Stem Cells and the Future of Regenerative Medicine Institute of Medicine 2002-01-25

Recent scientific breakthroughs, celebrity patient advocates, and conflicting religious beliefs have come together to bring the state of stem cell research—specifically embryonic stem cell research—into the political crosshairs. President Bush's watershed policy statement allows federal funding for embryonic stem cell research but only on a limited number of stem cell lines. Millions of Americans could be affected by the continuing political debate among policymakers and the public. Stem Cells and the Future of Regenerative Medicine provides a deeper exploration of the biological, ethical, and funding questions prompted by the therapeutic potential of undifferentiated human cells. In terms accessible to lay readers, the book summarizes what we know about adult and embryonic stem cells and discusses how to go about the transition from mouse studies to research that has therapeutic implications for people. Perhaps most important, Stem Cells and the Future of Regenerative Medicine also provides an overview of the moral and ethical problems that arise from the use of embryonic stem cells. This timely book compares the impact of public and private research funding and discusses approaches to appropriate research oversight. Based on the insights of leading scientists, ethicists, and other authorities, the book offers authoritative recommendations regarding the use of existing stem cell lines versus new lines in research, the important role of the federal government in this field of research, and other fundamental issues.

The Business of Ethnography Brian Moeran 2021-01-08 Can an anthropologist help us

understand the world of business? Armed with this question, veteran anthropologist Brian Moeran embarks on an in-depth study of cultural production and creative industries in Japan. At once the blundering ethnographer and shrewd observer, Moeran is able to shed light not only on social behavior and human relations in general but, more specifically, on the importance of strategic exchange to all business practices. Moeran's fieldwork, rooted in participant-observation of business life in communities and corporations, leads him to an original theory of how business operates. Culture is not all-powerful, Moeran shows. Instead, social structures strongly influence behavior. At the heart of Moeran's analysis is a firm belief in fieldwork and ethnography - terms much bandied about in business, management and cultural studies, but rarely undertaken in depth. *The Business of Ethnography* not only provides a useful methodology for people studying or wishing to understand business, but also acts as a clarion call for anthropologists to rethink their discipline beyond traditional fieldwork sites.

The Pyramid Principle Barbara Minto 2009 "Do you need to produce clear reports, papers, analyses, presentations and memos? If so, you need *The Pyramid Principle*. Communicating your ideas concisely and articulately to clients, colleagues or to the management board is a key factor in determining your personal business success. To gain the maximum effect you need to make maximum impact with your ideas upfront." "Applying the Pyramid Principle means you will save valuable time in writing and waste no time in getting your message across to your audience, making sure they grasp your meaning at once."--BOOK JACKET.

Spaces and Places for Art Anne Whitelaw 2017-04-01 When the Edmonton Museum of Arts

opened in 1924 it was only the second art gallery in Canada west of Toronto. *Spaces and Places for Art* tells the story of the financial and ideological struggles that community groups and artist societies in booming frontier cities and towns faced in establishing spaces for the cultivation of artistic taste. Mapping the development of art institutions in western Canada from the founding of the Winnipeg Art Gallery in 1912 to the 1990s heyday of art museums in Manitoba, Saskatchewan, Alberta, and British Columbia, Anne Whitelaw provides a glimpse into the production, circulation, and consumption of art in Canada throughout the twentieth century. Initially dependent on paintings loaned from the National Gallery of Canada, art galleries across the western part of the country gradually built their own collections and exhibitions and formed organizations that made them less reliant on institutions and government agencies in Ottawa. Tracing the impact of major national arts initiatives such as the Massey Commission, the funding programs of the Canada Council, and the policies of the National Museums Corporation, Whitelaw sheds light on the complex relationships between western Canada and Ottawa surrounding art. Building on extensive archival research and in-depth analysis of government involvement, *Spaces and Places for Art* is an invaluable explanation of the roles of cultural institutions and cultural policy in the emergence of artistic practice in Canada.

