New England and the Bavarian Illuminati Vernon Stauffer 2005 The rift between the nation's two political parties is caused by a Conspiracy! New England the Bavarian Illuminati is the history of the Illuminati scare that occurred in America at the end of the eighteenth century. It tells how the Federalists, including the New England clergy in particular, seized upon the idea that the Illuminati were behind the actions of the Democrats. Only a far-reaching conspiracy could explain the irreverent habits and searing attacks of the Jeffersonians. Fear of the secret Democratic Clubs, magnified by fear of the French Jacobins, made such a conspiracy readily believable. Dr. Stauffer ably details the state of American politics and religion before and after the American Revolution. He recounts the known history of the Illuminati, and reviews how knowledge of the secret organization was transmitted to America. The conspiracy alarm is traced in detail, from the first announcement of the existence of the Illuminati given during a sermon, through the heated and virulent debates in newspapers and pamphlets, and finally to the decline of the public spectacle under counter-attacks and satirical mockery. This study of the Illuminati in New England was originally published in 1918. Acclaimed from its first printing, it has since then developed a respectable position as one of the most competent and important histories on the shadowy Order of the Illuminati.

The Moment of Everything Shelly King 2014-09-02 In the tradition of The Cookbook Collector comes a funny, romantic novel about a young woman finding her calling while saving a used bookstore. Maggie Dupriv@s, recently "involuntarily separated from payroll" at a Silicon Valley startup, is whiling away her days in The Dragonfly's Used Books, a Mountain View institution, waiting for the Next Big Thing to come along. When the opportunity arises for her to network at a Bay Area book club, she jumps at the chance-even if it means having to read Lady Chatterley's Lover, a book she hasn't encountered since college, in an evening. But the edition she finds at the bookstore is no Penguin Classics Chatterley-it's an ancient hardcover with notes in the margins between two besotted lovers of long ago. What Maggie finds in her search for the lovers and their fate, and what she learns about herself in the process, will surprise and move readers. Witty and sharp-eyed in its treatment of tech world excesses, but with real warmth at its core, The Moment of Everything is a wonderful read.

Lost and Found Sarah Jakes 2014-04-01 Don't let your past keep you from a full future. Like every girl, Sarah Jakes dreamed of a life full of love, laughter, and happy

endings. But her dreams changed dramatically when she became pregnant at age thirteen, a reality only compounded by the fact that her father, Bishop T.D. Jakes, was one of the most influential megachurch pastors in the nation. As a teen mom and a high-profile preacher's kid, her road was lonely. She was shunned at school, gossiped about at church. And a few years later, when a fairy-tale marriage ended in a spiral of hurt and rejection, she could have let her pain dictate her future. Instead, she found herself surrounded by a God she'd given up on, crashing headlong with Him into a destiny she'd never dreamed of. Sarah's captivating story, unflinchingly honest and deeply vulnerable, is a vivid reminder that God can turn even the deepest pain into His perfection. More than a memoir, *Lost and Found* offers hope and encouragement. Perhaps you, like Sarah, find yourself wandering the detours of life. Regardless of how lost you feel, you, too, can be found.

Looptail Bruce Poon Tip 2013-09-17 This book combines an extraordinary first-person account of an entrepreneurial instinct to start and develop a highly-successful international travel adventure company and reveals unusual management secrets that not only keep employees fully engaged but also keep customers extremely happy. After being fired from McDonald's as a teenager, Poon Tip decided that if he wanted to be successful in life, he would need to be self employed. To do that, he started G Adventures in 1990 with financing based upon his maxed-out credit cards. But the results were startling: people loved going on vacations to exotic spots around the world where they dealt with adventure and action. G Adventures is not for the faint of heart - it's for people who want to get away AND have memories to cherish for a lifetime. What makes G Adventures so successful? Poon Tip has created an entirely new and refreshing approach to management, which is related in LOOPTAIL. In his company, there's no CEO - but there is a company Mayor. There is no HR dept - but there is a Talent Agency and a company Culture Club. Poon Tip even offers any employee a check for \$5,000 if he or she can actually hurt his feelings with less than positive feedback about the company and how it's being run. So far, nobody has claimed the prize.

The Causal Effect of Studying on Academic Performance Todd R. Stinebrickner 2007 Despite the large amount of attention that has been paid recently to understanding the determinants of educational outcomes, knowledge of the causal effect of the most fundamental input in the education production function - students' study time and effort - has remained virtually non-existent. In this paper, we examine the causal effect of studying on grade performance using an Instrumental Variable estimator. Our approach takes advantage of a unique natural experiment and is possible because we have collected unique longitudinal data that provides detailed information about all aspects of this experiment. Important for understanding the potential impact of a wide array of education policies, the results suggest that human capital accumulation is far from predetermined at the time of college entrance.

