Mega-Schools, Technology and Teachers Sir John Daniel 2010-08-27 The latest addition to The Open and Flexible Learning Series addresses the challenges created by the successes and the failures of the universal primary education campaign. It advocates new approaches for providing access to secondary education for today's rapidly growing youth population.

Ensuring Quality in Professional Education Volume II Karen Trimmer 2019-01-11 This book examines quality teaching in professional education in the fields of engineering and international knowledge structures. The second of a two-volume series, the editors and contributors structure the book around case studies which highlight the elements constituting good practice within professional education. While there is no one specific route to prepare well-qualified professionals, this volume explores the decisions the academics responsible for delivering this education make to ensure quality curricula. Ultimately, the key to effective preparations rests with the value employers place on the focus, emphasis and balance between the academic and practical in relation to their own expectations for skills that graduates must have. The second volume in this collection will appeal to students and scholars of professional pedagogy, and engineering pedagogy more specifically.

The Palgrave Handbook of Anthropological Ritual Studies Pamela J. Stewart 2021-08-24 Ritual Studies have achieved prominence since the 1980s, when interest in ritual as an object of inquiry was established, bridging over a number of humanities and social science disciplines. Both connected with religious studies and independent of it; overlapping with social and cultural anthropology, but also with history; related to science and health practices and ranging across the life course to education, Ritual Studies has come to encompass studies of change and dynamism in social life. Rituals are determinate in form, but not static. They enunciate distinctive social values within specific contexts that frame them; and they relate to the wider concerns and issues of their practitioners. Due to this broad and wide-ranging scope, it is often difficult to find a single resource on Ritual Studies, and even more so to find one which moves beyond the beginnings of anthropological theorizing to grapple with the present-day contexts of ritual. Bringing together recent ethnographies of ritual practice and ritualization from across the globe, this Handbook provides case study of ritual in the light of Emotion and Cognition, Identity, Religious Power, Performance and Literature, Ecology and Ecological Disaster, Media, and other topics. While each chapter provides a deep ethnography of a specific society, ritual, or ritualized practice, each also engages with current theoretical and substantive approaches to the relevant topic. The scholars collected here provide original synoptic and indicative pieces as guideposts and pathways through the complex, varied and cross-disciplinary, and vast landscape of scholarship that constitutes Ritual Studies today and points to developments in the future.

Securing Village Life Scott MacWilliam 2013-05-01 SECURING VILLAGE LIFE: DEVELOPMENT IN LATE COLONIAL PAPUA NEW GUINEA examines the significance for post-World War II Australian colonial policy of the modern idea of development. Australian officials emphasised the importance of bringing development for both the colony of Papua and the United Nations Trust Territory of New Guinea. The principal form that development took involved securing smallholders against the tendencies of other forms of capitalist development that might have separated households from land. In order to make household occupation of their holdings more secure and at higher standards of living, the colonial administration coordinated and supervised increases in production of crops and other agricultural produce. Contrary to suggestions that colonial policy and practice ignored indigenous agriculture and concentrated on plantation crops grown by international firms and expatriate owner-occupiers, the study shows how the main focus was instead upon increasing smallholder output for immediate consumption as well as for local and international markets. Simultaneously development stimulated increases in consumption, including of goods produced through manufacturing processes and imported into the colony. Only as Independence approached was the pre-eminence of the earlier focus upon smallholders weakened. In part the change occurred due to the political advance of the indigenous capitalist class and their allies seeking to extend their base in largeholding agriculture and related commercial activities. This advance and the uncertainty over which form of development would prevail once indigenes held state power in post-colonial Papua New Guinea stood in marked contrast to the definite direction pursued under the colonial administration of the 1950s and early 1960s.

Early Language Learning and Teacher Education Subhan Zein 2019 This book investigates both the theoretical and practical aspects of teacher education for early language teachers. The chapters focus on the complexity of teacher learning, innovations in mentoring and teacher supervision, strategies in programme development and perceptions, and knowledge and assessment in early language learning teacher education.

