Village Swaraj by M.K. Gandhi M. K. GANDHI 2021-01-01 According to Gandhiji, ideal society is a Stateless democracy, the state of enlightened anarchy where social life has become so perfect that it is self-regulated. "In the ideal state, there is no political power because there is no State." Gandhiji believed that perfect realization of an ideal is impossible. However "the ideal is like Euclid's line that is one without breadth but no one has so far been able to draw it and never will. Village Swaraj as conceived by Gandhiji is thus a genuine and virile democracy which offers a potent cure for many of the political ills that mark the present political systems. Such a pattern of decentralized genuine democracy will have a message for the whole of humanity.

Looptail Bruce Poon Tip 2013-09-17 This book combines an extraordinary first-person account of an entrepreneurial instinct to start and develop a highly-successful international travel adventure company and reveals unusual management secrets that not only keep employees fully engaged but also keep customers extremely happy. After being fired from McDonald's as a teenager, Poon Tip decided that if he wanted to be successful in life, he would need to be self employed. To do that, he started G Adventures in 1990 with financing based upon his maxed-out credit cards. But the results were startling: people loved going on vacations to exotic spots around the world where they dealt with adventure and action. G Adventures is not for the faint of heart - it's for people who want to get away AND have memories to cherish for a lifetime. What makes G Adventures so successful? Poon Tip has created an entirely new and refreshing approach to management, which is related in LOOPTAIL. In his company, there's no CEO - but there is a company Mayor. There is no HR dept - but there is a Talent Agency and a company Culture Club. Poon Tip even offers any employee a check for \$5,000 if he or she can actually hurt his feelings with less than positive feedback about the company and how it's being run, So far, nobody has claimed the prize.

Unruly Waters Sunil Amrith 2018-12-06 Asia's history has been shaped by its waters. In Unruly Waters, historian Sunil Amrith reimagines Asia's history through the stories of its rains, rivers, coasts, and seas - and of the weather-watchers and engineers, mapmakers and farmers who have sought to control them. Looking out from India, he shows how dreams and fears of water shaped visions of political independence and economic development, provoked efforts to reshape nature through dams and pumps, and unleashed powerful tensions within and between nations. Today, Asian nations are racing to construct hundreds of dams in the Himalayas, with dire environmental impacts; hundreds of millions crowd into coastal cities threatened by cyclones and storm surges. In an age of climate change, Unruly Waters is essential reading for anyone seeking to understand not only Asia's past and its future.

INDIA'S NEW CAPITALISTS Harish Damodaran 2018-11-25 It's no secret that certain social groups have predominated India's business and trading history, with business traditionally being the preserve of particular 'Bania' communities. However, the past four or so decades have seen a widening of the social base of Indian capital, such that the social profile of Indian business has expanded beyond recognition, and entrepreneurship and commerce in India are no longer the exclusive bastion of the old mercantile castes. In this meticulously researched book – acclaimed for being the first social history to document and understand India's new entrepreneurial groups – Harish Damodaran looks to answer who the new 'wealth creators' are, as he traces the transitional entry of India's middle and lower peasant castes into the business world. Combining analytical rigour with journalistic flair, India's New Capitalists is an essential read for anyone seeking to understand the culture and evolution of business in contemporary South Asia.

Health and Safety Aspects of Food Processing Technologies Abdul Malik 2019-10-31 Food processing is expected to affect content, activity and bioavailability of nutrients; the health-promoting capacity of food products depends on their processing history. Traditional technologies, such as the use of antimicrobials and thermal processing, are efficient in increasing nutritional value to an extent, though they may not be effective at addressing food safety, particularly when it comes to maintaining the food's molecular structure. Modern food processing plants improve the quality of life for people with allergies, diabetics, and others who cannot consume some common food elements. Food processing can also add extra nutrients, such as vitamins. Processed foods are often less susceptible to early spoilage than fresh foods and are better suited for long-distance transportation from the source to the consumer. However, food processing can also decrease the nutritional value of foods and introduce hazards not encountered with naturally occurring products. Processed foods often include food additives, such as flavourings and texture-enhancing agents, which may have little or no nutritive value, and may in fact be unhealthy. This book deals with the subject of food processing in a unique way, providing an overview not only of current techniques in food processing and preservation (i.e., dairy, meat, cereal, vegetables, fruits and juice processing, etc.) but also the health and safety aspects: food technologies that improve nutritional quality of foods, functional foods, and nanotechnology in the food and agriculture industry. The text also looks into the future by defining current bottlenecks and future research goals. This work will serve as a ready reference for the subject matter to students and researchers alike.

Ancient Roots, New Shoots Bertus Haverkort 2003-03 Knowledge has become a buzzword of the age. In the North, people talk of the knowledge-based economy; in the South, the World Bank now defines itself as a knowledge institution. But the question is: whose knowledge? This collection of general reflections and practical experiences illustrates the inappropriateness of a Western model in many local settings, and the positive value of non-Western systems of knowledge, values and ways of doing things. It shows how traditional knowledge is being recognised in the botanical and agricultural sectors - local medicinal herbs, local seed varieties and animal breeds, local methods of pest control. The projects illustrate the notion of endogenous development, or development from within. They show how development can be based on locally available natural resources and local knowledge, values and leadership institutions; how development options can be locally determined; and how to retain the benefits of development within local areas and communities. Endogenous development is not a total solution, but complementary to ongoing modern technological and global economic processes. But the remarkable experiments described do show the rich benef

The Emergence of Modern Hinduism Richard S. Weiss 2019-07-16 The Emergence of Modern Hinduism argues for the importance of regional, vernacular innovation in processes of Hindu modernization. Scholars usually trace the emergence of modern Hinduism to cosmopolitan reform movements, producing accounts that overemphasize the centrality of elite religion and the influence of Western ideas and models. In this study, the author considers religious change on the margins of colonialism by looking at an important local figure, the Tamil Shaiva poet and mystic Ramalinga Swami (1823–1874). Weiss narrates a history of Hindu modernization that demonstrates the transformative role of Hindu ideas, models, and institutions, making this text essential for scholarly audiences of South Asian history, religious studies, Hindu studies, and South Asian studies. Babaji and the 18 Siddha Kriya Yoga Tradition Marshall Govindan 1991 The first authoritative biography of Babaji, the immortal master made famous by Yogananda's Autobiography of a Yogi, an all-time best-seller.