How to Host a Viking Funeral Kyle Scheele 2022-02-08 An inspiring speaker and artist asked 20,000 people around the world to share the regrets they wanted him to burn in a mock Viking ship. This is the story of what he learned about letting go of the pain of the past and embracing the future with hope. Turning 30, artist and speaker Kyle Scheele wanted to do something unusual to mark this milestone. Instead of a birthday bash, he decided to hold a funeral to memorialize the decade of his life that was ending. Building a 16-foot Viking ship out of cardboard, he invited friends to help him set it on fire—a symbolic farewell to his 20s and all the grief, regret, and mistakes that accompanied those years. When video of his Viking funeral went viral, it encouraged many others to let go of past hurts as well. Moved by the response he received, Kyle planned a second funeral (this time with a 30-foot cardboard Viking ship) and asked people to share the things they carried—the bad choices, disappointments, heartaches, and negative thinking that they wanted to lay to rest. He received more than 20,000 responses from around the world—stories both heartbreaking and hilarious, painful and inspiring. In this entertaining and wise book, Kyle reflects on what he discovered about freeing ourselves from the pain of the past, interweaving anecdotes from those who participated with the story of his own journey of renewal. “This story involves multiple Viking funerals, thousands of square feet of cardboard, and enough hot glue to supply your mother-in-law's craft night for the rest of time,” he writes. “But it also involves regret, self-doubt, insecurity, and ultimately, redemption. So buckle up. It's about to get bumpy.” *How to Host a Viking Funeral* is the story of letting go of the people we used to be, but

no longer want to be. It's about renewal; where there was once regret there is now blank space—an opportunity for a fresh start.

You Can Do Anything George Anders 2017-08-08 In a tech-dominated world, the most needed degrees are the most surprising: the liberal arts. Did you take the right classes in college? Will your major help you get the right job offers? For more than a decade, the national spotlight has focused on science and engineering as the only reliable choice for finding a successful post-grad career. Our destinies have been reduced to a caricature: learn to write computer code or end up behind a counter, pouring coffee. Quietly, though, a different path to success has been taking shape. In *You Can Do Anything*, George Anders explains the remarkable power of a liberal arts education - and the ways it can open the door to thousands of cutting-edge jobs every week. The key insight: curiosity, creativity, and empathy aren't unruly traits that must be reined in. You can be yourself, as an English major, and thrive in sales. You can segue from anthropology into the booming new field of user research; from classics into management consulting, and from philosophy into high-stakes investing. At any stage of your career, you can bring a humanist's grace to our rapidly evolving high-tech future. And if you know how to attack the job market, your opportunities will be vast. In this book, you will learn why resume-writing is fading in importance and why "telling your story" is taking its place. You will learn how to create jobs that don't exist yet, and to translate your campus achievements into a new style of expression that will make employers' eyes light up. You will discover why people who start in eccentric first jobs - and then make their own luck - so often race ahead of peers whose post-college hunt focuses only on security and starting pay. You will be ready for anything.

The Letters to the Colossians and to Philemon Douglas J. Moo 2008-08-25 Using the same brilliant exegesis and sound practical insight found in his previous work, Douglas J. Moo here not only accurately explains the meaning of the Letters to the Colossians and to Philemon, but also applies that meaning to twenty-first-century readers. Moo introduces each book with a series of five similar questions: To whom was it written? Who wrote it? When? Why? and What? He then divides the commentary itself into Letter Opening, Letter Body, and Letter Closing for each book, addressing the introductory thanksgiving of Philemon as well. The volume ends with thorough indexes of names, subjects, scripture references, and extrabiblical literature. Informed, methodologically astute, evangelical, and displaying a careful balance between good scholarship and pastoral concern, *The Letters to the Colossians and to Philemon* is readily accessible, offering something for everyone -- teacher or student, pastor or parishioner, scholar or layperson.