Indigenous People and Mobile Technologies Laurel Evelyn Dyson 2015-10-05 In the rich tradition of mobile communication studies and new media, this volume examines how mobile technologies are being embraced by Indigenous people all over the world. As mobile phones have revolutionised society both in developed and developing countries, so Indigenous people are using mobile devices to bring their communities into the twenty-first century. The explosion of mobile devices and applications in Indigenous communities addresses issues of isolation and building an environment for the learning and sharing of knowledge, providing support for cultural and language revitalisation, and offering the means for social and economic renewal. This book explores how mobile technologies are overcoming disadvantage and the tyrannies of distance, allowing benefits to flow directly to Indigenous people and bringing wide-ranging changes to their lives. It begins with general issues and theoretical perspectives followed by empirical case studies that include the establishment of Indigenous mobile networks and practices, mobile technologies for social change and, finally, the ways in which mobile technology is being used to sustain Indigenous culture and language.

Bougainville before the conflict Anthony J Regan 2015-08-03 One of the most beautiful island groups of the Pacific, Bougainville has a remarkable history. Tragically, it is as the site of devastating civil conflict that Bougainville is perhaps best known. In exploring the rich environmental, cultural and social heritage of Bougainville before the conflict, this collection provides an insight into the long-term causes of the crisis. In doing so, it surveys such topics as Bougainville's prehistory and traditional cultures, the impact of German and Australian colonialism, the attempts by disparate local cultures to find a common identity, the assertion of political autonomy in the face of coercion to integrate with Papua New Guinea, and contemporary efforts to resolve conflict and plan a viable future. A landmark collaboration between expert commentators on Bougainville and Bougainvilleans themselves, this volume provides a comprehensive picture for those seeking to understand Bougainville's history and future directions.

Bougainville before the conflict was published in association with the State, Society and Governance in Melanesia Project, which is supported by The Australian National University and the Commonwealth of Australia.

The Routledge Handbook of Social Work Field Education in the Global South Rajendra Baikady 2022-07-08 This handbook provides an authoritative account of social work field education in the global south. It presents an overview of various aspects of theory and practice modules in the social work curriculum and advances in research in social work field education in the developing world through in-depth analyses and global case studies. Key features: • Discusses critical issues and new directions in the theory and practice of social work field education, challenges in field work education, decolonising field work training, developing competent social work graduates, aligning fieldwork with cultural practices in indigenous communities, the idea of clinical social work, and a comparative analysis of social work field supervision. • Integrates theory and practice of social work field education for students and teachers from diverse geographical and cultural contexts across the global south, including countries from South Asia and Asia, Africa, and Latin America and the Caribbean, covering India, Bangladesh, Pakistan, Nepal, Sri Lanka, China, Georgia, Philippine, Turkey, Papua New Guinea, Eswatini, Republic of Trinidad & Tobago, Kenya, Nigeria, South Africa, Botswana, Chile, and Barbados. • Brings together international comparative perspectives on field work education in social work from leading experts, social work educators, and social work professionals. This handbook will be an essential resource for scholars and researchers of social work, development studies, social anthropology, sociology, education, South Asian studies, and Global South studies. It will also be useful to educators and practitioners of social work in global institutions of higher studies as well as civil society organisations.

Evaluating Teaching and Learning David Kember 2012-03-12 Every semester, colleges and universities ask students to complete innumerable course and teaching evaluation questionnaires to evaluate the learning and teaching in courses they have taken. For many universities it is a requirement that all courses be evaluated every semester. The laudable rationale is that the feedback provided will enable instructors to improve their teaching and the curriculum, thus enhancing the quality of student learning. In spite of this there is little evidence that it does improve the quality of teaching and learning. Ratings only improve if the instruments and the presentation of results are sufficiently diagnostic to identify potential improvements and there is effective counselling. **Evaluating Teaching and Learning** explains how evaluation can be more effective in enhancing the quality of teaching and learning and introduces broader and more diverse forms of evaluation. This guide explains how to develop questionnaires and protocols which are valid, reliable and diagnostic. It also contains proven instruments that have undergone appropriate testing procedures, together with a substantial item bank. The book looks at the specific national frameworks for the evaluation of teaching in use in the USA, UK and Australia. It caters for diverse methodologies, both quantitative and qualitative and offers solutions that allow evaluation at a wide range of levels: from classrooms to programmes to departments and entire institutions. With detail on all aspects of the main evaluation techniques and instruments, the authors show how effective evaluation can make use of a variety of approaches and combine them into an effective project. With a companion website which has listings of the questionnaires and item bank, this book will be of interest to those concerned with organising and conducting evaluation in a college, university, faculty or department. It will also appeal to those engaged in the scholarship of teaching and learning.

