Aurora Burning Amie Kaufman 2020-05-05 NEW YORK TIMES BESTSELLING SERIES • Our heroes are back . . . kind of. From the bestselling co-authors of the Illuminae Files comes the second book in the epic Aurora Cycle series about a squad of misfits, losers, and discipline cases who just might be the galaxy's best hope for survival. First, the bad news: an ancient evil--you know, your standard consume-all-life-in-the-galaxy deal--is about to be unleashed. The good news? Squad 312 is standing by to save the day. They've just got to take care of a few small distractions first. Like the clan of gremps who'd like to rearrange their favorite faces. And the cadre of illegit GIA agents with creepy flowers where their eyes used to be, who'll stop at nothing to get their hands on Auri. Then there's Kal's long-lost sister, who's not exactly happy to see her baby brother, and has a Syldrathi army at her back. With half the known galaxy on their tails, Squad 312 has never felt so wanted. When they learn the Hadfield has been found, it's time to come out of hiding. Two centuries ago, the colony ship vanished, leaving Auri as its sole survivor. Now, its black box might be what saves them. But time is short, and if Auri can't learn to master her powers as a Trigger, the squad and all their admirers are going to be deader than the Great Ultrasaur of Abraaxis IV. Shocking revelations, bank heists, mysterious gifts, inappropriately tight bodysuits, and an epic firefight will determine the fate of the Aurora Legion's most unforgettable heroes--and maybe the rest of the galaxy as well.

Pre-text, Text, Context Robert L. Mitchell 1980 The nineteenth century in France is a nightmare for literary historians. Their thirst for categorization is more easily quenched by prior centuries, to which, because they seem unified by cohesive preoccupations and common goals, such appellations as the Renaissance, the Classical Age or le grand siècle, and the Enlightenment or Age of Ideas are appropriately applied. For the protean nineteenth century, for which no such handy tag has been or can be devised, is beyond all else distinguished by extreme heterogeneity and eclecticism. A period of chaotic social and political instability, of scientific and industrial revolution, it is, in literature, a time, not of solidarity, but of unprecedented individualism. Collective social consciousness yields to isolated probings into the uncharted recesses of the human mind and soul, and revolt agains standardized (even valorized) literary practice is seen in such developments as the slow undermining of the "accepted" literary lexicon, and of the qualities of unity, clarity, and reason, and in a radical overhauling of the system of prosody. If such diversity precludes coherence in nineteenth-century French literature, it can itself be recognized as the 2organizing3 element of this literary epoch. And it is precisely this paradox that the essays in this volume intend to reflect. They are not unified, as orthodox might dictate, by a common approach or theme or author. Rather they are marked, as was the century that is their context, by divergence and variety, not harmony and consistency. Multiformity in theme is reflected in discussions of such varied topics as pygmalionism, allegory, mirage, self-consciousness, plagiarism, madness, feminism, the grotesque, dance, and alchemy, which are addressed, in turn, from a variety of critical approaches: thematic, intertextual, historical, stylistic, psychocritical, sociological, and semiotic. Eclecticism, indeed, has shaped the basic conception of the collection. Part 1 examines themes, presented as "pretext", that inform either authorial motivation or the orientation of a text prior to its actual inscription. Part 2 approaches the process of writing from the perspective of the text itself. And Part 3 is concerned with those spatial, temporal, and linguistic elements (context) that surround the literary text.