Bamboo Stone Karen Minden, Ph.d. 2014-11-12 In the late nineteenth century, Canadian missionaries developed a medical training program for Chinese students in the city of Chengdu, Sichuan Province, in southwestern China. From modest beginnings, the training evolved into a medical and dental college at West China Union University, a joint venture by five Western mission boards. The college provided an institutional setting for the interaction of two cultures for the transmission of Western medical knowledge. Minden describes both the process and the longterm implications by tracing the history of the college and the careers of its students and faculty. The school's history is linked to the political turmoil that has troubled China since the fall of the Qing Dynasty in 1911. Minden follows the progress of the college from 1888, taking the reader through the Sino-Japanese war in the 1930s, the Civil War of 1945-9, and the political upheavals in the People's Republic of China. She also explores the background, motivations, and campus life of both students and faculty, and follows their careers up to 1989. Based on extensive interviews and archival research in Canada, the United States and China, this study charts the range of human hope and despair during a turbulent period of history. It contributes to our understanding of the role of Canadian medical missionaries as agents of change in pre-revolutionary China, and elucidates the cross-cultural transfer of technological knowledge.

Mass Higher Education Development in East Asia Jung Cheol Shin 2015-02-16 This book discusses mass higher education development in East Asian countries by means of three main issues: the strategy for higher education development; the way professors and students in the region are experiencing the rapid developments; and the challenges imposed by mass higher education. These challenges include the quality of education as well as structural changes in the rapidly developing systems, funding sources for supporting mass higher education, and job markets for college graduates. Part I discusses how the East Asian countries have accomplished or are in the process of accomplishing the rapid development of higher education. Japan, Korea, China, Taiwan, Malaysia, Singapore, and Hong Kong serve as case studies of mass higher education in the region. The case studies introduce and discuss national strategies to develop higher education, funding sources and mechanisms, and initiatives to assure quality of education in a period of rapid growth. Part II and Part III of the book focus on the phenomena of mass higher education in the region and the influence on academia. Mass higher education changes professors and students, who are different from those in elite higher education. Part III further discusses the challenges posed to Asian mass higher education. The Comparative and International Education Society Higher Education (HESIG) has awarded Mass Higher Education Development in East Asia the Higher Education SIG Best Book Award 2015.

Lianda John Israel 1999-01-01 In the summer of 1937, Japanese troops occupied the campuses of Beijing's two leading universities, Beida and Qinghua, and reduced Nankai, in Tianjin, to rubble. These were China's leading institutions of higher learning, run by men educated in the West and committed to modern liberal education. The three universities first moved to Changsha, 900 miles southwest of Beijing, where they joined forces. But with the fall of Nanjing in mid-December, many students left to fight the Japanese, who soon began bombing Changsha. In February 1938, the 800 remaining students and faculty made the thousand-mile trek to Kunming, in China's remote, mountainous southwest, where they formed the National Southwest Associated University (Lianda). In makeshift quarters, subject to sporadic bombing by the Japanese and shortages of food, books, and clothing, students and professors did their best to conduct a modern university. In the next eight years, many of China's most prominent intellectuals taught or studied at Lianda. This book is the story of their lives and work under extraordinary conditions. Lianda's wartime saga crystallized the experience of a generation of Chinese intellectuals, beginning with epic journeys, followed by years of privation and endurance, and concluding with politicization, polarization, and radicalization, as China moved from a war of resistance against a foreign foe to a civil war pitting brother against brother. The Lianda community, which had entered the war fiercely loyal to the government of Chiang Kai-shek, emerged in 1946 as a bastion of criticism of China's

ruling Guomindang party. Within three years, the majority of the Lianda community, now returned to its north China campuses in Beijing and Tianjin, was prepared to accept Communist rule. In addition to struggling for physical survival, Lianda's faculty and students spent the war years striving to uphold a model of higher education in which modern universities, based in large part on the American model, sought to preserve liberal education, political autonomy, and academic freedom. Successful in the face of wartime privations, enemy air raids, and Guomindang pressure, Lianda's constituent universities eventually succumbed to Communist control. By 1952, the Lianda ideal had been replaced with a politicized and technocratic model borrowed from the Soviet Union.

Higher Education in the Asia-Pacific Simon Marginson 2011-08-21 This survey provides unprecedented scope and detail of analysis on higher education in the Asia-Pacific region. In this era of global integration, convergence and comparison, the balance of power in worldwide higher education is shifting. In less than two decades the Asia-Pacific region has come to possess the largest and fastest growing higher education sector on Earth. The countries of East and Southeast Asia and the Western Pacific together enrol 50 million tertiary students, compared to 14 million in 1991, and will soon conduct a third of all research and development. In China, Hong Kong, Taiwan, Korea and Singapore, 'world-class' universities are emerging at breakneck pace, fostered by modernizing governments that see knowledge and skills as key to a future shaped equally by East and West, and supported by families deeply committed to education. But not all Asia-Pacific countries are on this path, not all reforms are effective, and there are marked differences between nations in levels of resources, educational participation, research, state controls and academic freedom. Higher Education in the Asia-Pacific: Strategic responses to globalization provides an authoritative survey of tertiary education in this diverse and dynamic region. Its 23 chapters, written by authors from a dozen different countries, focus successively on the Asia-Pacific as a whole, the strategies of individual universities, and national policies and strategies in response to the global challenge.