Classroom Change in Developing Countries Gerard Guthrie 2018-04-09 Progressive Education, derived mainly from Anglo-American culture, has been the primary frame of reference for student-centered classroom change in developing countries for over 50 years. Yet in many developing countries, strong evidence shows that progressivism has not replaced teacher-centered formalistic classroom practice. **Classroom Change in Developing Countries: From Progressive Cage to Formalistic Frame** presents a robust case for why formalism should be the primary frame of reference for upgrading classroom teaching in developing countries. Theoretically rich yet grounded in practice, the book draws on case studies from Africa, China and Papua New Guinea to show how culturally intuitive formalistic teaching styles can induce positive classroom change. Synthesising research and evaluation literature on classroom change in developing countries, Guthrie examines some of the methodological flaws in the literature. The book considers the progressive cage, and looks at Confucian influences on teaching in China, progressive reform failures in both Sub-Saharan Africa and Papua New Guinea, as well as offering a critical take on some failings in comparative education. It examines the formalistic frame, addresses methodological issues in culturally grounded research and offers a model of teaching styles for basic classroom research. The book concludes by returning the focus back to teachers and considers the so-called teacher resistance to change. The book will be an essential purchase for academics and research students engaged in the fields of classroom teaching, teacher education and curriculum and will also be of interest to academics, aid officials, and decision-makers in developing countries.

Routledge International Handbook of Social Work Education Imogen Taylor 2016-03-31 The Routledge International Handbook of Social Work Education provides an authoritative overview of current understanding through coverage of key debates, exploring the state of play in particular social work education fields and reflecting on where the future might be taking us. The overall aim of the Handbook is to further develop pedagogic research and scholarship for social work education. Drawing on medical education as an exemplar, the contributors view social work education as a specialism and a field of expertise that counts in the same way as research programmes in more traditional areas of social work practice. The chapters are concerned with the theory and practice of social work education at all levels; they are accessible, conceptually clear, research based where appropriate, critically reflective and ethically underpinned. The Handbook is organised into seven sections that reflect the proposed themes and sub-themes covering: Social work education in context: the western drivers Emerging and re-emerging social work education The scholarship of learning and teaching New insights into field education New directions in learning and teaching Future challenges in social work education This handbook presents a contribution to the process of exchange and dialogue which is essential to global social work education. It brings together professional knowledge and lived experience, both universal and local, and will be an essential reference for social work educators, researchers, students and professionals.

Introduction to Our Laws James Litai 2015-12-14 This book introduces the basics of law in Papua New Guinea, and it targets upper secondary legal studies teachers and students. Everyone in this country, including the educated, other than lawyers needs to know and understand our own laws. The National Education Department's motto is "Prosperity through self-reliance"; thus, this project is one out of many the department is yet to accomplish. No recommended text was available at the time when the new course, legal studies, was introduced in 2010 to be taught as an examinable subject. Newly elevated secondary schools in the country are facing reference material problem. The problem of rare stock of resource material is truly a considerable physical and psychological stress suffered by most teachers in the country. This book was written exactly in line with Upper Secondary Legal Studies syllabus as a text material to be used across the nation in all secondary schools in which Legal Studies course is offered. The subject itself is fundamentally interesting. I enjoyed teaching law for the last six years. I gained the insights of basic introductory law while in the process of teaching and writing this book. Hope you enjoy reading this book, "Introduction to Our Laws" and gain the insights of law.

Tropical Forests Of Oceania Joshua A. Bell 2015-08-31 The tropical forests of Oceania are an enduring source of concern for indigenous communities, for the migrants who move to them, for the states that encompass them within their borders, for the multilateral institutions and aid agencies, and for the non-governmental organisations that focus on their conservation. Grounded in the perspective of political ecology, contributors to this volume approach forests as socially alive spaces produced by a confluence of local histories and global circulations. In doing so, they collectively explore the multiple ways in which these forests come into view and therefore into being. Exploring the local dynamics within and around these forests provides an insight into regional issues that have global resonance. Intertwined as they are with cosmological beliefs and livelihoods, as sites of biodiversity and Western desire, these forests have been and are still being transformed by the interaction of foreign and local entities. Focusing on case studies from Papua New Guinea, the Solomon Islands and the Gambier Islands, this volume brings new perspectives on how Pacific Islanders continue to creatively engage with the various processes at play in and around their forests.

