Empire of Silence Christopher Ruocchio 2018-07-05 Hadrian Marlowe, a man revered as a hero and despised as a murderer, chronicles his tale in the galaxy-spanning debut of the Sun Eater series, merging the best of space opera and epic fantasy. It was not his war. On the wrong planet, at the right time, for the best reasons, Hadrian Marlowe started down a path that could only end in fire. The galaxy remembers him as a hero: the man who burned every last alien

Cielcin from the sky. They remember him as a monster: the devil who destroyed a sun, casually annihilating four billion human lives--even the Emperor himself--against Imperial orders. But Hadrian was not a hero. He was not a monster. He was not even a soldier. Fleeing his father and a future as a torturer, Hadrian finds himself stranded on a strange, backwater world. Forced to fight as a gladiator and navigate the intrigues of a foreign planetary court, he will find himself fighting a war he did not start, for an Empire he does not love, against an enemy he will never understand.

The Real Valkyrie Nancy Marie Brown 2021-08-31 In the tradition of Stacy Schiff's Cleopatra, Brown lays to rest the hoary myth that Viking society was ruled by men and celebrates the dramatic lives of female Viking warriors "Once again, Brown brings Viking history to vivid, unexpected life—and in the process, turns what we thought we knew about Norse culture on its head. Superb." —Scott Weidensaul, author of New York Times bestselling *A World on the Wing* "Magnificent. It captured me from the very first page..." —Pat Shipman, author of *The Invaders* "A complex, important, and delightful addition to women's history." —Pamela D. Toler, author of *Women Warriors: An Unexpected History* In 2017, DNA tests revealed to the collective shock of many scholars that a Viking warrior in a high-status grave in Birka, Sweden was actually a woman. The Real Valkyrie weaves together archaeology, history, and literature to imagine her life and times, showing that Viking women had more

power and agency than historians have imagined. Nancy Marie Brown uses science to link the Birka warrior, whom she names Hervor, to Viking trading towns and to their great trade route east to Byzantium and beyond. She imagines her life intersecting with larger-than-life but real women, including Queen Gunnhild Mother-of-Kings, the Viking leader known as The Red Girl, and Queen Olga of Kyiv. Hervor's short, dramatic life shows that much of what we have taken as truth about women in the Viking Age is based not on data, but on nineteenth-century Victorian biases. Rather than holding the household keys, Viking women in history, law, saga, poetry, and myth carry weapons. These women brag, "As heroes we were widely known—with keen spears we cut blood from bone." In this compelling narrative Brown brings the world of those valkyries and shield-maids to vivid life.

Illegal Alien Robert J. Sawyer 2011-12-27 When a disabled spaceship enters Earth's atmosphere, seven members of the advanced Tosok race are welcomed by the world. Then a popular scientist is murdered, and all evidence points to one of the Tosoks. Now, an alien is tried in a court of law-and there may be far more at stake than accounting for one human life.

Iron Gold Pierce Brown 2018 "Ten years after the events of Morning Star, Darrow and the Rising are battling the remaining Gold loyalist forces and are closer than ever to abolishing the color-coded caste system of Society for good. But new foes will emerge from the shadows to threaten the imperfect victory Darrow and his friends have earned"--

Machine Habitus Massimo Airoidi 2021-12-13 We commonly think of society as made of and by humans, but with the proliferation of machine learning and AI technologies, this is clearly no longer the case. Billions of automated systems tacitly contribute to the social construction of reality by drawing algorithmic distinctions between the visible and the invisible, the relevant and the irrelevant, the likely and the unlikely – on and beyond platforms. Drawing on the work of Pierre Bourdieu, this book develops an original sociology of algorithms as social agents, actively participating in social life. Through a wide range of examples, Massimo Airoidi shows how society shapes algorithmic code, and how this culture in the code guides the practical behaviour of the code in the

culture, shaping society in turn. The 'machine habitus' is the generative mechanism at work throughout myriads of feedback loops linking humans with artificial social agents, in the context of digital infrastructures and pre-digital social structures. Machine Habitus will be of great interest to students and scholars in sociology, media and cultural studies, science and technology studies and information technology, and to anyone interested in the growing role of algorithms and AI in our social and cultural life.

Red Rising and Philosophy Courtland Lewis 2016-11-10 Red Rising and Philosophy has gathered together a crew of the wisest Helldivers philosophy can offer. Could humanity's love of physical enhancements cause its extinction? Do people doom humanity by trying to all be the same? Can a person love someone, while at the same time wanting that person destroyed? Is equality always the best principle on which to organize society? What is evil, and how does it exist in contemporary life? Does one remain the same person, even after changing every physical aspect of one's

body? Is it moral to sell oneself into slavery, whether it's through sex or manual labor? Is it ethical to sell one's children into slavery, on the promise that their children will live in peace and tranquility? These questions and more are what make Brown's Red Rising trilogy such an impactful story. Brown pulls no punches, and philosophy works best in such an environment. Red Rising and Philosophy is not for the timid or the faint at heart. It's not The Passage, since no one will die from reading it, but reading it could be a life-changing experience.

Snowblind Christopher Golden 2014-01-21 In Christopher Golden's first horror novel in more than a decade--a work reminiscent of early Stephen King--Snowblind updates the ghost story for the modern age. The small New England town of Coventry had weathered a thousand blizzards . . . but never one like this. Icy figures danced in the wind and gazed through children's windows with soul-chilling eyes. People wandered into the whiteout and were never seen again. Families were torn apart, and the town would never be the same. Now, as a new storm approaches twelve years later, the folks of Coventry are haunted by the memories of that dreadful blizzard and those who were lost in the snow. Photographer Jake Schapiro mourns his little brother, Isaac, even as---tonight---another little boy is missing. Mechanic and part-time thief Doug Manning's life has been forever scarred by the mysterious death of his wife, Cherie, and now he's starting over with another woman and more ambitious crimes.