The Fourth Industrial Revolution Klaus Schwab 2017-01-03 The founder and executive chairman of the World Economic Forum on how the impending technological revolution will change our lives We are on the brink of the Fourth Industrial Revolution. And this one will be unlike any other in human history. Characterized by new technologies fusing the physical, digital and biological worlds, the Fourth Industrial Revolution will impact all disciplines, economies and industries - and it will do so at an unprecedented rate. World Economic Forum data predicts that by 2025 we will see: commercial use of nanomaterials 200 times stronger than steel and a million times thinner than human hair; the first transplant of a 3D-printed liver; 10% of all cars on US roads being driverless; and much more besides. In The Fourth Industrial Revolution, Schwab outlines the key technologies driving this revolution, discusses the major impacts on governments, businesses, civil society and individuals, and offers bold ideas for what can be done to shape a better future for all.

Majority of One: Legislative Life George W. Scott 2010-06-03 Praise for A Majority of One: By far the best description of a state legislatures real operation in print from a legislator who knew what was happening and why Slade Gorton (R) Former and Majority Leader Washington State House of Representatives, Washington State Attorney General and U.S. Senator Senator George Scott has provided us with a warm, insightful appreciation of the legislative process that few outsiders can offer. This is a must read for students of state

government Phil Talmadge (D) Former Washington State Senator and State Supreme Court Justice. Legislative leaders are activists. George Scott is also a trained historian. Majority is a unique, inclusive insiders firsthand look at legislating, documented in depth. It is the place to start for students of the process, campaigners, legislators and those who care about politics Jeannette Hayner (R) Former Member of the House. Minority, and Majority Leader, Washington State Senate. Anyone who cares about representative government must read this book. George Scott captures the essence of legislative action with the knowledge only an insider can bring. He does it with perception, wit and humor. Daniel J. Evans (R) Former State House Majority Leader, Governor, and U.S. Senator. Rarely, and I am tempted to say never, do we find an insiders political savvy combined with the scholarly analysis that George Scott devotes to A Majority of One. Scott is unmatched in his command of the voluminous archival source materials involved here and his use of firsthand experience in weaving them into an absorbing account. This book is a practical guide for understanding the grassroots politics and placing these practices in the bigger picture of local, state, and national affairs. A Majority of One is a must read for both the concerned citizen and the political pro. David H. Stratton Professor Emeritus of History Washington State University. Resources in Education 1994-08

Love and Ideology in the Afternoon Russell E. Mumford 1995-08-22 "Why do I like soap operas?" Laura Stempel Mumford asks, and her answer emerges in a feminist analysis of soap opera that participates in current debates about popular culture, television, and ideology. She argues that the conventional daytime soap has an implicit and at times explicit political agenda that cooperates in the "teaching" of male dominance and the related oppressions of racism, classism, and heterosexism -- so that they seem inevitable. All My Children, General Hospital, Another World, One Life to Live, Days of Our Lives, The Young and the Restless: a close reading of their texts will also answer some larger questions about television and its place in the broad landscape of popular culture.

Reinventing the Product Eric Schaeffer 2019-03-03 Digital technology is simultaneously friend and foe: highly disruptive, yet it cannot be ignored. Companies that fail to make use of it put themselves in the line of fire for disintermediation or even eradication. But digital technology is also the biggest opportunity to reposition incumbent product-making businesses by thinking about how they conceive, make, distribute and support the next generation of goods in the marketplace. Reinventing the Product looks at the ways traditional products are transforming into smart connected products and ecosystem platforms at a rate much faster than most organizations think. Eric Schaeffer and David Sovie show how this reinvention is made possible: by AI and digital technologies, such as IoT sensors, blockchain, advanced analytics, cloud and edge computing. They show how to deliver truly

intelligent, and potentially even autonomous, products with the more personalized and compelling experiences that today's users, consumers and enterprises expect. Reinventing the Product makes a stringent case for companies to rethink their product strategy, their innovation and engineering processes, and the entire culture to build the future generations of successful 'living products'. Featuring case studies from global organizations such as Faurecia, Signify, Symmons and Haier and interviews with thought leaders and business executives from top companies including Amazon, ABB, Tesla, Samsung and Google, this book provides practical advice for product-making companies as they embark on, or accelerate, their digitization journey.

CIO Magazine 2004-05-15 CIO magazine, launched in 1987, provides business technology leaders with award-winning analysis and insight on information technology trends and a keen understanding of IT's role in achieving business goals.