Insights into Modern World History James Litai 2016-05-27 Insights into Modern World History is a material that uses interpretative approach to examine political, social, and economic changes of the twentieth- to twenty-first-century world. A substantially updated approach to 2015 exactly in line with Upper Secondary School Certificate Examination (USSCE) requirements. This book is perfected purposely for Papua New Guinea schools. A convenient text material for both teachers and students to have access and gain the insights of modern world history. The National Department of Educations motto is Prosperity through self reliance; thus this project is one out of many the department is yet to accomplish. Plenty of maps and cartoons are included in each unit. All units are summarized by external exam-type review questions. The trends in Papua New Guinea history beginning 1526 from the first explorer who sited our island to 1884, formal proclamation by Germany and Britain to 1951, the first twenty-nine-member legislative council. The chronology counts on to 1964, first elections to 1973, self-government to 1975, our independence. As I write, the country is turning forty years now. This text material is the 2015 latest version. There are four important chapters included and the chapters are (1) Writing a good Essay, (2) The Chronicles: Key Events of the World, (3) The Chronicles: Key Events of Papua New Guinea, and (4) The Glossary. These chapters gives detailed information chronologically.

The Subtle Art of Not Giving a F*ck Mark Manson 2016-09-13 #1 New York Times Bestseller Over 10 million copies sold In this generation-defining self-help guide, a superstar blogger cuts through the crap to show us how to stop trying to be "positive" all the time so that we can truly become better, happier people. For decades, we've been told that positive thinking is the key to a happy, rich life. "F**k positivity," Mark Manson says. "Let's be honest, shit is f**ked and we have to live with it." In his wildly popular Internet blog, Manson doesn't sugarcoat or equivocate. He tells it like it is—a dose of raw, refreshing, honest truth that is sorely lacking today. The Subtle Art of Not Giving a F**k is his antidote to the coddling, let's-all-feel-good mindset that has infected American society and spoiled a generation, rewarding them with gold medals just for showing up. Manson makes the argument, backed both by academic research and well-timed poop jokes, that improving our lives hinges not on our ability to turn lemons into lemonade, but on learning to stomach lemons better. Human beings are flawed and limited—"not everybody can be extraordinary, there are winners and losers in society, and some of it is not fair or your fault." Manson advises us to get to know our limitations and accept them. Once we embrace our fears, faults, and uncertainties, once we stop running and avoiding and start confronting painful truths, we can begin to find the courage, perseverance, honesty, responsibility, curiosity, and forgiveness we seek. There are only so many things we can give a f**k about so we need to figure out which ones really matter, Manson makes clear. While money is nice, caring about what you do with your life is better, because true wealth is about experience. A much-needed grab-you-by-the-shoulders-and-look-you-in-the-eye moment of real-talk, filled with entertaining stories and profane, ruthless humor, The Subtle Art of Not Giving a F**k is a refreshing slap for a generation to help them lead contented, grounded lives.

An Interdisciplinary Approach for Disaster Resilience and Sustainability Indrajit Pal 2019-10-17 This book includes selected papers presented at the international expert forum on "Mainstreaming Resilience and Disaster Risk Reduction in Education," held at the Asian Institute of Technology, Thailand on 1–2 December 2017. The journey towards disaster risk reduction and resilience requires the participation of a wide array of stakeholders ranging from academics to policymakers, to disaster managers. Given the multifaceted and interdependent nature of disasters, disaster risk reduction and resilience require a multidisciplinary problem-solving approach and evidence-based techniques from the natural, social, engineering, and other relevant sciences. Traditionally, hazard and disaster-related studies have been dominated by the engineering and social science fields. In this regard, the main purpose of this book is to capture the multidisciplinary and multisectoral nature of disaster risk reduction, and to gather existing data, research, conceptual work, and practical cases regarding risk reduction and its ties to sustainable development under a single "umbrella." Along with the sustainability aspect, the book also links disaster risk reduction with development, technology, governance, education, and climate change, and includes discussions on challenges, solutions, and best practices in the mainstreaming of disaster risk reduction.