Thinking in New Boxes Luc De Brabandere 2013-09-10 When BIC, manufacturer of disposable ballpoint pens, wanted to grow, it looked for an idea beyond introducing new sizes and ink colors. Someone suggested lighters. LIGHTERS? With an idea that seemed crazy at first, that bright executive, instead of seeing BIC as a pen company—a business in the PEN “box”—figured out that there was growth to be found in the DISPOSABLE “box.” And he was right. Now there are

disposable BIC lighters, razors, even phones. The company opened its door to a host of opportunities. IT INVENTED A NEW BOX. Your business can, too. And simply thinking “out of the box” is not the answer. True ingenuity needs structure, hard analysis, and bold brainstorming. It needs to start THINKING IN NEW BOXES—a revolutionary process for sustainable creativity from two strategic innovation experts from The Boston Consulting Group (BCG). To make sense of the world, we all rely on assumptions, on models—on what Luc de Brabandere and Alan Iny call “boxes.” If we are unaware of our boxes, they can blind us to risks and opportunities. This innovative book challenges everything you thought you knew about business creativity by breaking creativity down into five steps: • Doubt everything. Challenge your current perspectives. • Probe the possible. Explore options around you. • Diverge. Generate many new and exciting ideas, even if they seem absurd. • Converge. Evaluate and select the ideas that will drive breakthrough results. • Reevaluate. Relentlessly. No idea is a good idea forever. And did we mention Reevaluate? Relentlessly. Creativity is paramount if you are to thrive in a time of accelerating change. Replete with practical and potent creativity tools, and featuring fascinating case studies from BIC to Ford to Trader Joe’s, Thinking in New Boxes will help you and your company overcome missed opportunities and stay ahead of the curve. This book isn’t a simpleminded checklist. This is Thinking in New Boxes. And it will be fun. (We promise.) Praise for Thinking in New Boxes “Excellent . . . While focusing on business creativity, the principles in this book apply anywhere change is needed and will be of interest to anyone seeking to reinvent herself.”—Blogcritics “Thinking in New Boxes is a five-step guide that leverages the authors’ deep understanding of human nature to enable readers to overcome their limitations and both imagine and create their own futures. This book is a must-read for people living and working in today’s competitive environment.”—Ray O. Johnson, Ph.D., chief technology officer, Lockheed Martin “Thinking In New Boxes discusses what I believe to be one of the fundamental shifts all companies/brands need to be thinking about: how to think creatively, in order to innovate and differentiate our brands. We need to thrive and lead in a world of accelerating change and this book challenges us to even greater creativity in our thinking. One of the best business books I’ve read in a long time.”—Jennifer Fox, CEO, Fairmont Hotels & Resorts “As impressive as teaching new tricks to old dogs, Thinking in New Boxes is both inspirational and practical—a comprehensive, step-by-step guide to sharpening one’s wits in order to harness creativity in the workplace.”—Peter Gelb, general manager, Metropolitan Opera

The Ball is Round David Goldblatt 2007-08-30 THE DEFINITIVE, CRITICALLY ACCLAIMED BOOK ABOUT FOOTBALL 'Football conquered the world with its capacity to astonish, and this is its definitive history' The Independent There may be no cultural practice more global than soccer. Rites of birth and marriage are infinitely diverse, but the rules of soccer are universal. No world religion can match its geographical scope. The single greatest simultaneous human collective experience is the World Cup final. In this extraordinary tour de force, David Goldblatt tells the full story of football's rise from chaotic folk ritual to the world's most popular sport. The Ball Is Round illuminates football's role in the political and social histories of modern societies, but never loses sight of the beauty, joy, and excitement of the game. \_\_\_\_\_ 'Goldblatt writes with authority, humour, and passion, not least in the accounts of famous or significant matches scattered throughout the book' Times Literary Supplement 'Since it became a worldwide phenomenon, nobody has attempted to write an overall history of the game. Now David Goldblatt's stunning book will be the measure against which all other such volumes are judged' The Guardian 'Goldblatt's magnum opus . . . Anyone with a brain and an interest in football will enjoy this book' The Daily Telegraph (London)