All for Beauty Adrienne L. Mclean

Future of Jobs IntroBooks Team Times are changing and the labor markets are under immense burden from the collective effects of various megatrends. Technological growth and grander incorporation of economies along with global supply chains have been an advantage for several workers armed with high skills and in growing occupations. However, it is a challenge for workers with low or obsolete skills in diminishing zones of employment. Business models that are digitalized hire workers as self-employed instead of standard employees. People seem to be working and living longer, but they experience many job changes and the peril of skills desuetude. Inequalities in both quality of job and earnings

have increased in several countries. The depth and pace of digital transformation will probably be shocking. Industrial robots have already stepped in and artificial intelligence is making its advance too. Globalization and technological change predict the great potential for additional developments in labor market performance. But people should be ready for change. A progression of creative annihilation is probably under way, where some chores are either offshored or given to robots. A better world of for jobs cannot be warranted – a lot will be contingent on devising the right policies and institutes in place.

Improving Health in the Community Institute of Medicine 1997-05-21 How do communities protect and improve the health of their populations? Health care is part of the answer but so are environmental protections, social and educational services, adequate nutrition, and a host of other activities. With concern over funding constraints, making sure such activities are efficient and effective is becoming a high priority. Improving Health in the Community explains how population-based performance monitoring programs can help communities point their efforts in the right direction. Within a broad definition of community health, the committee addresses factors surrounding the implementation of performance monitoring and explores the "why" and "how to" of establishing mechanisms to monitor the performance of those who can influence community health. The book offers a policy framework, applies a multidimensional model of the determinants of health, and provides sets of prototype performance indicators for specific health issues. Improving Health in the Community presents an attainable vision of a process that can achieve community-wide health benefits.

Scientific and Medical Aspects of Human Reproductive Cloning National Research Council

2002-06-17 Human reproductive cloning is an assisted reproductive technology that would be carried out with the goal of creating a newborn genetically identical to another human being. It is currently the subject of much debate around the world, involving a variety of ethical, religious, societal, scientific, and medical issues. Scientific and Medical Aspects of Human Reproductive Cloning considers the scientific and medical sides of this issue, plus ethical issues that pertain to human-subjects research. Based on experience with reproductive cloning in animals, the report concludes that human reproductive cloning would be dangerous for the woman, fetus, and newborn, and is likely to fail. The study panel did not address the issue of whether human reproductive cloning, even if it were found to be medically safe, would be "or would not be" acceptable to individuals or society.

Weight Management Institute of Medicine 2003-12-01 The primary purpose of fitness and body composition standards in the U.S. Armed Forces has always been to select individuals best suited to the physical demands of military service, based on the assumption that proper body weight and composition supports good health, physical fitness, and appropriate military appearance. The current epidemic of overweight and obesity in the United States affects the military services. The pool of available recruits is reduced because of failure to meet body composition standards for entry into the services and a high percentage of individuals exceeding military weight-for-height standards at the time of entry into the service leave the military before completing their term of enlistment. To aid in developing strategies for prevention and remediation of overweight in military personnel, the U.S. Army Medical Research and Materiel Command requested the Committee on Military Nutrition Research to review the scientific evidence for: factors that influence body weight, optimal components of a weight loss and weight maintenance program, and the role of gender, age, and ethnicity in weight management.

Society's Choices Institute of Medicine 1995-03-27 Breakthroughs in biomedicine often lead to new life-giving treatments but may also raise troubling, even life-and-death, quandaries.

Society's Choices discusses ways for people to handle today's bioethics issues in the context of America's unique history and culture--and from the perspectives of various interest groups. The book explores how Americans have grappled with specific aspects of bioethics through commission deliberations, programs by organizations, and other mechanisms and identifies criteria for evaluating the outcomes of these efforts. The committee offers recommendations on the role of government and professional societies, the function of commissions and institutional review boards, and bioethics in health professional education and research. The volume includes a series of 12 superb background papers on public moral discourse, mechanisms for handling social and ethical dilemmas, and other specific areas of controversy by well-known experts Ronald Bayer, Martin Benjamin, Dan W. Brock, Baruch A. Brody, H. Alta Charo, Lawrence Gostin, Bradford H. Gray, Kathi E. Hanna, Elizabeth Heitman, Thomas Nagel, Steven Shapin, and Charles M. Swezey.