Planning Climate Smart and Wise Cities Kwi-Gon Kim 2021-12-19 This book provides information that facilitates integrated climate actions in cities, leveraging disruptive technologies, business models, policies, financing, and leadership solutions. It fosters the

development of climate smart and wise cities. It reviews the major developments of climate actions in cities and combines climate environment and energy technology, policy and financing instruments. A range of distinguished authors assess the experiences thus far and also consider future development from both theoretical and practical perspectives. They also discuss many policy and technical options, including climate smart and wise city planning, inclusion of urban nature, international and national carbon market mechanisms and measuring its impact and digital transformation. Moreover, attention is paid to the role of natural principles, the role of transparency principles and to aspects of democratic climate governance within a climate action scheme. This book makes clear that the carbon neutrality, sustainability, circularity, efficiency, connectivity and resiliency of cities depend to a large extent on the specific digital technologies and the leadership reshaping our cities. Discussing multidisciplinary aspects of climate action, this book offers new insights to academics, policymakers and practitioners both in the public and private sectors. Those insights are not only retrospective, relevant for understanding the past, but they are also prospective and forward-looking, guiding the achievements of the SDGs and the climate goals.

Reperforming Greek Tragedy Anna A. Lamari 2017-10-23 An inexplicably understudied field of classical scholarship, tragic reperformance, has been surveyed in its true dimension only in the very recent years. Building on the latest discussions on tragic restagings, this book provides a thorough survey of reperformance of Greek tragedy in the fifth and fourth centuries BC, also addressing its theatrical, political, and cultural context. In the fifth and fourth centuries, tragic restagings were strongly tied to cultural mobility and exchange. Poets, actors, texts, vases, and vase-painters were traveling, bridging the boundaries between mainland Greece and Magna Graecia, boosting the spread of theater, facilitating theatrical literacy, and setting a new theatrical status quo, according to which popular tragic plays were restaged, by mobile actors, in numerous dramatic festivals, in and out of Attica, with or without the supervision of their composers. This book offers a holistic examination of ancient reperformances of tragedy, enhancing our perception of them as a vital theatrical practice that played a major part in the development of the tragic genre in the fifth and fourth centuries BC.

Wicked Valuations Michael McDermott 2018-07-16 Traditional valuation approaches are increasingly recognised as being insufficient to address the wicked valuation problems of the diverse peoples and groups that inhabit the globe from north, south, east to west. This book demonstrates the limitations of science and, in particular economics, as the foundation on which valuations are traditionally based. It demonstrates the importance of and provides justification for the personal, cultural values and norms which underpin our assessment of "value", and the fact that these vary across the world. In *Wicked Valuations* Michael McDermott develops a means of engaging with highly complex valuation problems. His autoethnography provides a lens to draw on knowledge and experience from his 40 years in land valuation in Africa and the Asia-Pacific, while documentary analysis is used to draw in the views of other valuation practitioners and scholars who are becoming increasingly aware of the need to develop ways to adapt land valuation processes to the complexity of our contemporary landscapes.

Administrative Law and Judicial Review in Papua New Guinea Christopher Karaiye 2019-06-18 This is a compendium of administrative law and judicial review in Papua New Guinea. In this book the author precisely recounts the history of the development of administrative law and judicial review in England and some other common law jurisdictions. The main theme of the book is, however, devoted to judicial review in Papua New Guinea. The practice and procedure for appealing from the decision of the National Court in judicial review are unique and onerous. This book evaluates them in detail to give the readers a complete sense of reference. The interlocutory procedures encapsulated in this book are also relevant for any proceeding before the courts. At the end of various chapters, the author makes some insightful and thought-provoking commentaries on gaps found in judicial review. The book is an authoritative text for lawyers, law students, academia, judicial officers and other interested persons alike. It is a must read for lawyers and law students who seek to be familiar with the often cumbersome judicial review procedures and practices. For students and scholars in other disciplines who aim to learn and abreast themselves of how administrative law affects administrative action and public policy, this book is a perfect choice. The book dissects complex administrative law concepts and enables lay persons, including those in the public service, to fully understand and apply them. The book is a valuable resource material for the Pacific Island countries like Fiji, Vanuatu and Solomon Islands, who have adopted the common law legal systems similar to Papua New Guinea.

