz also helps copy catalogers pick better matching records, and systems librarians understand the content of records at the core of their collections. Providing clear, practical, easy-to-use guidance, this authoritative reference is the premier resource for students and instructors as a basis for creating and editing consistently good MARC records. Available in loose-leaf format to fit in a standard 3-ring binder.

Health Research Practices in a Digital Context Laurent Morillon 2020-12-03 The current "generalized digitization" of society is influencing the health environment, healthcare organizations as well as actors. In this context, human and social sciences deconstruct, nuance and sometimes even challenge certain preconceived ideas and/or dominant discourses. In this book, researchers of four nationalities and three different disciplines have agreed to open the "black box" of their work. They display their scientific practices from the perspective of epistemology, ethics and methodology. They present and analyze their values and postulates but, also, what may have influenced the project, the definition of the object and objectives, as well as their approaches. In a contextual way, the first part presents some changes in environments and infocommunicational practices related to digital health. The second part opens space to reflect on ethics and deontology. Finally, postulating that scientific fact is not an essence but the result of a process, the last part discusses the methods implemented, which may be different from those initially envisaged. This book is dedicated to the researchers and postgraduate students in the human and social sciences as well as the health practitioners likely to collaborate with them.

Accountable Care Organizations Robert James Cimasi 2013-06-05 An accountable care organization (ACO) is a healthcare organization characterized by a payment and care delivery model that seeks to tie provider reimbursements to quality metrics and reductions in the total cost of care for an assigned group of patients. Accountable Care Organizations: Value Metrics and Capital Formation explores the historical background and evolution of the ACO model as the basis for the development of the value metrics and capital formation analyses that are foundational to assessing the current efficacy and capacity for change. The book examines the four pillars of value in the healthcare industry: regulatory, reimbursement, competition, and technology in addressing the value metrics of ACOs, including requirements for capital formation, financial feasibility, and economic returns. It focuses the discussion of non-monetary value on a review of aspects of population health within the context of such objectives as improved quality outcomes and access to care. Explains why ACOs might be the cost-containment and quality improvement answer the industry has been looking for Describes the circumstances and capital structures where ACOs represent a sound investment Includes a foreword by Peter A. Pavarini, Esq. The book examines the positive externalities of the ACO model, including results for third parties outside the basic construct of the ACO contracts shared savings payments. It also discusses the potential role and opportunities for consultants in assisting their provider clients in the consideration, development, implementation, and operation of an ACO.
