Schools for All Kinds of Minds Mary-Dean Barringer 2010-03-29 This book shows how schools can--and must--develop expertise in "learning variation" (understanding how different kinds of minds learn) and apply this knowledge to classroom instruction in order to address the chronic learning challenges and achievement gap faced by millions of students. Barringer shows how using what we know about learning variation with a focus on discovering learning strengths, not just deficits, can help schools create plans for success for those students who often find it elusive. The book specifically addresses how school leaders can incorporate this knowledge into instructional practice and school-level policy through various professional development strategies. Schools for All Kinds of Minds: Provides a readable synthesis of the latest research from neuroscience, cognitive science, and child and adolescent development as it relates to understanding learning and its many variations. Links this information to strategies for understanding struggling learners and adapting school practices to accommodate a wider array of learning differences in a classroom. Demonstrates how this understanding of learning variation can change the way teachers and others help students succeed in various academic and content areas and acquire necessary 21st century skills. Includes discussion questions and facilitator guidelines for staff developers and teacher education programs; downloadable forms that accompany exercises from within the book; an action plan for schools to implement the ideas found in the book; and more.

Word Crafting Cindy Marten 2003 At long last, a spelling and vocabulary book written by a classroom teacher who's a literacy specialist, too Cindy Marten responds to the demand for "direct, systematic, and explicit phonics and spelling instruction" that goes way beyond what to teach - she addresses the questions of how, when, and why spelling should be taught. More important, she situates spelling within the contexts of real writing and the individual learner's needs. In Word Crafting, Marten offers an approach that is at once playful, intellectual, and artful, engaging students in inquiry and wonder about words. "Word crafting" is analogous to the ways fine woodworkers develop their skills - through collecting the right tools, item by item, until they have a toolbelt full of them. The same is true for teaching spelling and here Marten supplies the tools, each one carefully selected for her students. Dip into her book for tools to: assess and group students for effective instruction engage them from the start in smart word study help students learn high-frequency words, rules, patterns, and spelling demons align your teaching with school, district, state, and national mandates. Use these tools to set up word-crafting contexts that connect the study of words to authentic reading and writing. Craft a word study program that turns your students into more than good spellers - they'll be fine word crafters.

Handbook of Reading Research Michael L. Kamil 2014-04-08 In Volume III, as in Volumes I and II, the classic topics of reading are included--from vocabulary and comprehension to reading instruction in the classroom--and, in addition, each contributor was asked to include a brief history that chronicles the legacies within each of the volume's many topics. However, on the whole, Volume III is not about tradition. Rather, it explores the verges of reading research between the time Volume II was published in 1991 and the research conducted after this date. The editors identified two broad themes as representing the myriad of verges that have emerged since Volumes I and II were published: (1) broadening the definition of reading, and (2) broadening the reading research program. The particulars of these new themes and topics are addressed.