Hybrid Public Policy Innovations Mark Fabian 2018-03-12 Political discourse in much of the world remains mired in simplistic ideological dichotomies of market fundamentalism for efficiency versus substantial socialism for equity. Contemporary public policy design is far more sophisticated. It blends market, government and community tools to simultaneously achieve both equity and efficiency. Unlike in the twentieth century, this design is increasingly grounded in a deep evidence base derived by way of rigorous empirical techniques. A new paradigm is emerging: hybrid policies. This volume provides a thorough introduction to this technical side of public policy analysis and development. It demonstrates that it is possible to go beyond ideology, and find there some powerful answers to our most pressing problems. An international team of experts, many of whom have experience with the design or implementation of hybrid policies, helps cover the behavioural, institutional and regulatory theories that inform the choice of policy objectives and lead the initial conception of solutions. They explain the reasons why we need evidence-based public policy and the state-of-the-art empirical techniques involved in its development. And they analyse a range of in-depth case studies from industrial relations to health care to illustrate how hybrids can intermingle the strengths of governments, markets and the community to combat the weaknesses of each and arrive at bipartisan outcomes. *Hybrid Public Policy Innovations* is geared to scholars and practitioners of public policy administration and management who desire to understand the analytical reasons why policies are designed the way they are, and the purpose of evidence-gathering frameworks attached to policies at implementation.

Fast Money Schemes John Cox 2018-10-02 In the late 1990s and early 2000s a wave of Ponzi schemes swept through Papua New Guinea, Australia, and the Solomon Islands. The most notorious scheme, U-Vistract, attracted many thousands of investors, enticing them with promises of 100 percent interest to be paid monthly. Its founder, Noah Musingku, was a charismatic leader who promoted the scheme as a form of Christian mission and as the basis for establishing an independent kingdom. *Fast Money Schemes* uses in-depth interviews with investors, newspaper accounts, and participant observation to understand the scheme's appeal from the point of view of those who invested and lost, showing that organizers and investors alike understood the scheme as a way of accessing and participating in a global economy. John Cox delivers a "post-village" ethnography that gives insight into the lives of urban, middle-class Papua New Guineans, a group that is not familiar to US readers and that has seldom been a focus of anthropological interest. The book's concern with understanding the interweaving of morality, finance, and aspirations shared by a global cosmopolitan middle class has wide resonance beyond studies of Papua New Guinea and anthropology.

State and Society in Papua New Guinea, 2001–2021 R. J. May 2022-08-09 ?In a previous volume, *State and Society in Papua New Guinea: The First Twenty-Five Years (2001, reprinted by ANU E Press in 2004)*, a collection of papers by the author published between 1971 and 2001 was put together to mark Papua New Guinea's first 25 years as an independent state. This volume presents a collection of papers written between 2001 and 2021, which update the story of political and social development in Papua New Guinea in the first two decades of the twenty-first century. The chapters cover a range of topics, from an evaluation of proposals for political reform in the early 2000s, a review of the discussion of 'failing states' in the island Pacific and the shift to limited preferential voting in 2007, to a detailed account of political developments from the move against Sir Michael Somare in 2011 to the election of Prime Minister Marape and his performance to 2022. There are also chapters on language policy, external and internal security, religious fundamentalism and national identity, and the sustainability of economic growth.

Mathematics, Statistics & Computer Science Careers Research and Advisory Centre (Cambridge, England) 2007-04-15 Popular among university applicants and their advisers alike, these guides presents a wide range of information on a specific degree discipline, laid out in tabular format enabling at-a-glance course comparison.

Corporate Governance and Business Ethics Alexander Brink 2011-08-12 This volume explores corporate governance from three perspectives: a traditional economic, a philosophical, and an integrated business ethics perspective. Corporate governance has enjoyed a long tradition in the English-speaking world of management sciences. Following its traditional understanding it is defined as leadership and control of a firm with the aim of securing the long-term survival and viability of that firm. But recent business scandals and financial crises continue to provide ample cause for concern and have all fuelled interest in the ethical aspects. As a result, corporate governance has been criticized by many social groups. Economic sciences have failed to provide a clear definition of the corporate governance concept. Complexity increases if we embed the economic approach of corporate governance in a philosophical context. This book seeks to define the concept by examining its economic, philosophical and business ethics foundations.

The Report: Papua New Guinea 2015 Oxford Business Group 2016-09-17 In Papua New Guinea hopes are high that real change is on its way; the country's political, administrative, financial and technical leaders now have to find a way to ensure the most productive distribution and use of financial resources. Many international actors are watching closely to see how this young country negotiates its path. Papua New Guinea became a major exporter of gas in 2014 when the \$19bn PNG liquefied natural gas (LNG) project was completed ahead of schedule and within budget, significantly increasing the size and strength of the economy. The year ahead is likely to see PNG benefit from the further development of its hydrocarbons sector, fuelling the growth of its economy as a whole. The LNG influx also poses challenges, however, in terms of ensuring inclusive growth and productive use of the new revenues. PNG takes pride in being a final frontier of natural and cultural development, but the task ahead is to protect the country's heritage while becoming part of the global economy.

Major Impediments to the Development of Papua New Guinea. Non-Communicable Diseases (Lifestyle Disease), High Illiteracy Rate, Corruption and Landowner Compensation (Conflict) Joseph Bossip 2015-07-27 Scientific Study from the year 2015 in the subject Economics - Case Scenarios, , language: English, abstract: This paper discusses some of the major impediments that are affecting the development of this country, Papua New Guinea and off course the general picture of the world. These impediments are identified as Lifestyle or Non Communicable Diseases, Corruption, High Illiteracy rate and Landowner issues especially land conflict and land compensation for mining. I see the following as major impediments to the development of this nation; however people have different views, but I see these things are becoming barriers to the development of this nation. Due to modernisation and westernisation, a lot of people in Papua New Guinea have already adopted western lifestyle. Thus, Non- Communicable Disease is prevalent in PNG. Non- Communicable Diseases are normally found in developed countries but now it is found in PNG. The first case was reported in 1971 but now it's rose up to almost 46% of the total death rates in PNG is NCD. The survey shows that it is affecting most working class people who have direct correlation in term of input in the development of PNG through human resource development and economic development. Secondly, corruption can also be regarded as one of the impediments to development in PNG because a lot of public funds have been misused at the political and bureaucratic level. We will explore the details in the discourse of this paper. Thirdly, high illiteracy rate is another contributing factor hindering the progress of development in Papua New Guinea. Finally, but not the least is land owner conflict and land compensations, it is also seen as an obstacle to the development of this nation of Papua New Guinea. Especially customary land acquisitions and landownership conflicts in mining areas. For example, Bougainville Copper Limited (BCL) has been closed down due to landowner compensations, as a result government infrastructures have been destroyed and lives have been claimed. This paper also provides some strategies and recommendations to address the following issues highlighted above. Especially recommending the government of the day to look into these issues through policy development and legislative framework. Further research is encouraged for the

decision makers or policy makers to have sufficient information available to make informed decisions to address those issues before it's too late.

Kenneth L. Pike: An Evangelical Mind Boone Aldridge 2021-12-07 This biography examines the life of a most unusual twentieth-century evangelical, Kenneth L. "Ken" Pike (1912-2000), who served with the Wycliffe Bible Translators and the Summer Institute of Linguistics. Pike began his missionary career as a Bible translator, but he went on to become a world-class linguist who made his mark on the science of linguistics and the study of indigenous languages around the world. Known among linguists and anthropologists for his theoretical contributions, this volume seeks to bring Pike to a wider audience by illuminating his life as a key evangelical figure, one who often broke with conventional evangelical constraints to pursue the life of the mind as a Christian intellectual and scholar. Here is a story of how one evangelical Christian man served the global church, the scientific community, and the world's indigenous peoples with his entire heart, soul, and mind.

Extracting Innovations Martin J. Clifford 2018-06-13 This book considers the most contemporary innovations propelling the extractive industries forward while also creating new environmental and social challenges. The socio-ecological fabric of innovation in the extractive industries is considered through an integrative approach that brings together engineers, natural scientists, and social scientists—academics and practitioners—giving an empirically grounded and realistic evaluation of the innovations in this sector. It synthesizes a series of questions including:
